

SeeYouDoc[®]
Innovating Healthcare

Want to bring your diagnostic technology to the Philippines? Partner with us.

Turnkey market access through AI-powered,
government-backed digital health platforms.

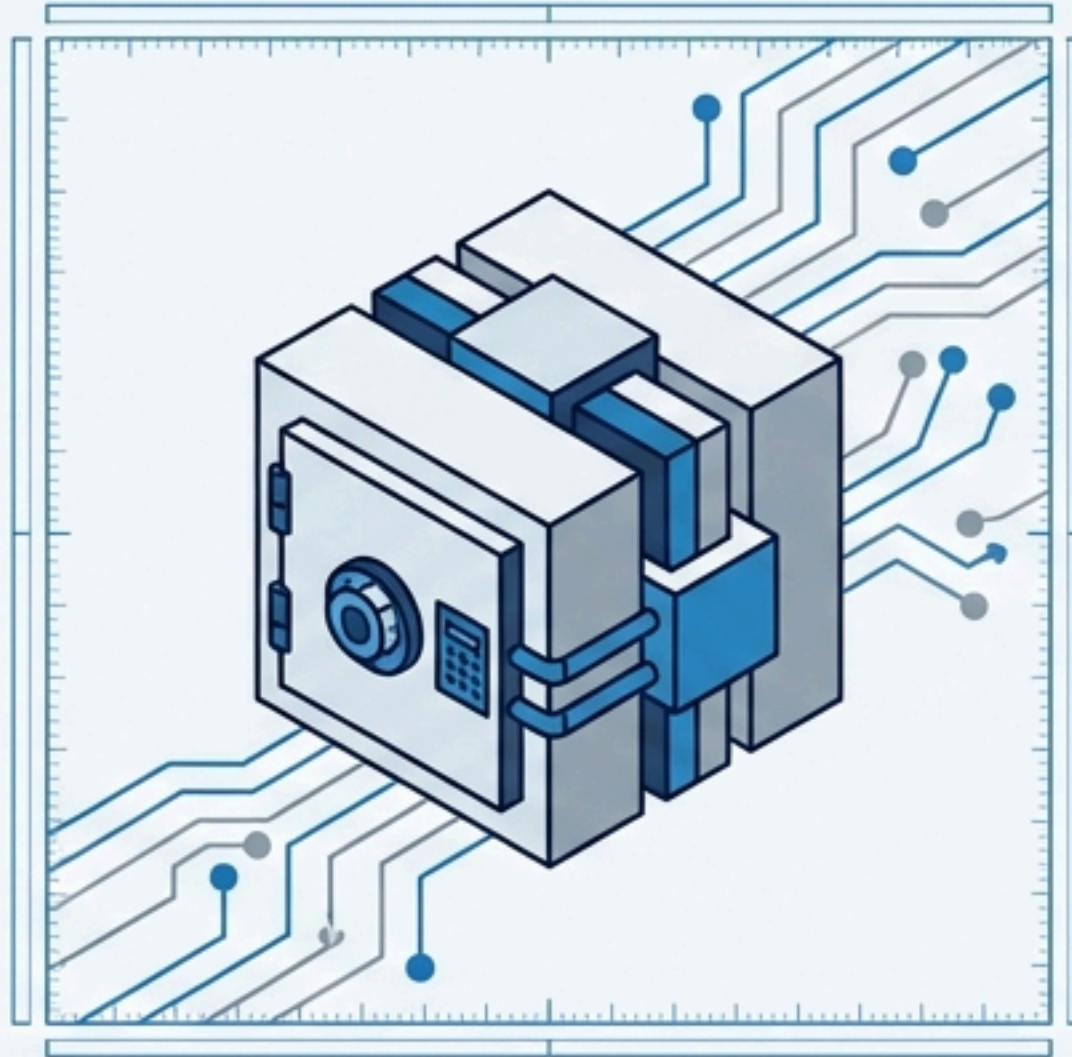

International Health Days 2026 — Vienna
March 24–25, 2026
www.seeyoudoc.com

Infrastructure Trusted by Global Health Systems

Global Implementations

Successful deployments with the WHO (Telemedicine within a Primary Care Provider Network) and USAID (Automated TB Care plan within a Healthcare Provider Network).

