

Library A place to meet and discover

Today's Library

More than just books

Today, both public and academic libraries are increasingly becoming vibrant. They are going beyond being places to merely access knowledge to become hubs to truly explore and create. This stresses the demand for increased and improved services and hence the demand for more space.

It has never been more vital to ensure libraries offer an appropriate balance of flexible and special-use spaces to spur dialogue and engagement. Along with responding to changes dictated by technological advances, libraries must also offer appropriate spaces for meetings, presentations and casual collaboration. With a little help of Bruynzeel Storage Systems, libraries are easily able to create more space for all these kind of community needs by the aid of a new storage and display strategy.

We can eliminate or reduce your need for more space in public areas or your need for non-public archiving and/or extra building space and enhance internal workflow, efficiency and logistics.

Sysco® Library

Why choose a four post system?

As a four post system, Bruynzeels Sysco® Library is much more affordable compared to cantilever systems. In most cases you can save up to 35% over equivalent cantilever. Besides that, a four post system has no central spine and thus no wasted space.

Bruynzeels Sysco® Library has a wide range of accessories and is available in a range of finishes to complement any library's interior design.

Bespoke design

Shelving end panels can be specified in glass, steel or wood, in a selection of RAL colours. You can also go a step further, and choose a solution that emphasises the style of your library in an attractive way. Your logo can be incorporated into a panel, or you might prefer to have a unique image that reflects either your activities or the history of the premises, to help provide inspirational surroundings.

Stone grey, RAL 7030

Pastel violet, RAL 4009

Traffic purple, RAL 4006

Pastel blue, RAL 5024

Turquoise green, RAL 6016

Copper brown, RAL 8004

Natural oak light, H3389 ST 11

Woodline Mokka, H1428ST22

The right acoustics

It is often the case that study desks, reading areas and storage facilities are located within the same room. It is important that people are able to read and study in a peaceful environment, and the right acoustics are important in this regard. Bruynzeel library shelving can be fitted with acoustic panels, which have noise-reducing properties that contribute towards creating areas suitable for study and learning.

Compactus®

Why choose mobile shelving?

Mobile shelving is far more space-efficient than conventional static shelving. Sometimes called a moving-aisle system, the single access aisle is 'created' wherever it is required by moving the mobile book-stacks aside, either individually or all at the same time. Our mobile systems can be equipped with extra wide aisles to allow wheelchair access, and additional innovative features such as Overnight parking to preserve books and security options.

An increasing number of mobile units have been installed in the public areas of libraries, thanks to their enviable safety record and space-saving features. Nowadays libraries are also used for meetings, lectures and other services. This means that space-efficient design is important. Mobile library systems make the difference. During the day they are set up in Library mode, so that visitors have maximum access to reading material. The system can be closed in the evening, so that space is created for meetings, lectures and other gatherings.

"We are very pleased with our new library. All books are accessible to students and there is a lot of room to move between the cabinets. A major advantage is that the bookcases can be locked, making our collection of books protected against theft."

Birgitte Sass
Librarian, Campus Roskilde

Compactus® Series

Focus on ergonomics and safety

Bruynzeel's Compactus® series is more than just a space-saving solution; the different systems are extremely easy to operate. Compactus® can be supplied with two different types of drive systems:

Compactus® Original:

Rotating the ergonomic operating handle provides swift and easy access to your collection. Select from an extensive range of finish options, from cost-effective chain box covers to eye-catching coloured glass.

Compactus® Dynamic II:

Thanks to the electronic control system, Compactus® Dynamic II units are easy to operate and effortless to move, even with your hands full. With the Bruynzeel Dynamic II Control Master app users can open the correct aisle using a mobile phone or tablet. With this app we improve the ease of use of our mobile storage systems. The app also includes document management system functionalities.

LED Lighting

Achieve up to 98% lower power consumption

Bruynzeel LED Lighting allows organisations to achieve up to 98% lower power consumption on their lighting – a result that will have a major impact on energy costs and the amount of CO₂ emissions of a company. When integrated LED lighting is added to mobile shelving systems, the lights only illuminate when the aisle is in use, giving a combined energy saving of up to 98% over conventional ceiling mounted fluorescent bulbs.

Organise your collection

If you work in a library, it is important that tasks can be carried out both efficiently and ergonomically. Our wide range of accessories ensures that all media can be stored in a well-organised manner.

Choosing quality

With a sustainable touch

Choosing Bruynzeel means quality is guaranteed.

To make sure you get the best possible storage system our products comply with recognised international quality standards, awarded by independent experts in the field. The RAL certificates awarded for our products are your guarantee for quality and safety.

Your storage solution is made in our factory in the Netherlands, according to ISO 9001 and ISO 14001.

World-class manufacturing tools and methods implemented in our facilities allow us to produce your order with great precision in thousands of different configurations. We mainly use oil-free steel to minimise our impact on the environment by eliminating the need for detergents and cleaners. Our powder coating process guarantees a 100% coating with epoxy powder, so no corrosion can occur.

We would be delighted to assist you in achieving your sustainability goals by offering you durable products and space-saving concepts.

Exceeding expectations in service

Every Bruynzeel Storage solution comes with top-notch technical support. We go the extra mile to make sure you get the most out of your Bruynzeel system.

Expert advice

Get the rundown on all the dos and don'ts of your system from a Bruynzeel service engineer in training groups of up to eight users.

Key User training

Make the most of your storage solution by designating a "Key User", trained and supported by Bruynzeel. If further assistance is needed the Key User can directly contact our service staff.

Service contracts

For ultimate peace of mind we offer a range of service contracts, covering parts, labour and callout charges.

A Bruynzeel service contract guarantees your premium storage solution will receive the very best care from trained service engineers. Our star services are carried out by dedicated staff who take pride in the upkeep and maintenance of your system throughout its lifetime.
