Ariterm Energy's high-quality bioheating solutions offer an efficient and reliable way to utilize domestic, renewable, fossil-free energy sources.

Heating systems have been manufactured in Saarijärvi since 1974. We have established our position as a Finnish heating system expert, with the core mission of replacing fossil fuels with bioenergy.

HEATING SYSTEMS THAT PRODUCE CARBON-NEUTRAL BIOHEAT

Our factory is located in Saarijärvi, in the middle of the clean forests, fields and waters of Central Finland.

Ariterm Energy is a pioneer in energy technology, delivering innovative and sustainable heating solutions for a better tomorrow. Backed by decades of experience, we combine deep industry knowledge with forward-thinking expertise to deliver reliable, efficient, and future-ready energy systems.

With Ariterm's heating systems you can produce heat responsibly – with respect for the environment and future generations.

DECADES OF EXPERIENCE

Our legacy is built on decades of dedication, continuous development, and a passion for excellence.

Whether it's advancing renewable energy, optimizing energy efficiency, or developing cutting-edge technologies, we lead the way – today and into the future.

From our factory in Saarijärvi, we have delivered

- around 200 heating plants in the power range of 500–6000 kW,
 - over 500 000 boilers and burners
- all built to last and perform reliably in demanding conditions.

BioJet Multi pellet burner is the result of extensive development work

TRUSTED HEATING SOLUTIONS SINCE 1974

- Decades of experience and expertise in the field of bioenergy.
- A dedicated and professional team.
- Versatile selection of portable or permanently installed solutions.
- Reliable and sustainable heating systems – tailored to different needs.
