

Future leader of UFC (Ultra Fast Charging) EV in EMEA

BeReadyGROUP MEASURED BY THE 21st CENTURY

- More than 30 years of the experience
- EV, IT, telco, energy infrastructure, railway and road infrastructure

Who We Are?

BeReady2GO is the fastest-growing HPC/UFC infrastructure operator in Poland. We are building a network of ultra-fast charging stations (200 kW–3.6 MW) designed to enable the mass adoption of electromobility. The project is backed by the BeReady Group — companies with over 30 years of experience in IT, telecommunications, energy, rail and road infrastructure.

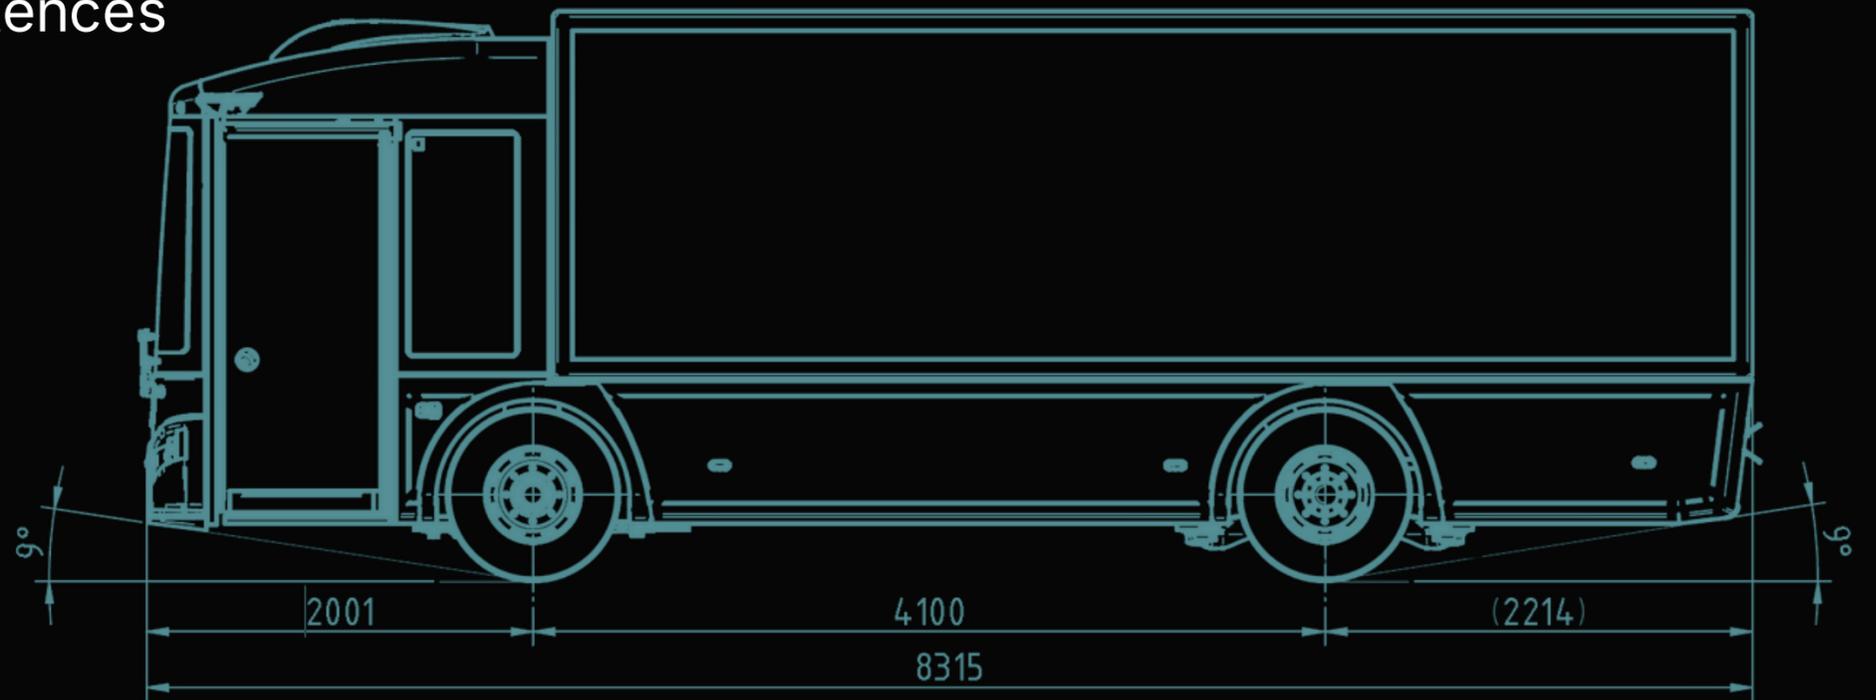

A market ready for explosive growth

- Poland is expected to reach approximately **2.5 million** BEVs within the next 10 years—a level comparable to Germany today.
- To support this market, at least 100,000 charging points will be required.
- BeReady2GO has already secured **100** locations currently in design or grid-connection phases, with another **1,000** locations in the permitting pipeline.
- Our target is to achieve a **25–35%** market share by 2030–2035.