Protected Innovation

Patented Global Architecture covering multi-user orchestration of virtual care, EMRs, and fund disbursements. Backed by PCT filing (WO/2024/225920) and a Gold Winner at the Geneva International Exhibition of Inventions.

Data & Privacy Standards

Built for massive scale. Fully compliant with HL7® FHIR® standards, HIPAA, and registered for Data Privacy (DPO/DPS).

The Digital Healthcare Blueprint: Four Layers of Infrastructure

The Governance Wrap
The LGU digital governance platform, utilizing SeeYouDoc as its official healthcare layer.

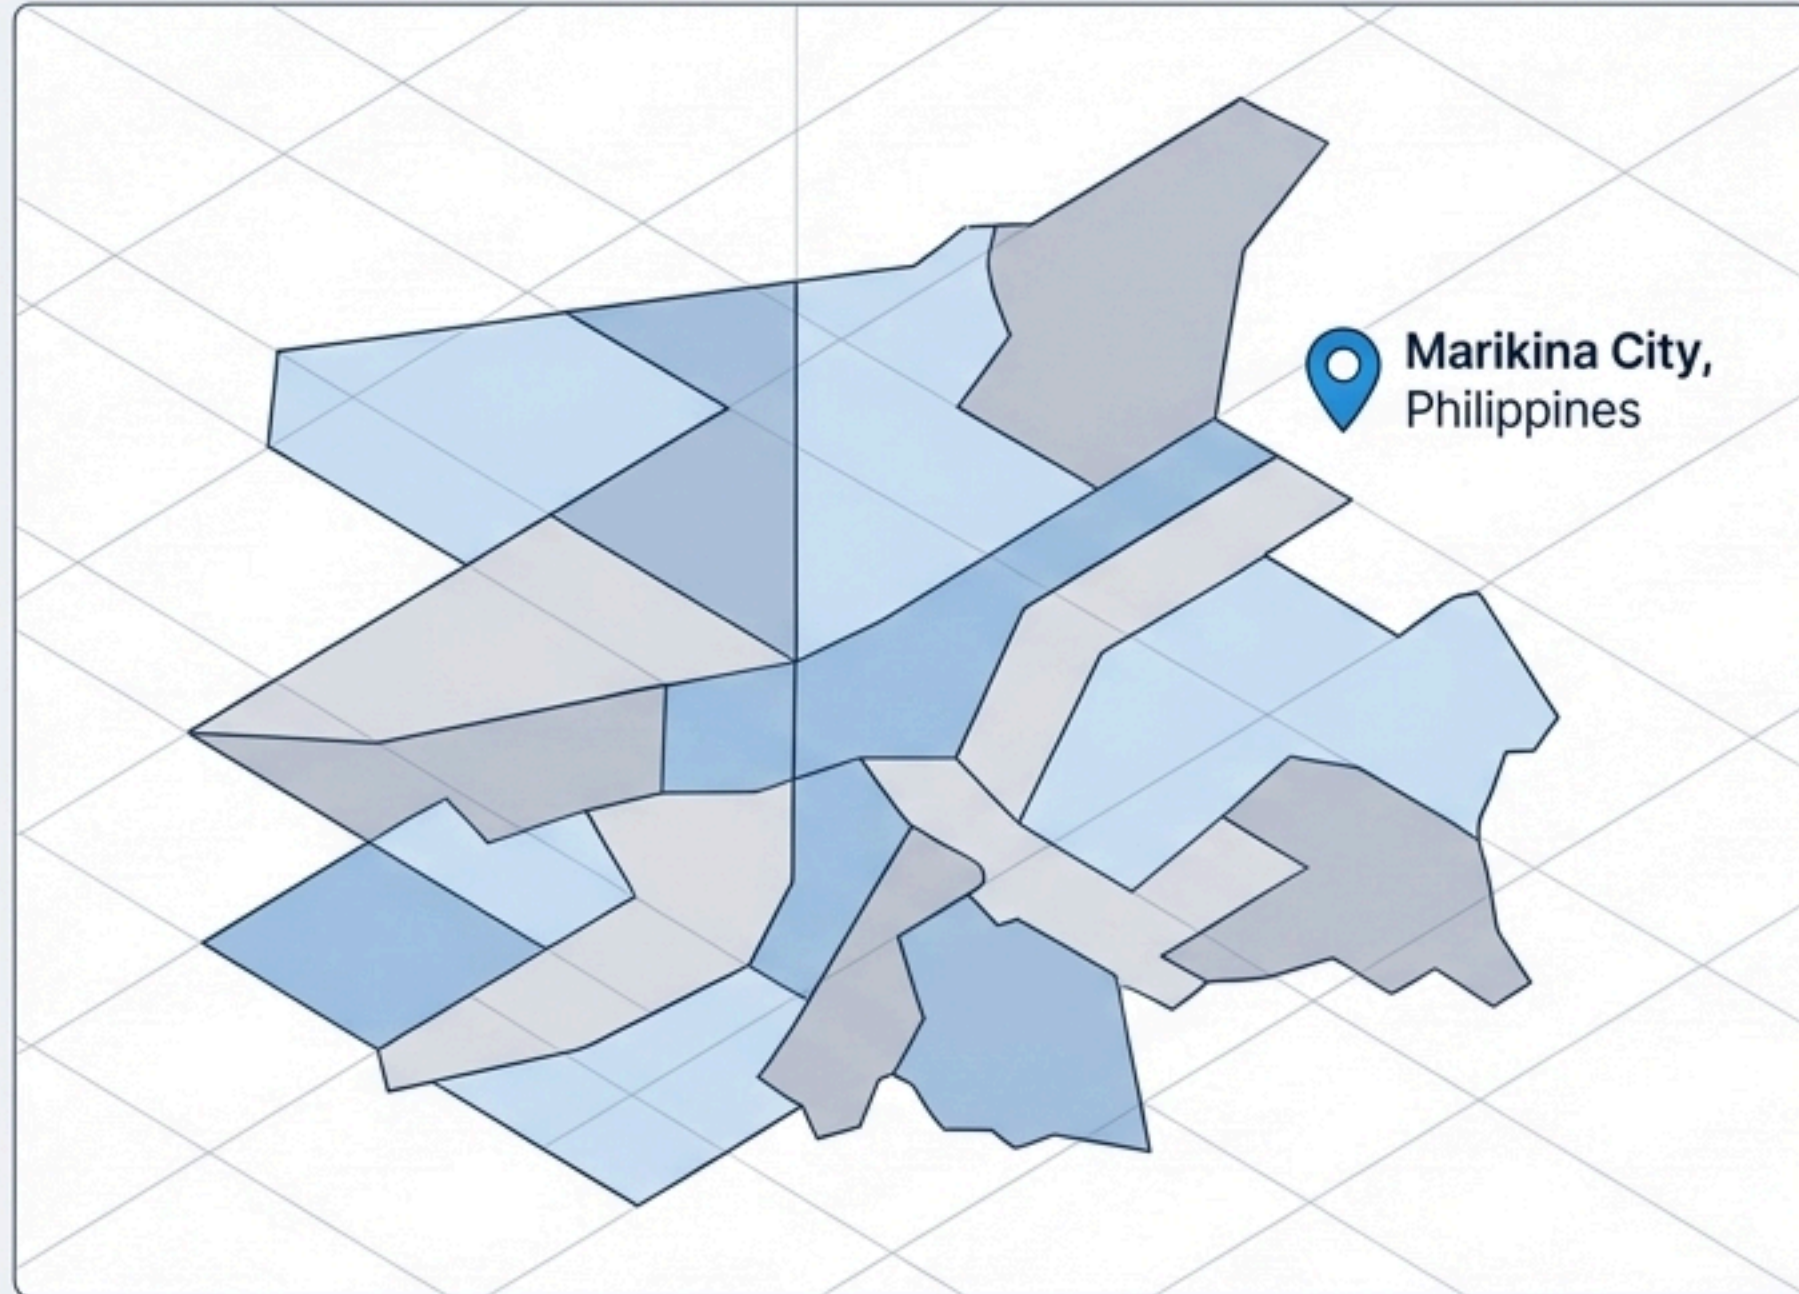

**UGNAY LHIE
(The Integration Web)**
