

AI avatars of your own
care team, explaining surgery
clearly, in every language.

The Problem

Patients often leave surgical consultations without fully understanding or remembering the information they receive. This increases anxiety, non-compliance and informed-consent risks, while clinicians repeatedly explain the same procedures.

The Solution

OP/AID transforms clinically validated medical content into personalized, multilingual educational videos presented by AI avatars of the patient's own care team.

Traction

~1,000

ERAS-aligned
medical texts

4

additional institutions
in commercial pipeline

~5 min

saved per consultation

Clinically validated content

Care-team AI avatars

Single-QR access

Why Op/Aid

Hungarian content validated in collaboration with the University of Pécs Clinical Center

Multilingual delivery

Scalable licensing model

Business Opportunity

OP/AID is a B2B healthcare technology platform for hospitals, surgical centers and healthcare networks. Its recurring institutional licensing model enables scalable growth across medical specialties, institutions, languages and international markets.

Seeking Investment To Accelerate Growth

International expansion • Language validation • Surgical animations
In-house AI infrastructure • New medical specialties

OUR VISION

Every patient informed and confident—before entering and after
leaving the operating room.

Gergely Oláh, MD — CEO & Medical Director • Zsófia Király — Business Lead • Noémi Liber, Dr. — Operations Lead
