

WAVEfinder

Wave Adaptive Vessel Efficiency

Offshore Vessels | Short Sea Journeys

Find upcoming weather windows, plan your route and make the final go/no-go decision from one intuitive platform.

Precision tools → Confident decisions

WAVEplanner

De-risk your tasks before going offshore, year round

WAVEadaptor

Increase your daily efficiency at sea

01.

Find weather windows opportunities up to 6 months in advance and plan routes specific to your vessel requirements.

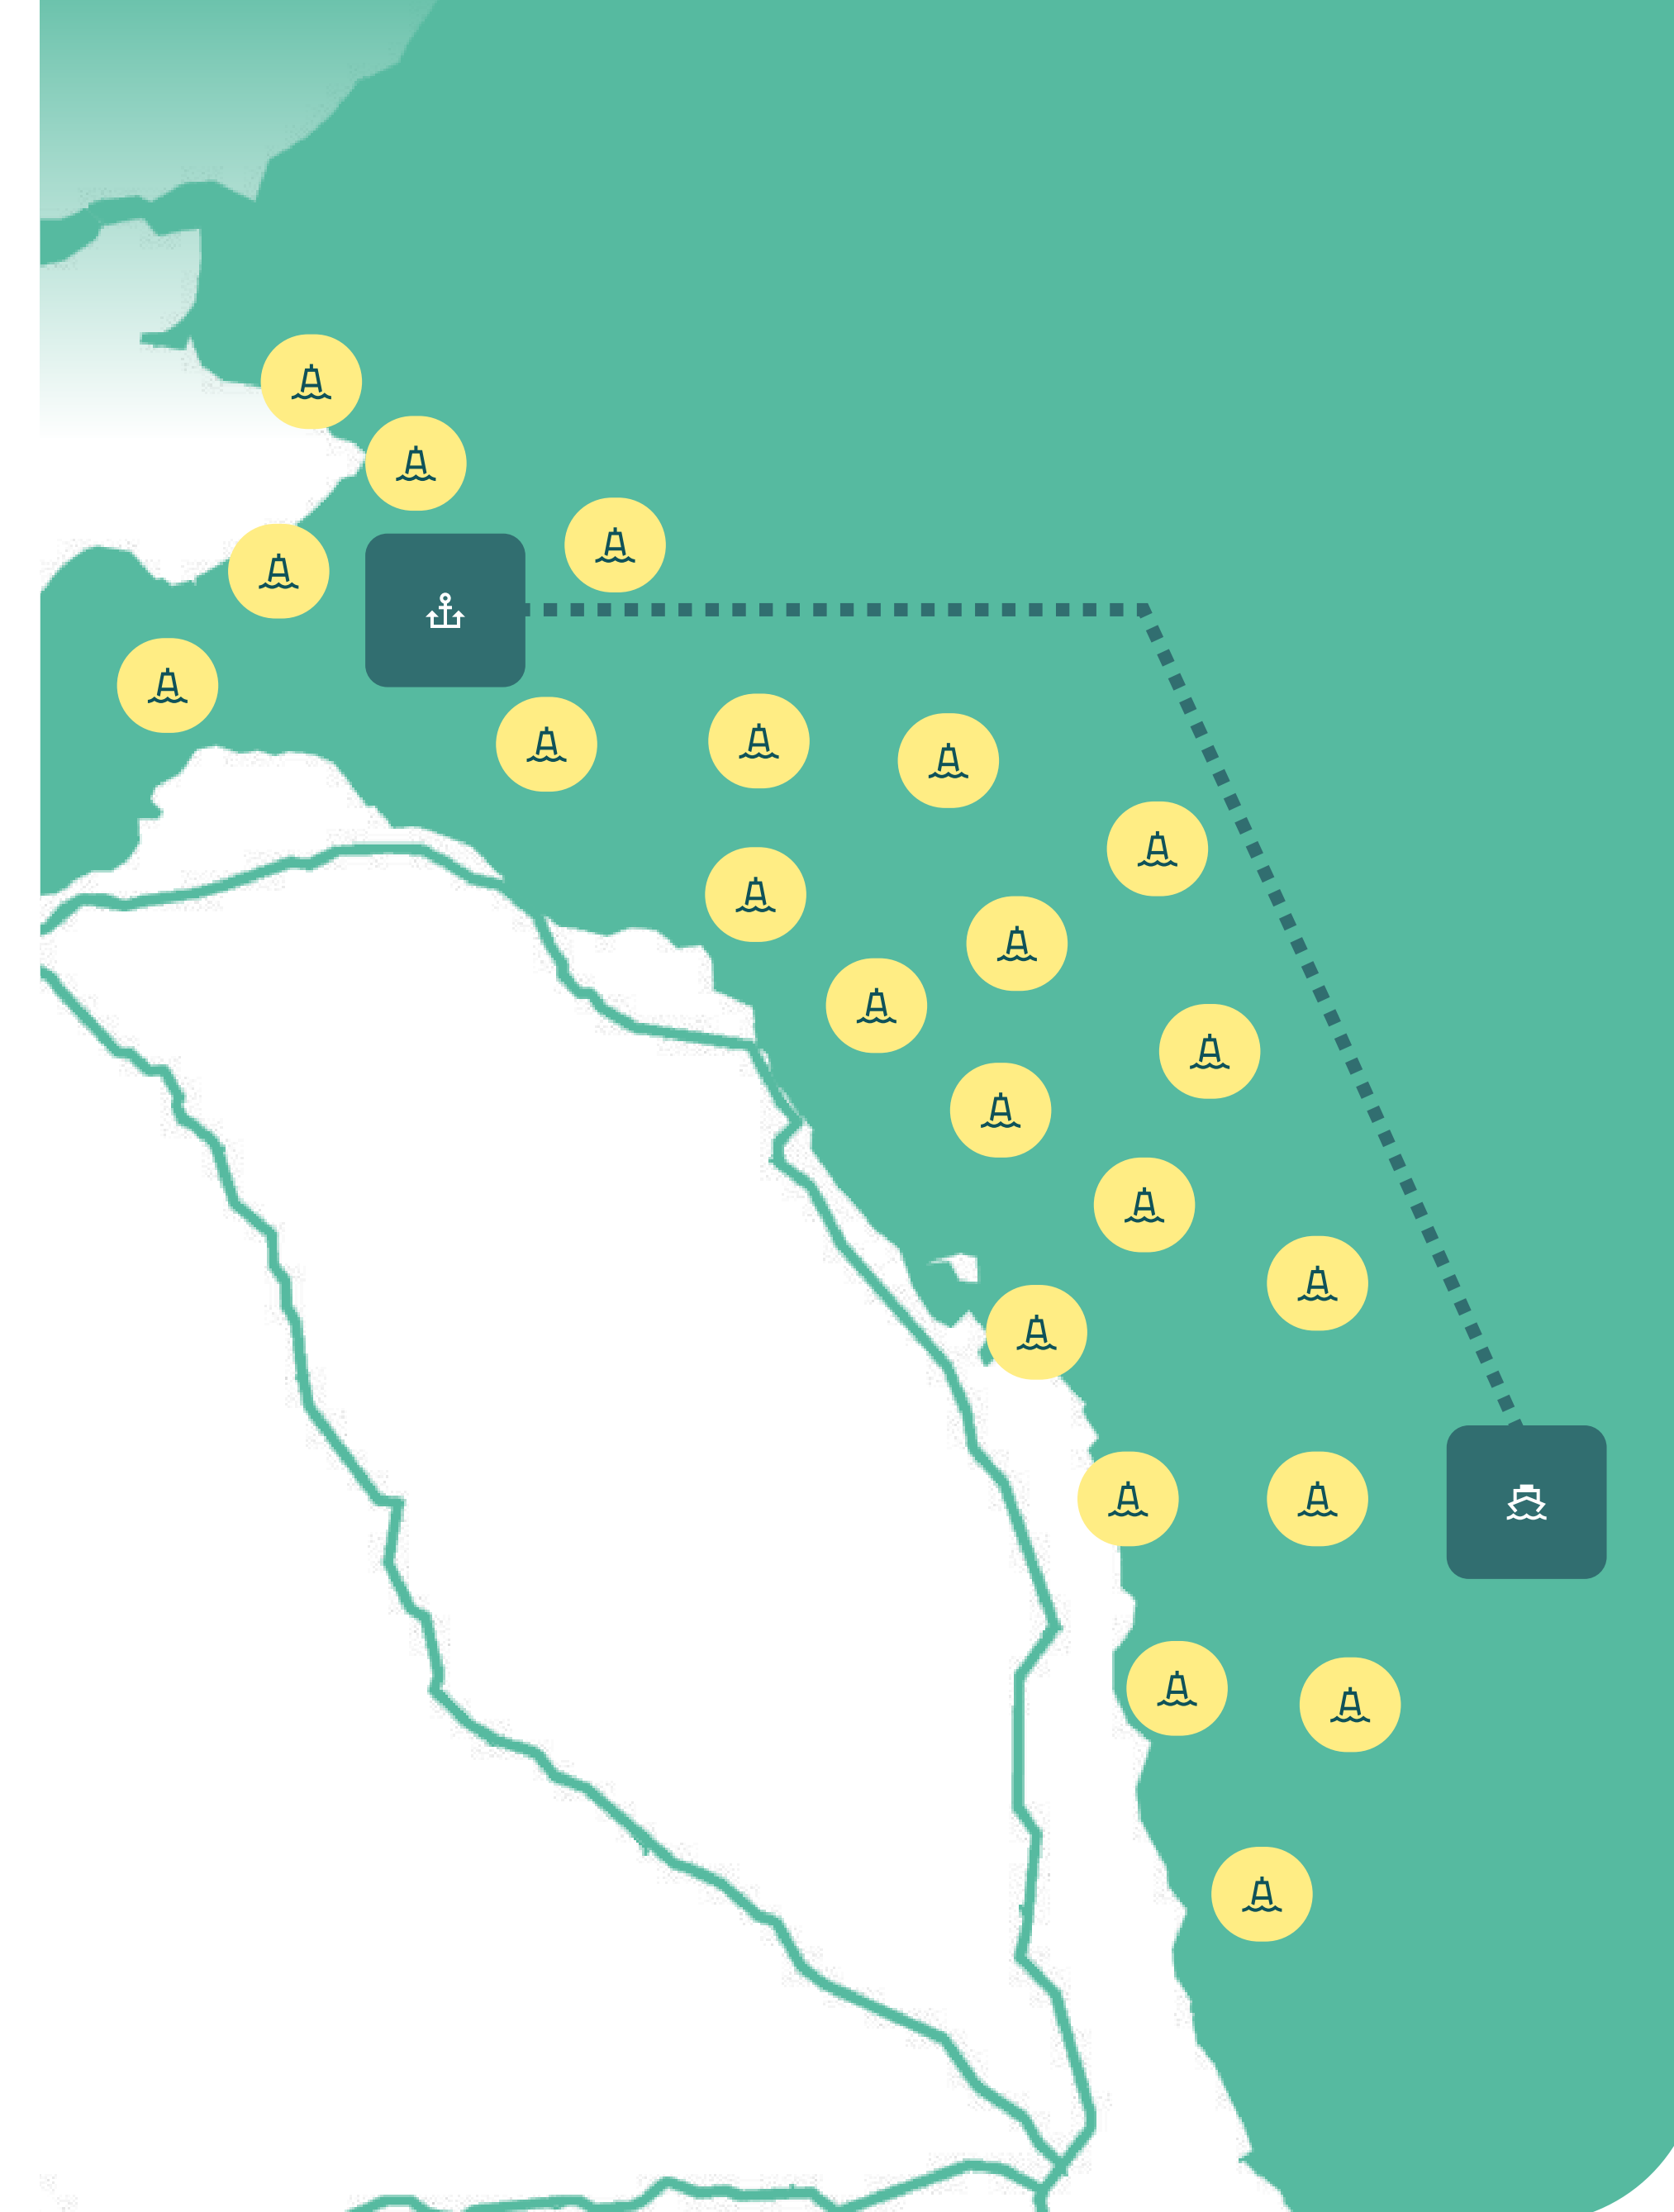

02.

Automatically find sheltering zones along your route from port to site.

03.

Automatic daily go/no-go decisions and route optimisation based on forecasts specific to your area

We empower your real-time decisions using hard science.

