
Wessence Language Lab | Precision in Scientific Communication

Scientific Precision. Human Connection.

The Rigor Your Industry Demands. The Multimedia Agility You Need.

We are a **certified women-owned, regulated-industry language service integrator**, merging 30 years of expertise with advanced language engineering to ensure your message reaches physicians, regulators, and patients intact.

In the Life Sciences landscape, precision is not an added value; it is a regulatory mandate. A single mistranslated term can stall a clinical trial, jeopardize an EMA/FDA filing, or compromise patient safety.

At Wessence Language Lab, we eliminate the noise.

High-Level Specialization: Strategic Regulatory Localization

Mastering technical language across the industry's most complex fields:

LIFE SCIENCES | *The Technical Rigor*

High-Complexity Content: Oncology, hematology, immunology, cardiology, infectiology, rare diseases, and nephrology.

R&D & Biotech: Clinical trial protocols (Phases I-IV), Informed Consent Forms (ICFs), and validated eCOA & ePRO localization.

Pharma & Regulatory: eCTD/CMC filings, pharmacovigilance reports, and 100% compliant medication labeling.

HEALTHCARE | *The Patient Impact*

Digital Health & MedTech: Health apps, medical software, diagnostic equipment, and surgical guides.

Patient-Centric Communication: IFU (Instructions for Use), patient portals, and educational materials.

Health Insurance & Operations: Evidence of Coverage (EOC), Annual Notice of Change (ANOC), and Summary of Benefits (SB).

Why Choose Wessence Language Lab as Your Certified Strategic Partner?

- **Audit-Ready Quality:** Our workflows ensure compliance with GCP, HIPAA, FDA 21 CFR Part 11, and GDPR
- **Expertise in regulatory compliance:** We validate under ISO 17100 standards and align with EMA, FDA, and ANMAT requirements.
- **Integration:** We are your single point of contact for technical translation, content development, and audiovisual editing.
- **Advanced Language Engineering:** We implement AI when it makes sense to optimize budgets with mandatory final validation by human medical experts.
- **Multi-Market Support:** Bridging Europe and the Americas with expert linguistic services in English, Spanish, Portuguese, German, French, and Italian.
- **DEI-Driven Excellence:** Certified women-owned leadership that aligns with your corporate diversity and inclusion goals. We are active members of Women in Localization.

Multimedia Solutions for Life Sciences & Healthcare

Beyond translation: we utilize technology to create great user experience.

- **Regulatory Content Development:** Creation of informative materials and medical resources with strict regulatory alignment.
- **Audiovisual Solutions:** Subtitling, dubbing, video editing and voice-over (Human & AI) for medical training and global product launches.
- **eCOA/ePRO & Software Localization:** Full adaptation of health platforms and clinical trial apps with linguistic validation.
- **Pharmaceutical Marketing:** Educational materials and digital content that meet strict industry compliance standards.

Let Us Discuss Reaching Your Customers Globally

We make life sciences accessible in every language. Join the top leading companies that trust **Wessence Language Lab**.
