The Time Is Now

Legal Requirements in the EU Are Becoming A Bureaucratic Monster for Obligated Companies

Omnibus

Global Supply Chain Key Figures

The Human Cost

1.4 billion: Workers globally laboring under inhumane conditions.

28 million: Estimated number of victims of forced labor and slavery.

160 million: Estimated number of child laborers worldwide.

12: Age of half of the child laborers.

The EU's consumption is responsible for 15% of the global deforestation linked to international trade.

Relevant EUDR Products: The regulation applies to seven key commodities and their derivatives, including cattle, cocoa, coffee, palm oil, rubber, soy, and wood.

Market Gap

Over 370,000
"operators" and
"traders" are directly
affected by the EUDR
regulation.

Targets have insufficient internal resources to comply with legal requirements

Manual compliance requires extensive due diligence, risk assessment, and intricate supply chain mapping.

Hiring consultants or implementing traditional software is prohibitively expensive for most SMEs.

The Smart Integrity Platform (SIP)

The End-to-End SaaS. Onboard New Clients In Only 7 minutes.

Proprietary AI Engine: Our core technology leverages advanced AI agents, RAG, and LLMs to understand and automate complex regulatory requirements, going far beyond simple data entry. **Blockchain** secures immutable data chains for incident management.

Unmatched Speed: Our ability to integrate with standard accounting system exports and automate key due diligence tasks allows for the fastest implementation on the market. This saves clients up to 70% of time, transforming compliance from a burden into a streamlined process.

Purpose-Built for SMEs: We offer a streamlined, intuitive user experience at an affordable price, ensuring that the cost of compliance no longer serves as a barrier for small businesses.

- Risk Management (all modules)
- Whistleblowing Management (Whisper)
- Complaint Management (GPSR/CSDDD)
- Data Protection and Security (GDPR)
- Third Party Due Diligence (TPDD/EUDR/CSDDD/AML)
- Compliance/Due Diligence Reporting
- Deforestation Risk Management and Due Diligence (EUDR)

Product Roadmap 2026:

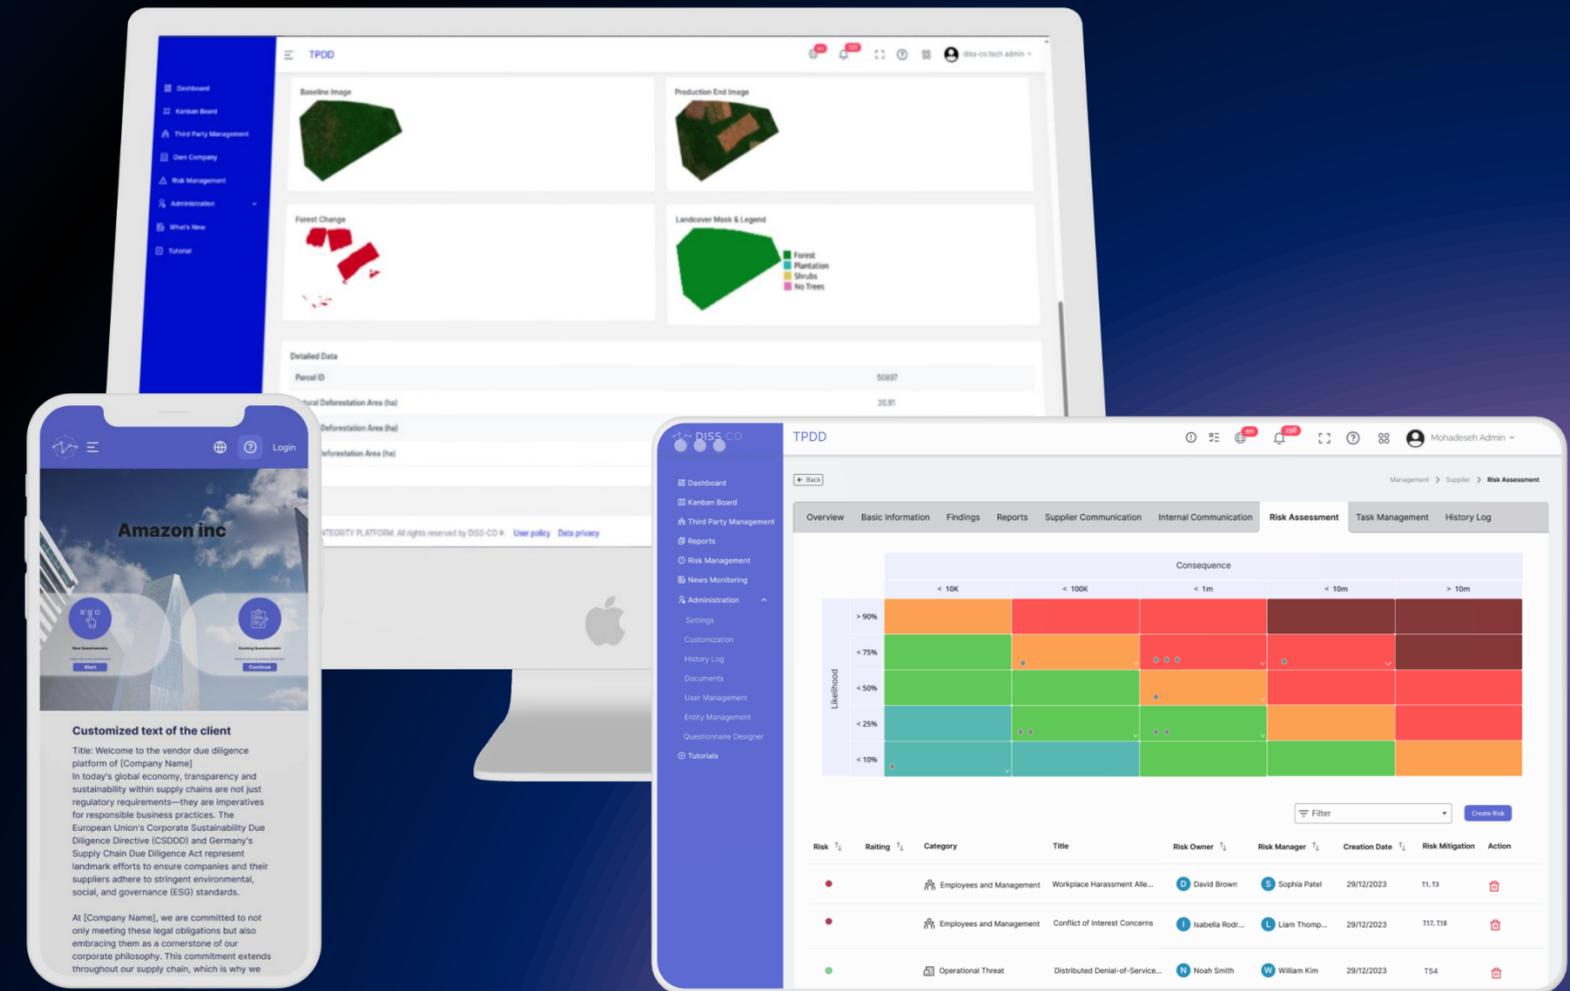

- ESG / VSME /CSRD Reporting

Factuality, Speed and Faithfulness

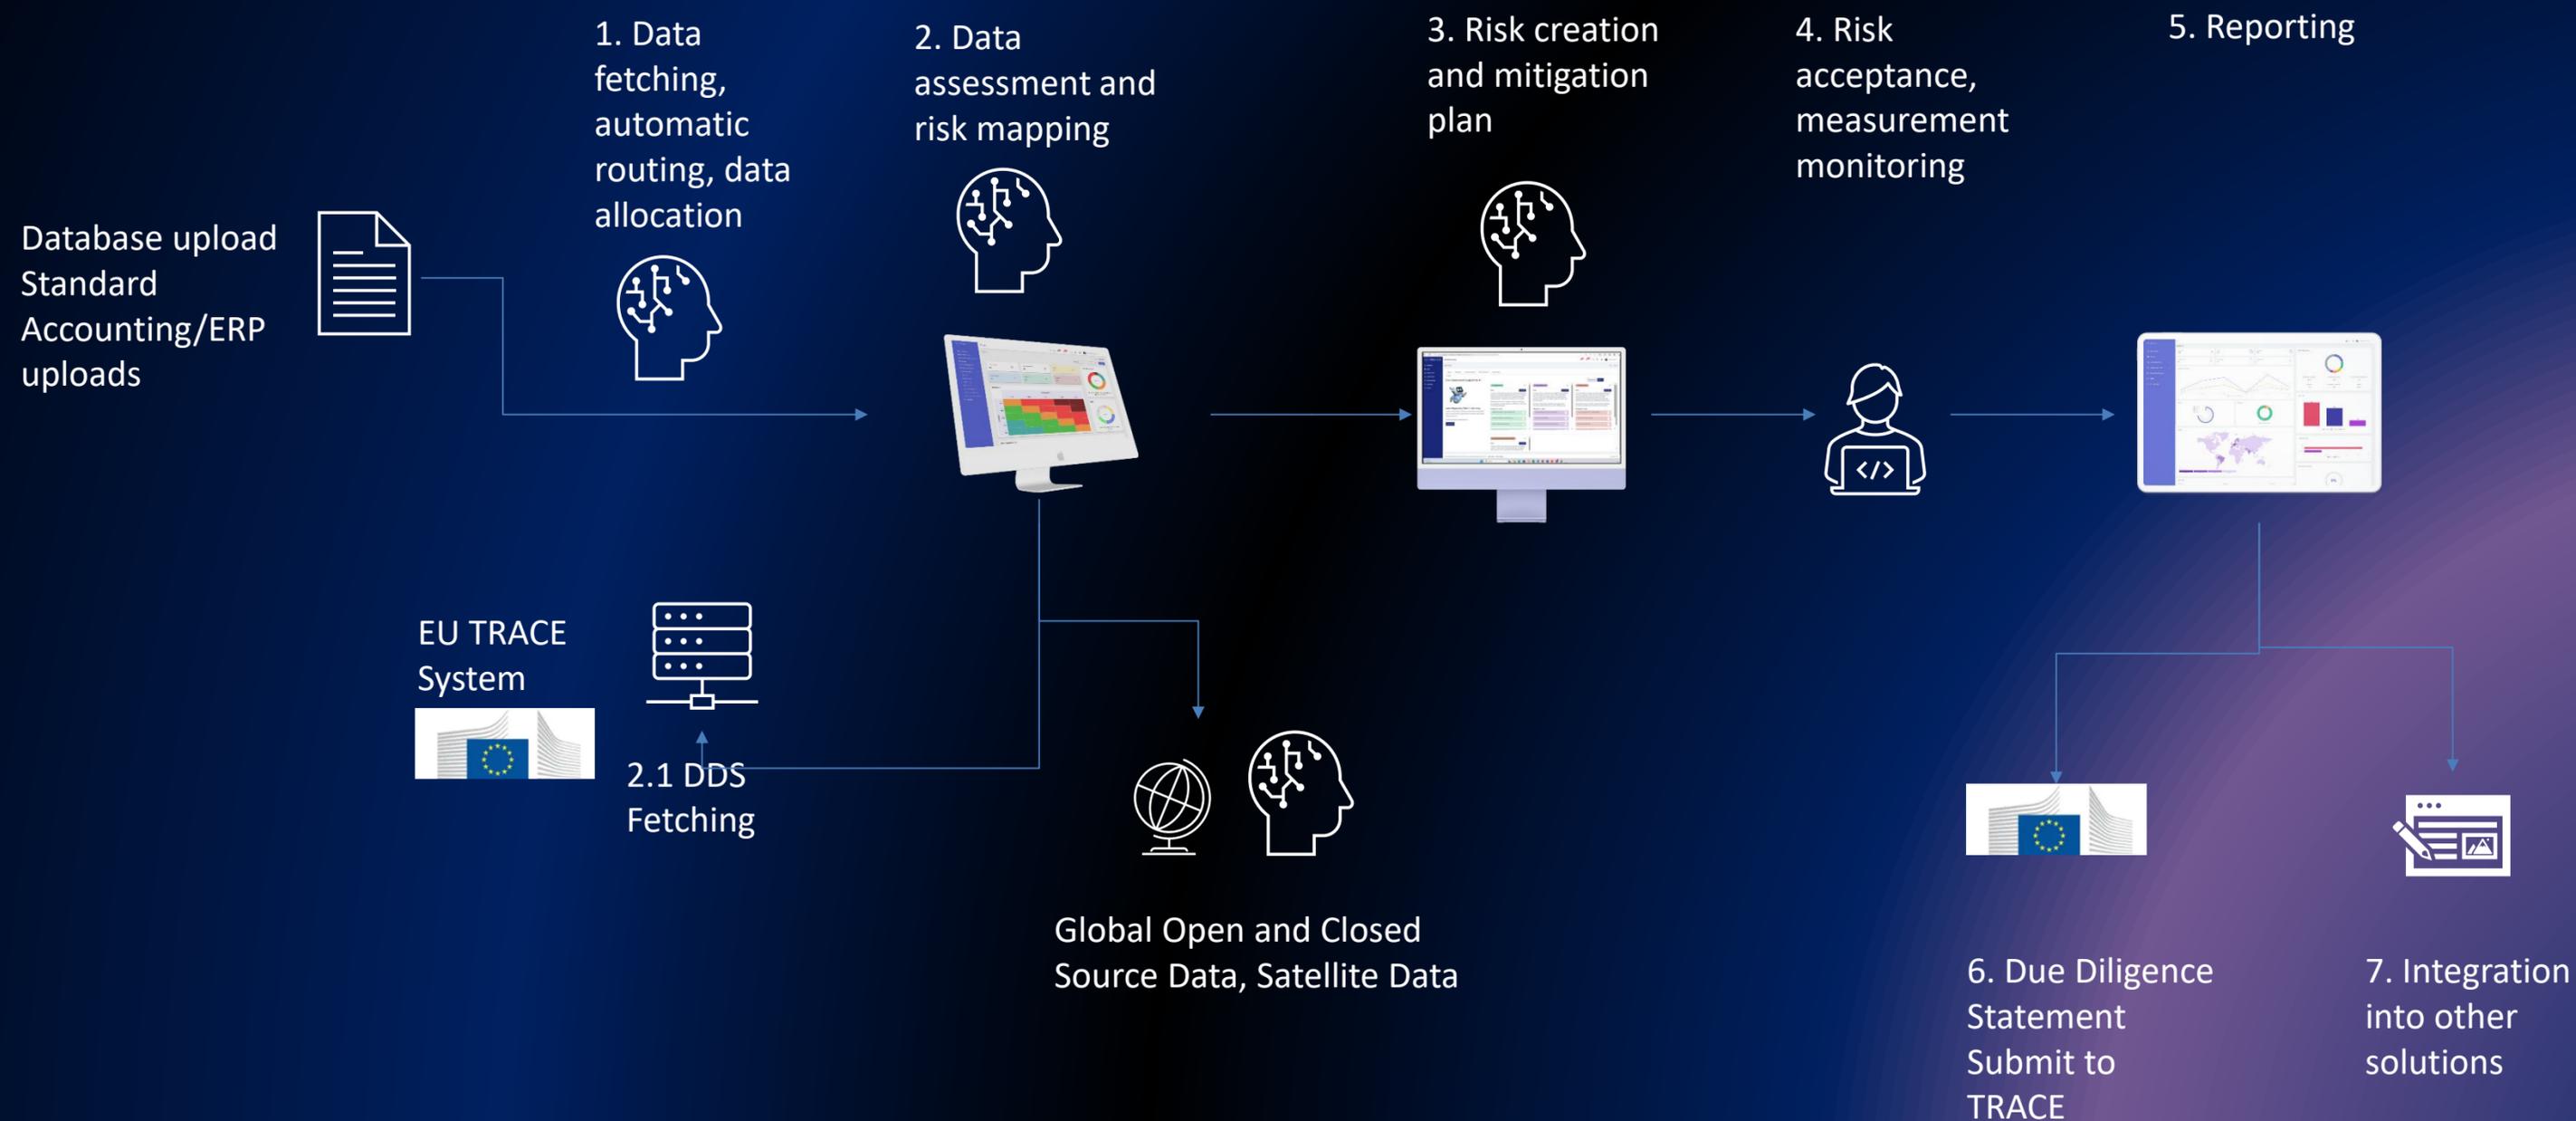

DISS-CO's AI delivers trust

- ✓ **Automated Workflows:** Our AI agents use data from different sources, e.g. company data and standard reports, consolidate, connect and enriches them by closed and open source data to conduct due diligence, risk assessment and create relevant risks and mitigation tasks
- ✓ **Accurate results:** Our LLM validates and evaluates data sources from web, news, social media and databases according to a scoring model designed by our compliance experts
- ✓ **Up-to-date scoring:** It is trained to score third-parties using a complex set of data from the company, from the third-party and publicly available data
- ✓ **Finetuning:** It can be easily trained by using the company data
- **Timesaving:** Our AI models delivers better results in a fraction of the time compared to manual searches and traditional validation and scoring methods