We compare over 50 forecasts

at up to 100 live offshore locations and automatically update your decisions

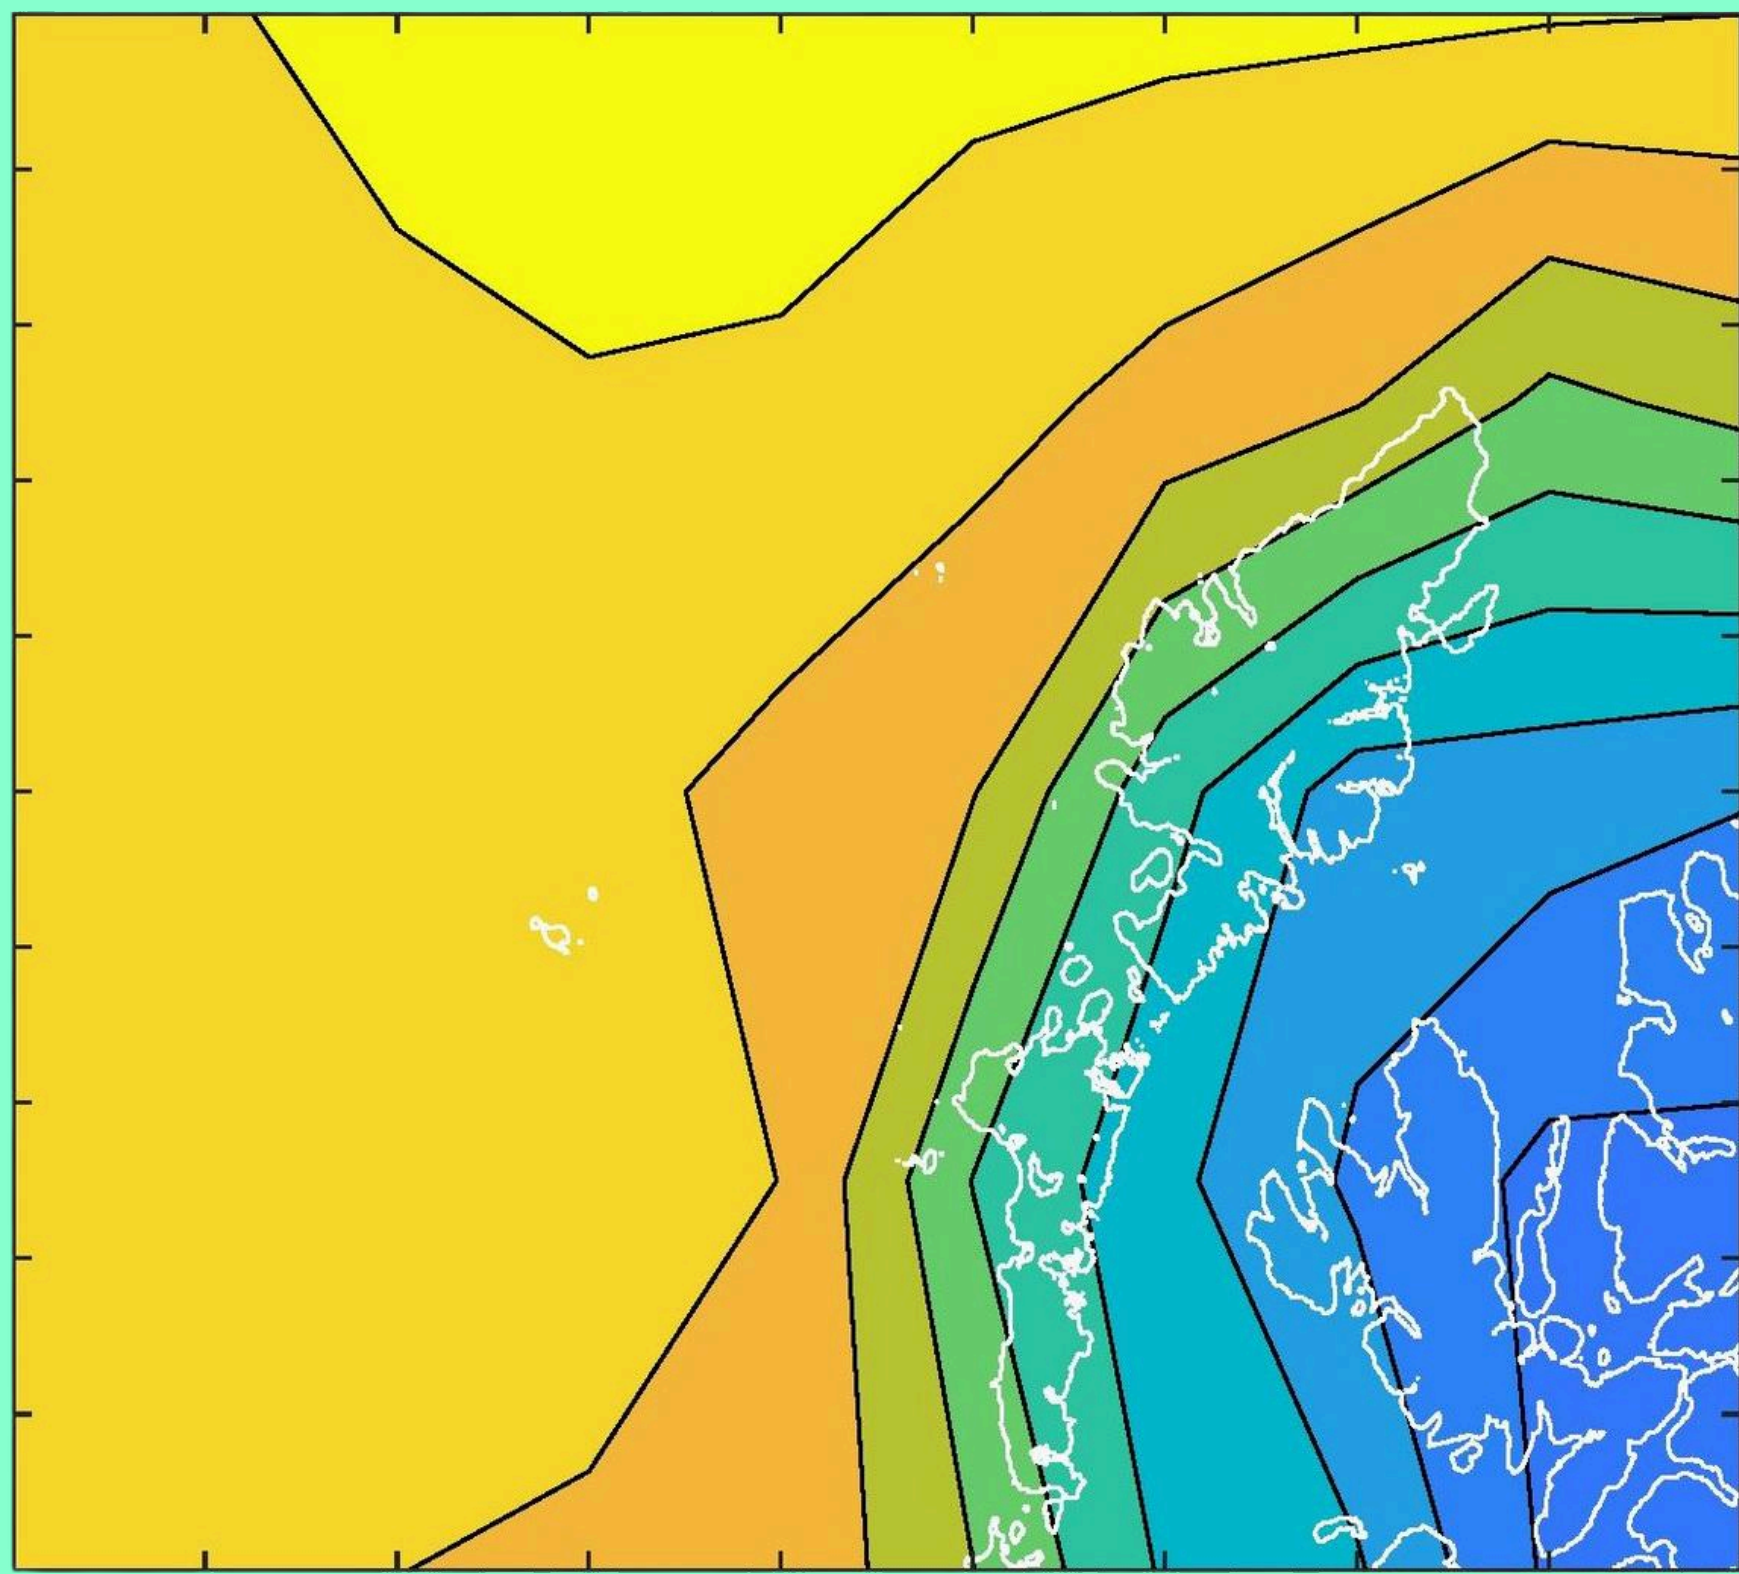

Long-term planning with precision.