eVehicles

- BeReadyGROUP has potential to produce of eBUSES, eTRUCKS
- We will be the polish producer of EV, eVAN, eBUS & eTRUCK
- We can sell eVANs, eTRUCKS as Dual Use to public sector, including military
- We can support Poland, Ukraine & EU market
- As CPO of High/Ultra Charging Stations we can prepare complete infrastructure for public/military needs
- We wanna be the biggest player of EV sector in Poland
- We have 100% of necessary competences
- WeAreReady2GO to succeed

Our Projects

A modern garbage truck powered by green energy is a great alternative to traditional combustion engine vehicles. Thanks to its special design, we can redesign the vehicle to make it more convenient for everyday use by waste collection workers.

Our Projects

Fire and rescue vehicles. Modern in appearance and functionality, they offer ample space for transporting essential rescue equipment and lifesaving personnel. These comfortable and efficient vehicles support our environment.

Our Projects

Fully electric vans, trucks, and everyday public transport. Extremely comfortable and ergonomic, designed with attention to every detail. Supporting our natural environment.

Opportunities & benefits

Opportunities

- Zero-emission
- We can produce every car you need
- Possible short series
- Potencial application – everykind, including military
- Car body – everykind
- **Charging – 45 min (up to 800A)**

Benefits

- Zero-emission
- Co-financing from EU funds
- **Reducing the carbon footprint/ESG**
- City Center entrance
- Fulfilment of all EU transport requirements
- **Reduction of operating costs**
- Perfect connection of energy purchase from our HPC/UFC network **#BeReady2GO**

We are looking for

Experienced technology partners in the field of:

- Autonomous vehicles
- AI in automotive
- Battery technology
- Parts suppliers

Horizon Europe potencial:

- Technology partners
- International partners
- Financial support

We have already partnership with:

- Łukasiewicz - Institute of Aviation
- PwC – PriceWaterhouseCoopers
- Łukasiewicz - PIMOT - Automotive Industry Institute
- Łukasiewicz – PIAP – Industrial Research Institute for Automation and Measurements

Let's talk if you are:

Military decision maker

- We can produce eTRUCK you need
- We can secure your energy with mobile energy storage
- We can build HPC/UFC infrastructure by ourself for you to use

