It is important to carry out R&D studies to transfer the Historical Harput Campus, which belongs to the Elazığ province in the Eastern Anatolia Region of Türkiye, to digital tourism. In order to introduce the different cultural heritages that have survived to the present day in the Harput region, where different religions lived together in the past, nationally and internationally and to bring them to tourism, it is to ensure the formation of a new cultural vision with the R&D studies of our historical region in cooperation with EU member countries.
