Agroforestry and forestry symbiosis

Dr. Jurata Buchovska

Lithuanian Research Centre for Agriculture and Forestry

This project has received funding from the European Union's Horizon Europe research and innovation programme, under Grant Agreement No 101059839

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Commission. Neither the European Union nor the granting authority can be held responsible for them.

Topic(s) addressed :

- HORIZON-CL6-2025-01-CIRCBIO-06: Indicators for the transition to sustainable and circular economy

Other topics of interest:

- HORIZON-CL6-2025-01-CIRCBIO-15: European partnership: Forests and Forestry for a Sustainable Future

Project idea

To develop agroforestry as a sustainable alternative to intensive farming.

Objectives:

1. Framework and implementation (practical level): Develop guidelines for the implementation of agroforestry at farm level (technical solutions, planting schemes, integration with livestock farming). Develop adapted agroforestry models for different soil, climate and farm types. Develop recommendations for tree and crop combinations according to ecological zones.
2. Environmental and climate benefits: Assess the carbon storage potential of tree biomass and soil. Monitor changes in biodiversity in agroforestry plots.
3. Economic-social impact: To study the economic efficiency of agroforestry (productivity, profitability, cost structure).

Main expertise offered

About me:

Dr. Jurata Buchovska

Scopus Author ID: 55437314100

ORCID: 0000-0001-8124-6181