FHIR-based Health Information Exchange connecting every facility across a region's network.

**SeeYouDoc Cloud EHR
(The Citizen Interface)**
Telemedicine, patient records, and clinic management accessed directly by citizens for free.

**LYANNA HIMS
(The Facility Engine)**
AI-powered hospital information system running health centers and field clinics.

First Major Rollout: 456,000 Citizens Going Live April 2026

The Mandate

Secured a 3-year government contract for total digital health transformation across 16 barangays.

The Model

Doctors deployed directly to remote areas with mobile connectivity and tablets, bringing care to the field.

The Urgency

Launching April 2026. Device integration begins immediately.

Contract Awarded

April 2026: Go Live & Field Deployment

We Build the Software. We Need Your Hardware.

Portable Vital Signs Monitors

Capturing BP, pulse oximetry, temp, and ECG.

Handheld Ultrasound

Point-of-care imaging for remote field use.

Digital Stethoscopes

Remote auscultation with audio streaming.

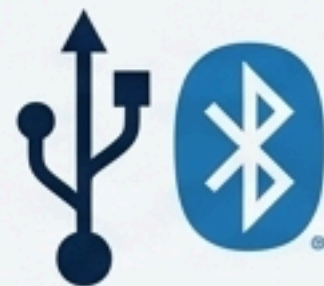

Point-of-Care Testing (POCT)

Rapid diagnostics for blood glucose and lipids.

Dermatoscopes & Ophthalmoscopes

Connected imaging for remote screening.

Your Technology

Any connected diagnostic device with an API ready for integration.

