Get to know us better!

Diet-Food was born out of necessity. As three persons: Magda, Patryk, and Michal found out there was not much healthy food on the market that could be easily achievable for ordinary people and thus decided to create a Diet-Food brand.

Our brand is 10 years old but we started in our parents' company, a respected European spices supplier.

In 2013, we began importing and selling konjac noodles under our own Diet-Food brand. A year later, in 2014, we expanded our offerings to include superfoods and oils. Then we created some superfood mixes and decided to move into other food sections.

We saw that also active people need healthy solutions to supplement their big and small goals. Different activities demand different nutrition that's why we produce products that fit various needs and diets.

Currently, we produce more than 300 products. We formulate all of our products with ingredients trusted by nutritionists and plant medicine experts. It is confirmed by thousands of our customers worldwide that integrating our products into your daily diet can have incredible benefits.

We are a trusted partner with customers that include small specialty shops and the biggest World retail chains.

In our facility, we have 30 employees that are our friends and neighbors dedicated to bringing the best products to our customers. We support local Polish sports enthusiasts and a lot of sports Tournaments and events.

We are proud to develop various products with good impact both for nature and for our customers.

Located in Central Poland with good Access to ship our products worldwide. We also do PRIVATE LABEL and sell bulk. Please contact us for more!

Pure, Organic, Fun!

These three words describe our portfolio of products.

We use **natural** ingredients to bring you **high-quality** products filled with good vibes. Check us out!
