

Fungi and Plant -Derived Bioactives for Emergency and Therapeutic Nutrition

Ewa Zapora

natureTECH Centre for Natural Product Research
Bialystok University of Technology
Poland

This project has received funding from the European Union's Horizon Europe research and innovation programme, under Grant Agreement No 101059839

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Commission. Neither the European Union nor the granting authority can be held responsible for them.

Topic(s) addressed :

- **HORIZON -CL6-2025-02-FARM2FORK-17: Nutrition in emergency situations - Ready -to -use Supplementary Food (RUSF) and Ready -to -use Therapeutic Food (RUTF)**

Other topics of interest:

- HORIZON-CL6-2025-02-FARM2FORK-12: Nutrition and Mental Health
- HORIZON-CL6-2025-02-FARM2FORK-02: Additional activities for the European partnership on animal health and welfare

Project idea

WE PROPOSE the development and application of multifunctional bioactive fungal and plant bioactives derived both from natural ecosystems and organic farming systems

WE DO multidirectional screening strategies aimed at identifying novel compounds with antimicrobial, immunomodulatory, adaptogenic, and gut health-promoting effects

WE DEVELOPED products to support immunity, resilience, and overall well-being of both humans and animals

WE WANT TO design innovative, sustainable food, linking biodiversity, circular bioeconomy principles, and One Health objectives

The project aims to provide nature-based, future-proof solutions for food and nutrition security, animal welfare, mental, and metabolic health

Main expertise offered :

Role in project : **partner**

Team

Prof. Monika Kalinowska

Dr. Ewa Zapora

Prof. Sławomir Obidziński
