

About us!

Nutrinatural Lda. is an innovative agribusiness company, focused in creating sustainable solutions that meet the needs of society, with a strong commitment to community development and environmental conservation. With a competent, multidisciplinary team that is passionate about making a difference, we offer healthy, high-quality natural products that improve lives and promote beauty and well-being. Our headquarters is in Nampula province, Mozambique. Our company was founded in 2018 and started its virgin coconut oil production in 2023, in Inhambane province. Our approach is to work in partnership with the local communities where we operate in a mutually beneficial relationship.

Vision

Our vision is to inspire the world through innovation, connecting people and nature to create sustainable solutions that improve lives and conserve the environment.

Mission

Our mission is to add value to coconut production through sustainable and eco-friendly practices to produce healthy natural products with excellent quality.

Values

Our company is guided by a deep respect for nature and local cultures. We work with non-intensive agriculture, always seeking to protect the land and preserve traditions. Commitment to the community is central to our work; We invest in the capacity building of small farmers and reinvest part of the profits in actions that strengthen the ecosystem, such as planting new coconut trees and research in partnership with renowned institutions. We strive for excellence and quality in every bottle of virgin coconut oil, operating with transparency and honesty.

Our product

The virgin coconut oil (Naturaliza) is made from fresh organic coconuts produced through traditional coconut farming by small-scale family producers, where no pesticides or chemicals are used. The process itself of processing oil is simple and is based on the basic methods of grating, drying and cold pressing. We put quality over quantity, as we want our consumers to have the best experience when using our products. Quality control is performed at every stage of the process, ensuring that our oil is of the highest quality.
