EXPERTISE · FRACTIONAL CTO

A technical co-founder's judgement, without hiring one full-time.

For companies and founders who need to build with AI but don't have a CTO. We take the technical lead for as long as you need it.

WHAT WE TAKE ON

- **Technical strategy:** what to build, what to buy, what to skip
- **Architecture** and choice of AI models, cloud or on-premise
- **Prototype and MVP** built and validated with real users
- **Hiring and guiding** developers or external vendors
- **Security, GDPR** and readiness for the EU AI Act

WHO IT IS FOR

- Companies starting their first AI project
- Founders with a product idea and no technical partner
- Teams that need a second opinion before a large investment
- Organisations preparing a funded project that needs a technical lead

Kallina AI

EXPERTISE · FUNDING FOR AI PROJECTS

We also help you find the money to build it.

We use these programmes ourselves and write our own applications to European and national calls. We help you pick the right one and prepare the technical part.

EBRD Star Venture

Advisory support for our own growth.

EuroHPC · LUMI

5,000 GPU hours approved for our AI work.

Microsoft for Startups

Cloud credits and technical support.

NVIDIA Inception

Access to the NVIDIA ecosystem and tools.

Talk to us about your project: we tell you honestly what to build first, how long it takes, and which funding could cover it.
