

STALTOR

Experts in access solutions for demanding and challenging environments

The industry reference for standard and tailor-made solutions based on glass fiber reinforced polymers

Mobile acces solutions

GFRP ladders (single, reform, push-up, pull-up)

GFRP stepladders (single or double sided)

GFRP mobile working platforms

GFRP large working platforms

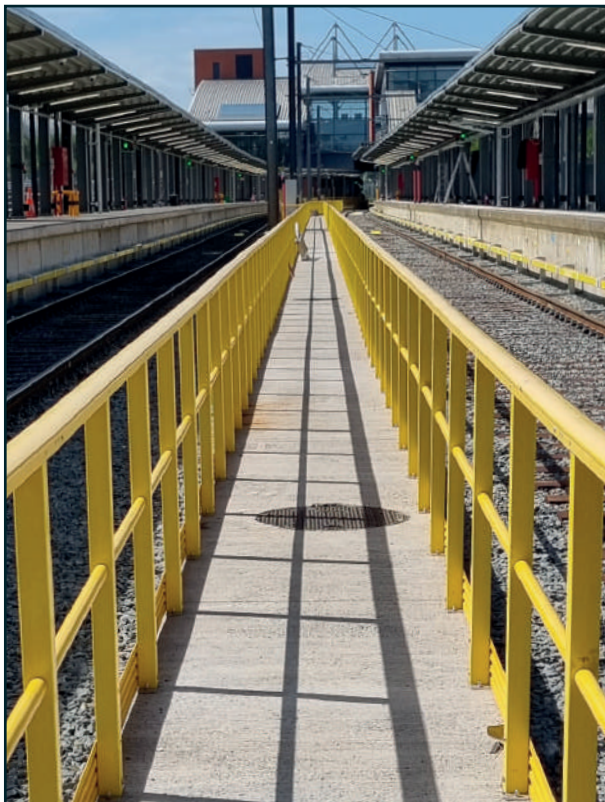

Fixed acces solutions

GFRP shaft ladders

GFRP safety cage access ladders

GFRP handrails & -safety gates

GFRP platforms & -transfer platforms

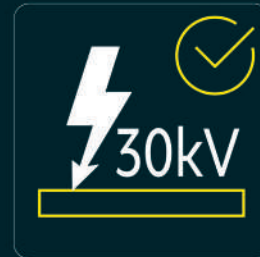

Glassfibre Reinforced Polymers are sustainable and durable materials with a long lifespan in aggressive and harsh environments.

good chemical
resistance

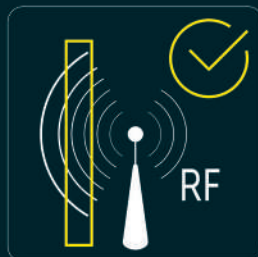

durable

electrically
insulating

thermally
insulating

RF neutral

stable properties
-40 tot 120°C

Staltor DNA:

- Long-term experience with GFRP access solutions used in various applications and industries
- wide range of solutions consisting of both standard products and modular & tailor-made solutions
 - knowledge and experience with demanding environments
 - in-house engineering
- experience with hybrid solutions combining GFRP and stainless steel