Fleet manager

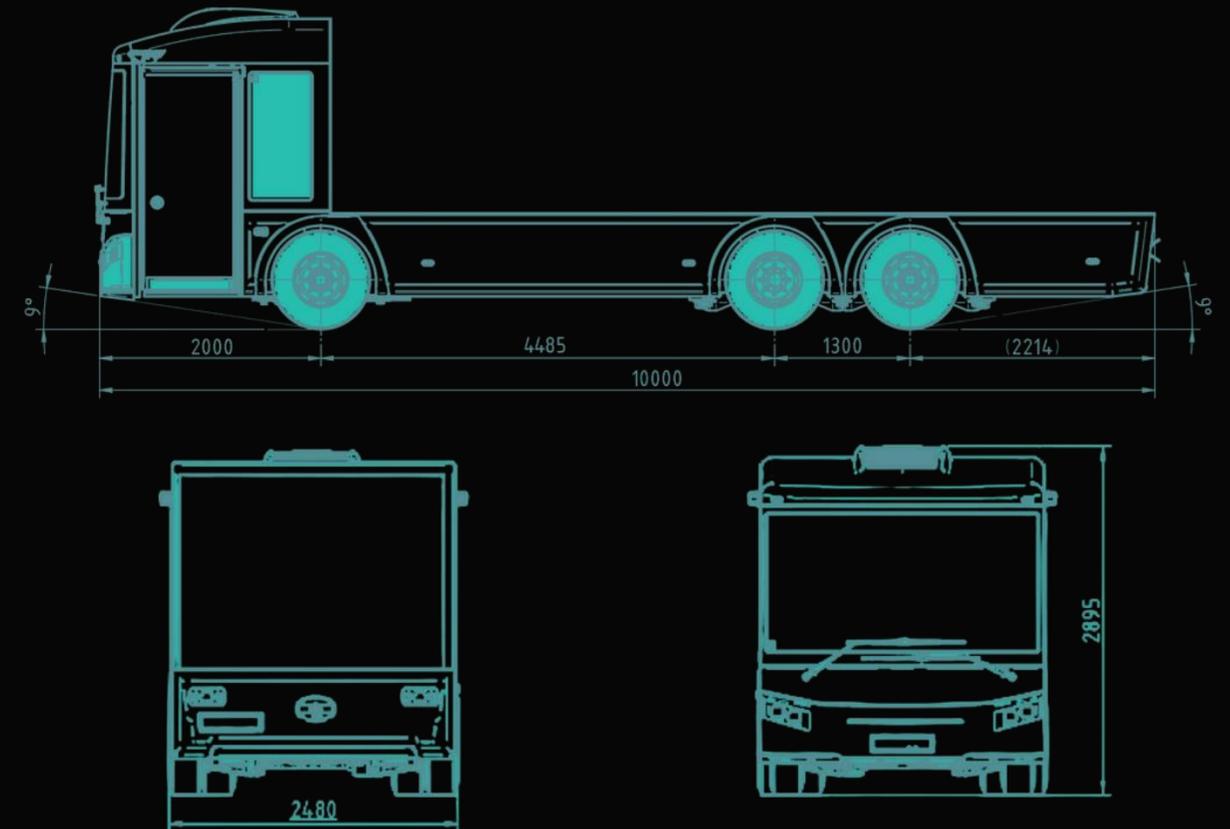

- We can help you to change your fleet for zero-emission
- We can produce eTRUCK you need
- We can give you a special conditions for HPC/UFC charging

Business owner

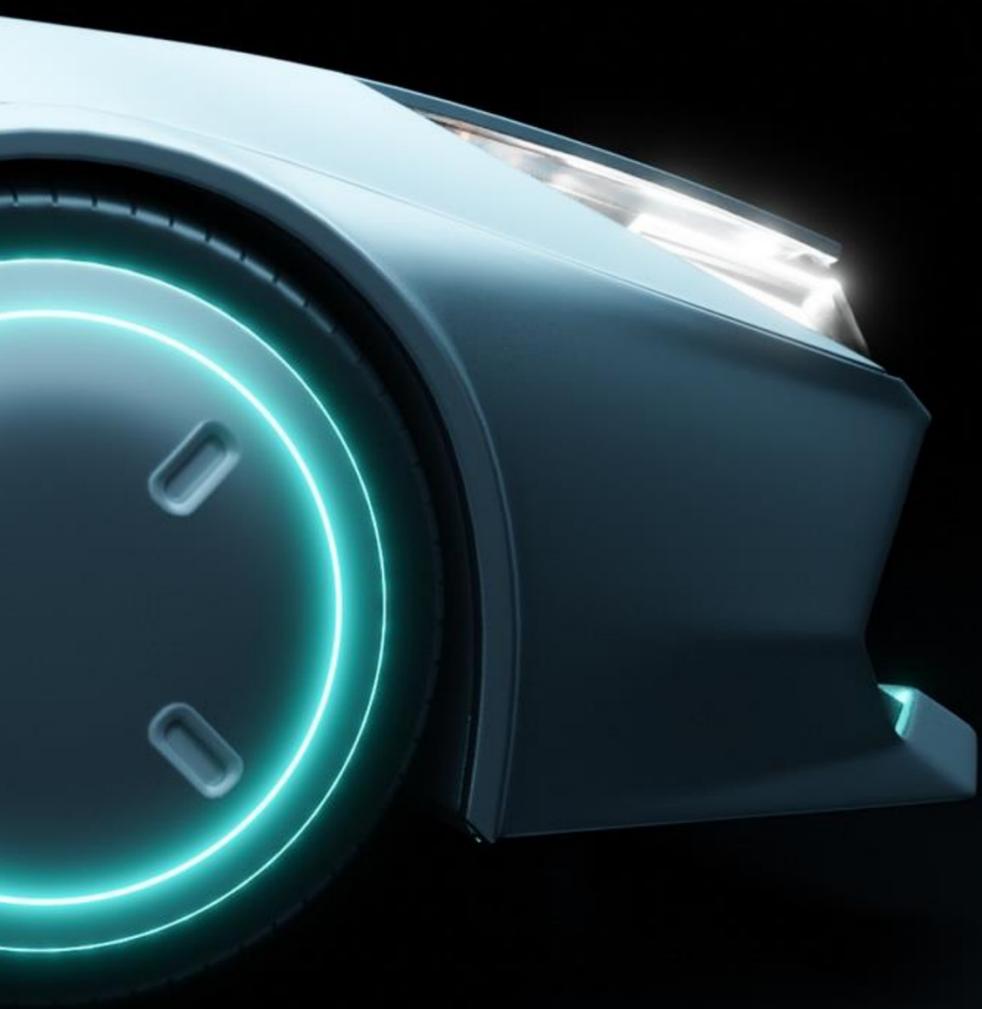

- We can help you to find perfect way to transform your delivery
- We can support your zero-emission way
- Let's talk about ESG ideas

City authorities

- We can build with you autonomous eBUSe

**We are looking for partners to grow up with both business ...
... just contact me**
