    └─ thanks to off-peak hours

    └─ thanks to your solar panels

EVOLVE

INCREASE ALONG THE WAY

Charging points without touching your network.

Storage From 50 kWh to 150 kWh.

**Power** Up to 60 kW distributed in AC.

Move Eiko with you.

EIKO
## DISCOVER OUR CASE STUDIES

CHARGING EMPLOYEES

By choosing the Eiko power cube at its French headquarters, FM Logistic has been able to set up a scalable recharging solution dedicated to its employees for recharging their vehicles at work.

Eiko at FM Logistic

CHARGING CUSTOMERS OR VISITORS

As part of its commitment to the energy transition and improving the user experience, Vinci Autoroutes is offering charging solutions for electric vehicles at its car sharing areas.

Eiko at Vinci

CHARGING A OPERATIONAL FLEET

To recharge its electric delivery fleet every night, DHL did not have enough power to install some twenty charging stations at its Créteil logistics hub.

OUR SUPPORT
IN 4 KEY STEPS

01
SIZING

We define your project and configure the solution to meet your precise needs.

02
DEPLOYMENT

Our deployment team manages the installation project from A to Z: technical, material and administrative preparation, prior to deployment in your parking lot.
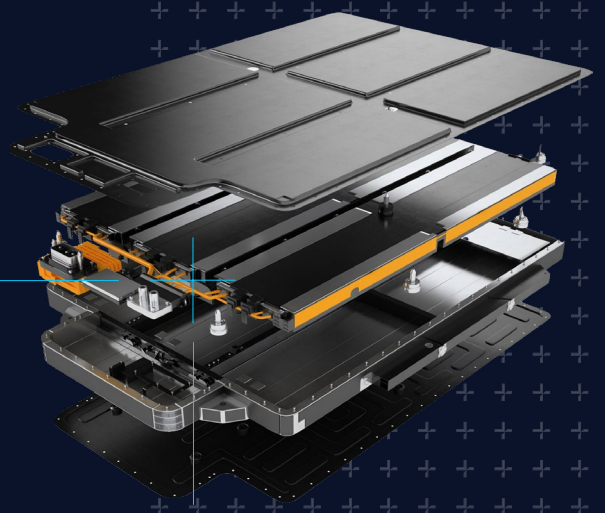

03
SUPERVISION

Our teams communicate with Eiko and intervene remotely in real time. They provide support for users.

04
MAINTENANCE

Every year, we carry out preventive maintenance. Corrective maintenance is carried out remotely or on-site by our dedicated team.
