

Since 1875  
creators of hi-tex solutions

#### Custom solutions since 1875

- In 1875 B. Henri Lampe started supplying cheese and quark cloth to the dairy industry.
- Our offerings in technical textiles quickly expanded, transforming our family business into an import and wholesale company, specialized in confection.

#### Our comprehensive solutions from in-house production

Our team of specialists develops innovative solutions every day. We have a:

- Confection department with specialized professionals.
- Strategic stock from our own warehouse.
- Modern machinery.

#### Our process

We aim to provide the best customer experience. We achieve this by:

- Sharing our knowledge.
- Communicate honestly and clearly.
- Thinking along and participate.
- Engaging in socially responsible business practices.
- Creating a suitable hi-tex solution.

**Lampe Group**  
Creators of hi-tex solutions

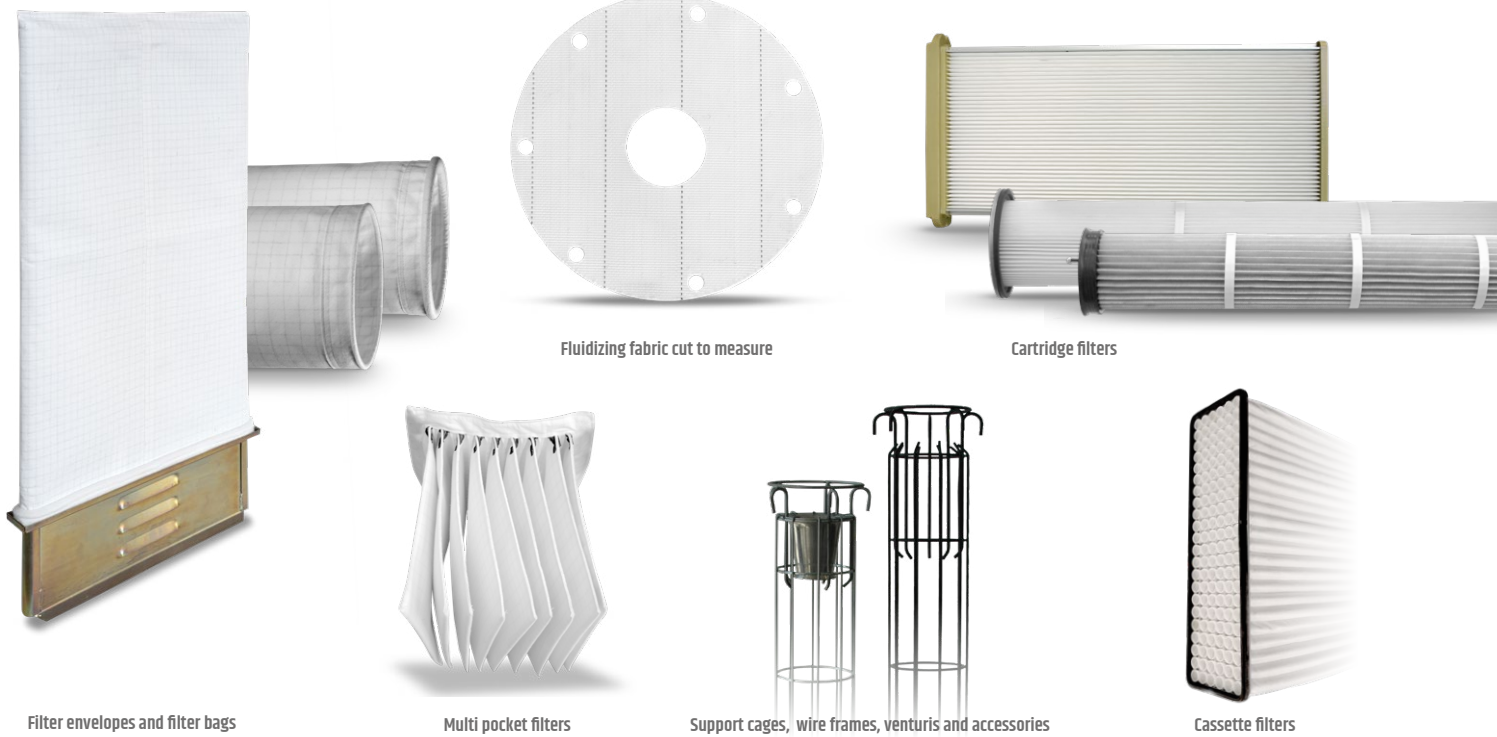

**Reducing dust emissions? An optimal indoor climate?  
Or do you want to protect your environment  
against fine dust?**

Discover our solutions and our complete range of filtration technology for bulk and solids handling.

## Reducing dust emissions and protection against fine dust

- Optimal and efficient filtration
- Lower energy costs
- Meet dust emission requirements
- Longer service life
- Food safe & Pharma
- ATEX

## Air filtration for a clean indoor climate

- Clean air for a pleasant and healthy environment
- Protection against fine dust
- Optimal service life
- Filtering starting from a particle size of 0.1 micron
- Minimize energy consumption
- Suitable for all installations, regardless of brand

## Flexible in connections for solids handling

- Quick and easy installation
- Weighing, dosing and mixing
- Sieving and plansifters
- Compensators for Flue gas
- Compensators for high-temperature applications
- Connections for air treatment and ducts
- Loading bellows for transshipment applications

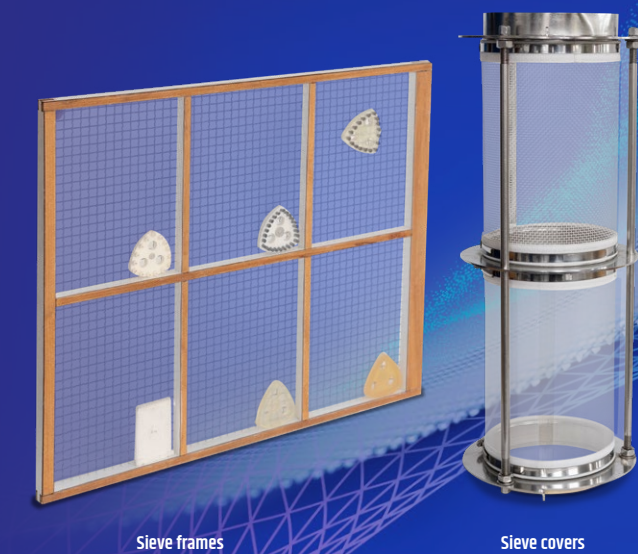

## Optimal liquid or wastewater process

- Downtime optimization
- Optimal dry matter results
- Efficiency and correct filtration rate
- High flow and optimal pressure build-up

## Sieve fabric and sieve covers

- Various mesh sizes and wire thicknesses
- Maximally abrasion-resistant and efficient design
- Materials for every process
- Cylindrical and flat screen coverings
- For all brands

## Specials and customization

Our textile solutions are featured in many (custom) products, including applications in defense and sports, growth-enhancing agrotexiles, cheese brining nets, and medical products (such as mattresses and evacuation aids).

## Save energy with our airsocks and air distribution systems

- Even air distribution
- Draft-free ventilation and no condensation
- Lightweight, quick and easy installation
- Energy-saving and long lifespan
- Hygienic; easy to maintain and easy to clean
- Available in multiple colors (to match interior)

## Our service

- Maintenance**
- Quick and professional filter replacement
  - Filtration optimisation
  - Cleaning of cabinets and ductwork
  - Washing of airsocks
  - Periodic maintenance according to contract
- Inspection**
- Emission measurements
  - Air quality measurements
  - Air flow measurements
  - Leak testing