SeeYouDoc Cloud EHR & LYANNA HIMS

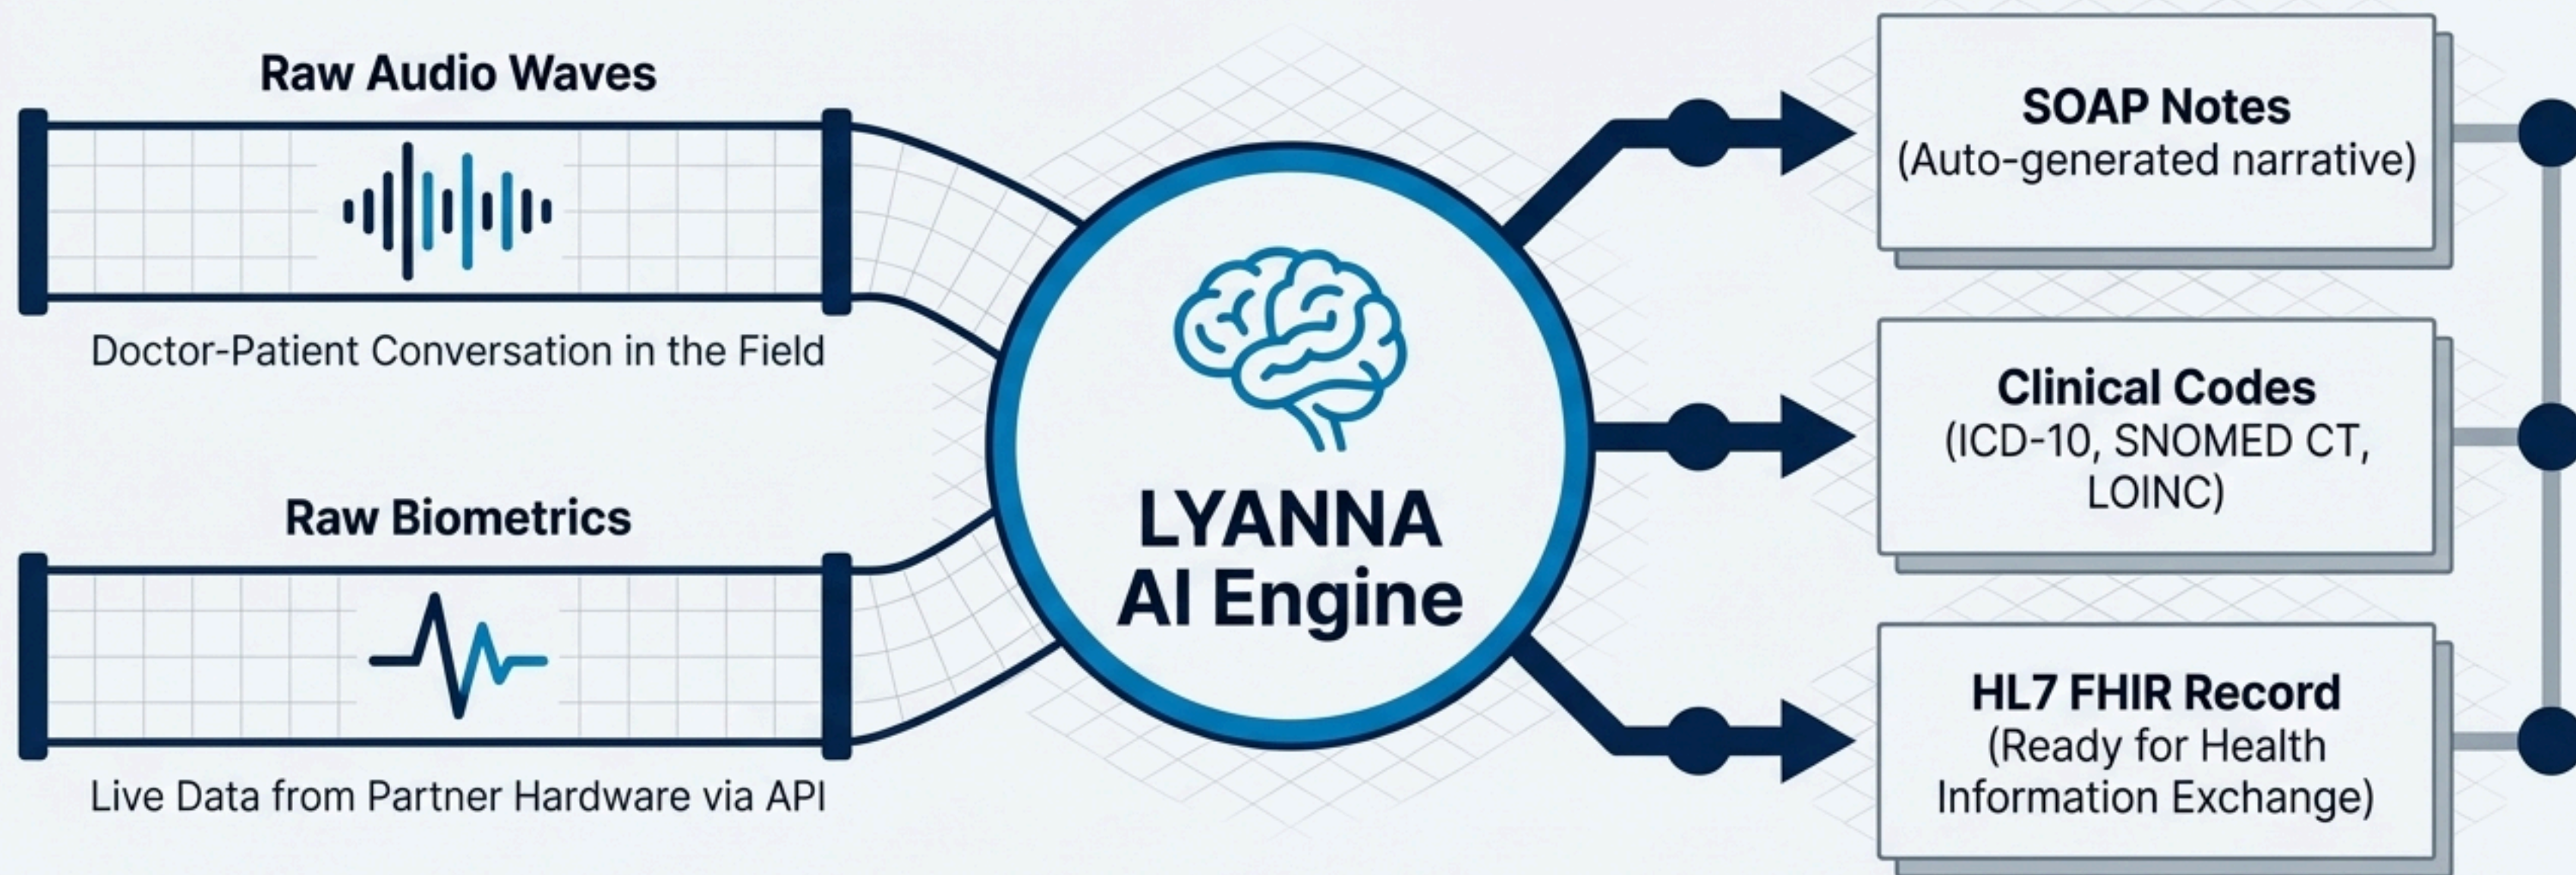

Centralized cloud platform for health data management.

Open Architecture. Plug In and Deploy in 4-8 Weeks.

Standard integration timeline for certified APIs: 4 to 8 weeks from sandbox to field deployment

The AI-Scribe: Transforming Hardware Data into Medical Intelligence

LYANNA's AI-Scribe fuses raw device telemetry with spoken consultation notes, instantly auto-generating standardized medical records. No manual data entry for field doctors.

Market Entry: The SeeYouDoc Partnership Matrix

	Traditional Philippine Entry	The SeeYouDoc Partnership
Sales Cycle	Slow, hospital-by-hospital cold calling and localized bureaucracy.	Instant access. We secure the government LGU contracts; you supply the hardware.
Funding & Budgets	Unpredictable facility-level procurement.	Government-backed. Funded by allocated LGU health budgets and DOST R&D grants.
Scale & Distribution	Fragmented, siloed deployments.	Captive volume. Marikina alone guarantees access to 456,000 citizens.
Revenue Model	One-off equipment sales.	Recurring volume. Every new LGU deployment triggers new automated hardware orders.

Integrate Once. Deploy Everywhere.

- **The Mandate:**

The Universal Health Care Act (RA 11223) legally mandates digital health infrastructure across 49 integration sites.

- **The Pipeline:**

2.27 Million citizens currently secured across 4 active LGU pipelines, heavily backed by DOST funding.

- **The National Vision:**

Invited by the Department of Health (DOH) to blueprint the national Health Information Exchange.

- **The Multiplier:**

A single FHIR R4 API integration with SeeYouDoc means your diagnostic hardware is instantly compatible with a government-funded pipeline scaling to millions of patients.

Let's Build Resilient Health Systems Together.

The SeeYouDoc Partnership Opportunity

Government-backed LGU deployments starting April 2026.

Frictionless API & FHIR R4 integration for diagnostic hardware.

Immediate distribution to 456K citizens, scaling to millions.
