Your Business

Presentation of the Streamline
Technologies

Vienna, 2025

ABOUT *STREAMLINE*

At Streamline Technologies, we stand on three robust pillars, each contributing to our mission of driving digital transformation and innovation.

Platform.

Streamline Platform is a workflow solution with a fast, resource-efficient BPMN engine that reduces infrastructure costs. Thanks to integrated interfaces and advanced configuration, it increases developer productivity and enables early error detection.

The platform unites business departments and IT and offers efficient, collaborative process automation in a comprehensive system.

Technology.

Tailoring innovation to your needs, we excel in crafting individual software solutions. Our custom-made software development services are designed to address the unique requirements of businesses across various industries.

From conceptualization to execution, we ensure precision and effectiveness in every software solution we deliver.

Consulting.

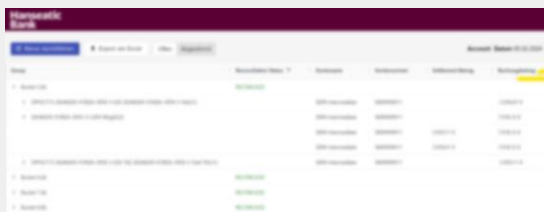

Streamline Technologies is your trusted partner for comprehensive IT consulting.

Specializing in management and technology consulting services, we cater predominantly to the financial services sector.

Our services span the spectrum from in-depth business analysis to efficient project and program management, ensuring optimal outcomes for our clients.

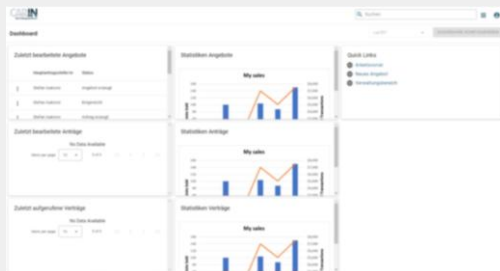

CUSTOM *PRODUCTS*

Account Reconciliation Tool

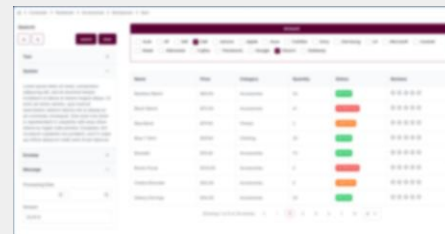

Our Account Reconciliation Tool simplifies and automates the reconciliation process, ensuring accuracy and efficiency. It matches transactions, identifies discrepancies, and provides detailed reports, reducing manual effort and the risk of errors. With real-time data synchronization, customizable rules, and a user-friendly interface, our tool enhances financial control and compliance, making reconciliation quick and reliable.

Insurance Brokerage Platform

Our Insurance Brokerage Platform streamlines the entire brokerage process, from policy management to claims handling. It offers a user-friendly interface for brokers to compare policies, generate quotes, and manage client information efficiently. With real-time analytics, automated workflows, and secure data handling, our platform enhances productivity and ensures compliance, empowering brokers to deliver exceptional service.

Data Archiving Solution

Our Data Archiving Solution helps organizations securely store and manage their data for long-term retention. By leveraging advanced compression and encryption techniques, our solution ensures data integrity and accessibility while reducing storage costs. Seamlessly integrating with existing systems, it offers automated archiving, easy retrieval, and compliance with regulatory requirements, making it an essential tool for efficient data management.

CUSTOM *PRODUCTS*

Enterprise Resource Planning (ERP)

Our Enterprise Resource Planning (ERP) solution integrates core business processes into a single, unified system. It streamlines operations across finance, human resources, supply chain, and more, providing real-time data and insights. With customizable modules, user-friendly dashboards, and advanced analytics, our ERP solution enhances efficiency, decision-making, and scalability, driving overall business growth and agility.

Invoice Management Platform

Our Invoice Management Platform, a specialized sub-module of our ERP solution, automates and streamlines the entire invoicing process. It ensures accuracy, reduces manual errors, and accelerates payment cycles. With features like automated invoice capture, approval workflows, and real-time tracking, our platform enhances efficiency, compliance, and cash flow management, making your financial operations more seamless and transparent.

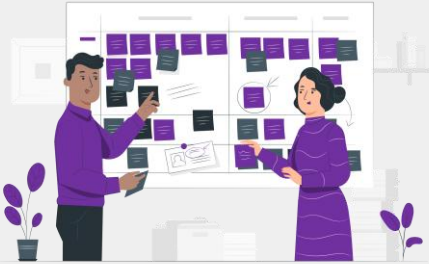

Hospital Management System

Our Hospital Management System is a comprehensive solution designed to enhance the efficiency and quality of healthcare services. It integrates various hospital functions, including patient registration, appointment scheduling, billing, medical records, and inventory management. The system improves patient care by providing real-time access to patient information, streamlining administrative processes, and ensuring accurate data management. With our Hospital Management System, healthcare providers can focus more on delivering exceptional patient care.

STREAMLINE CONSULTING

Program & Project Management

Our program and project management services ensure the successful delivery of complex initiatives from start to finish. We provide comprehensive support, including planning, execution, monitoring, and closure of projects. Our experienced consultants specialize in managing timelines, budgets, and resources, ensuring projects are completed on time and within scope. We focus on risk management, stakeholder communication, and quality assurance to deliver outstanding results and drive your strategic goals forward.

Business Analysis & Enterprise Architect

Our business analysis and enterprise architecture services help organizations align their strategies with their IT capabilities. Our expert consultants analyze business needs, define requirements, and design solutions that drive efficiency and innovation. We specialize in creating comprehensive enterprise architecture frameworks that support long-term growth and adaptability. By bridging the gap between business objectives and technological solutions, we ensure that your organization operates smoothly and is well-prepared for future challenges.

Software & Platform Engineers

Our custom software and platform engineering services are designed to create tailored solutions that meet your unique business needs. We specialize in developing scalable, high-performance software and platforms, leveraging the latest technologies and best practices. Our team works closely with you to understand your requirements, ensuring that the final product enhances efficiency, supports business growth, and provides a competitive edge. From initial concept to deployment and maintenance, we deliver robust, reliable, and user-friendly software solutions.