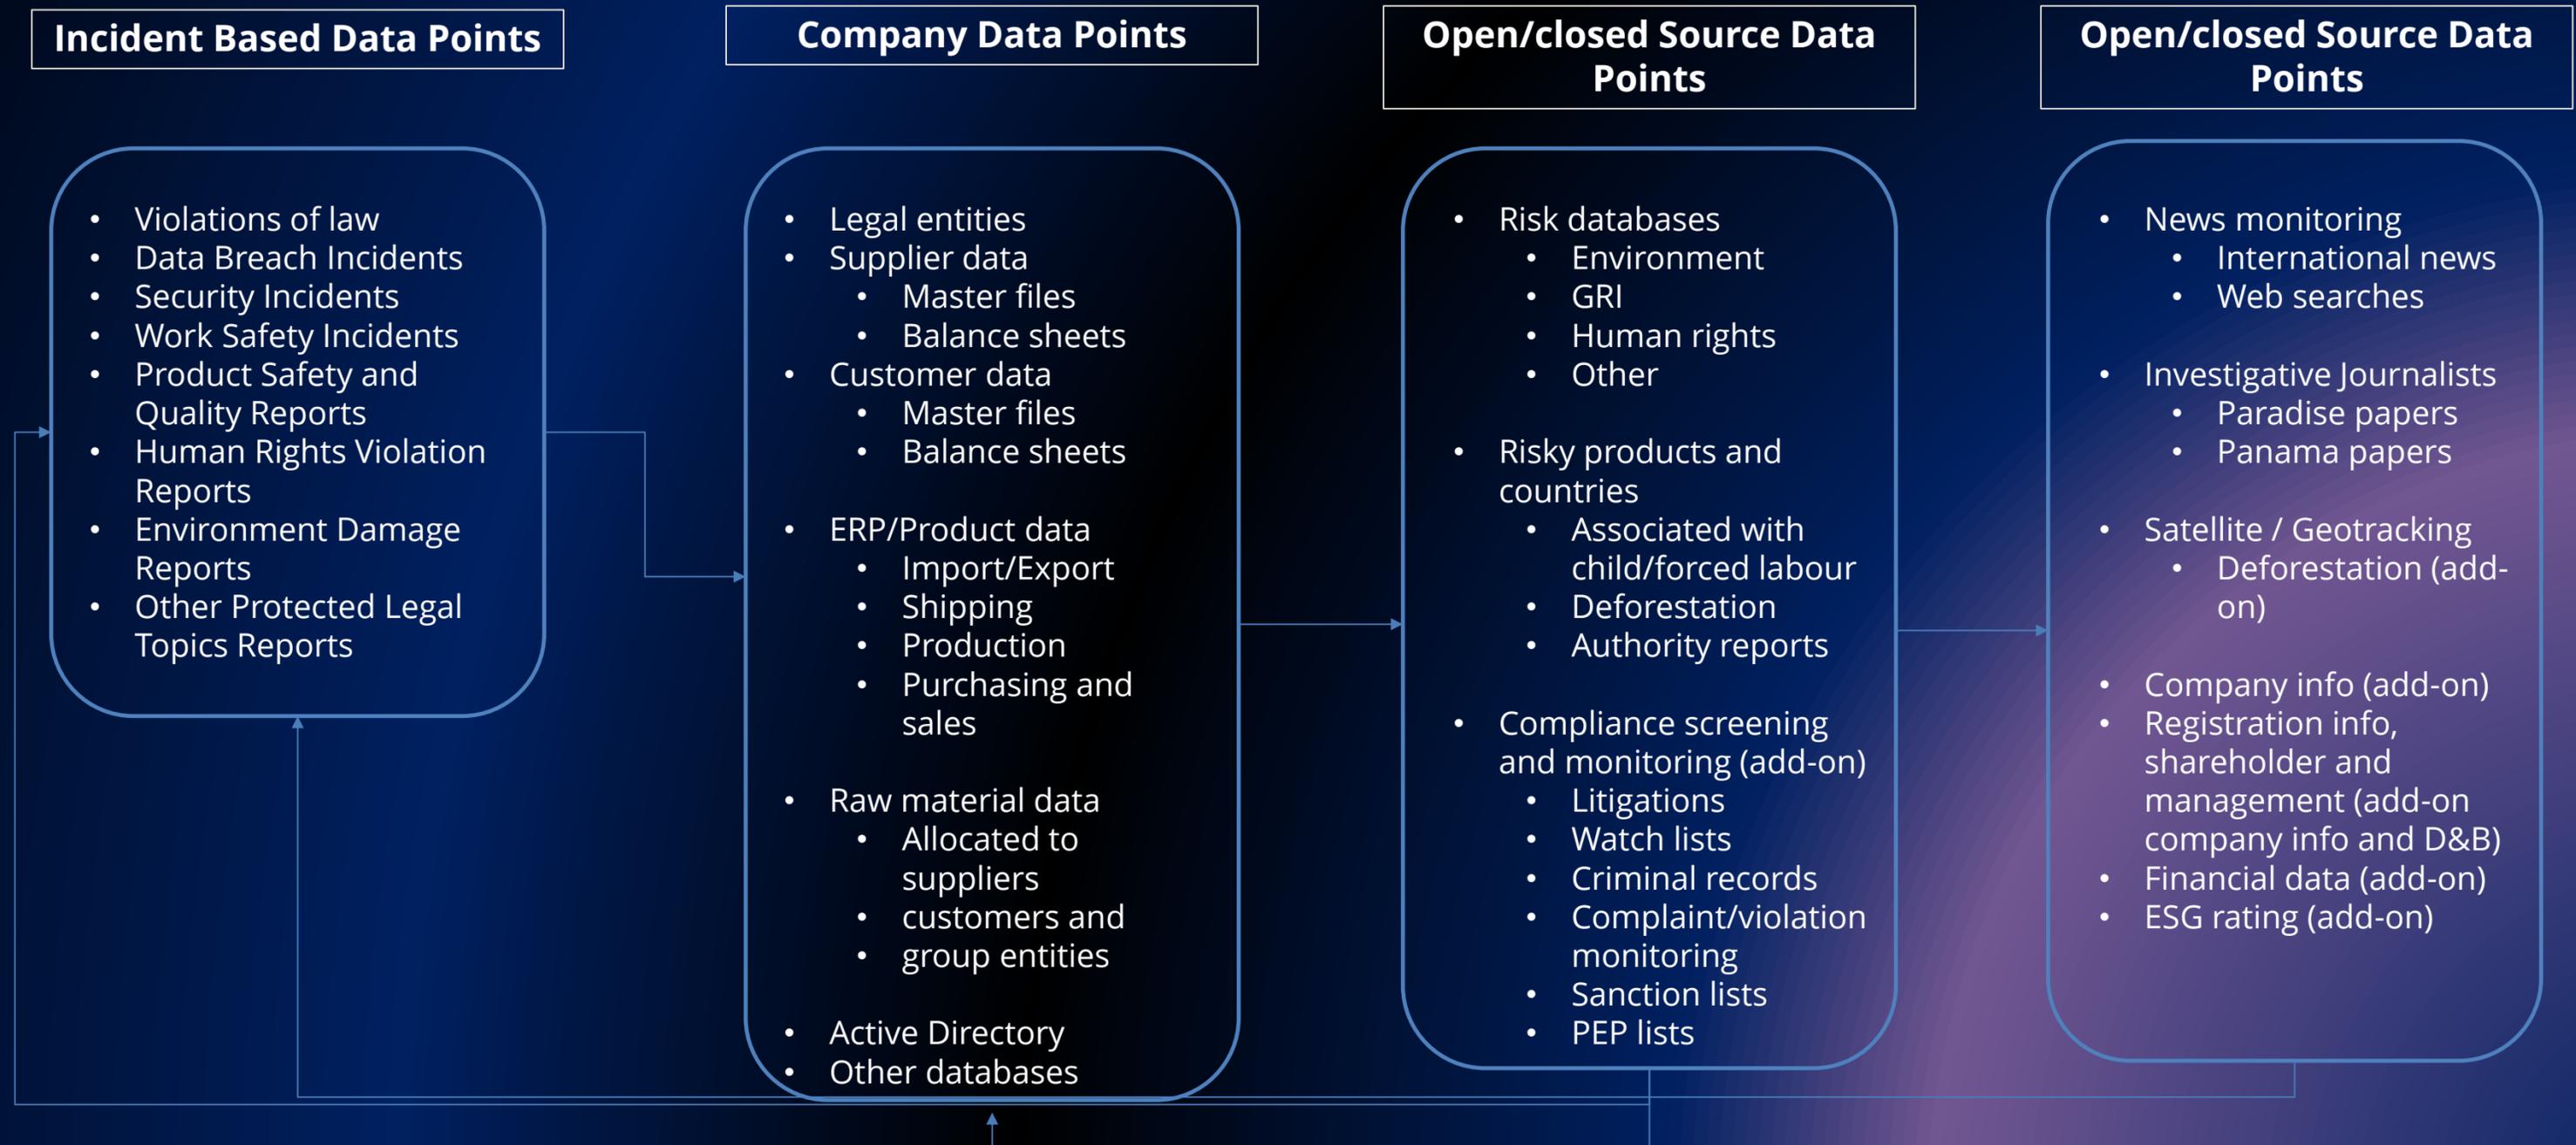

Basic Process Description

Data Collection to Reporting – Simplified View

Modular Interacting System

Modules Feeding Each Other With Data

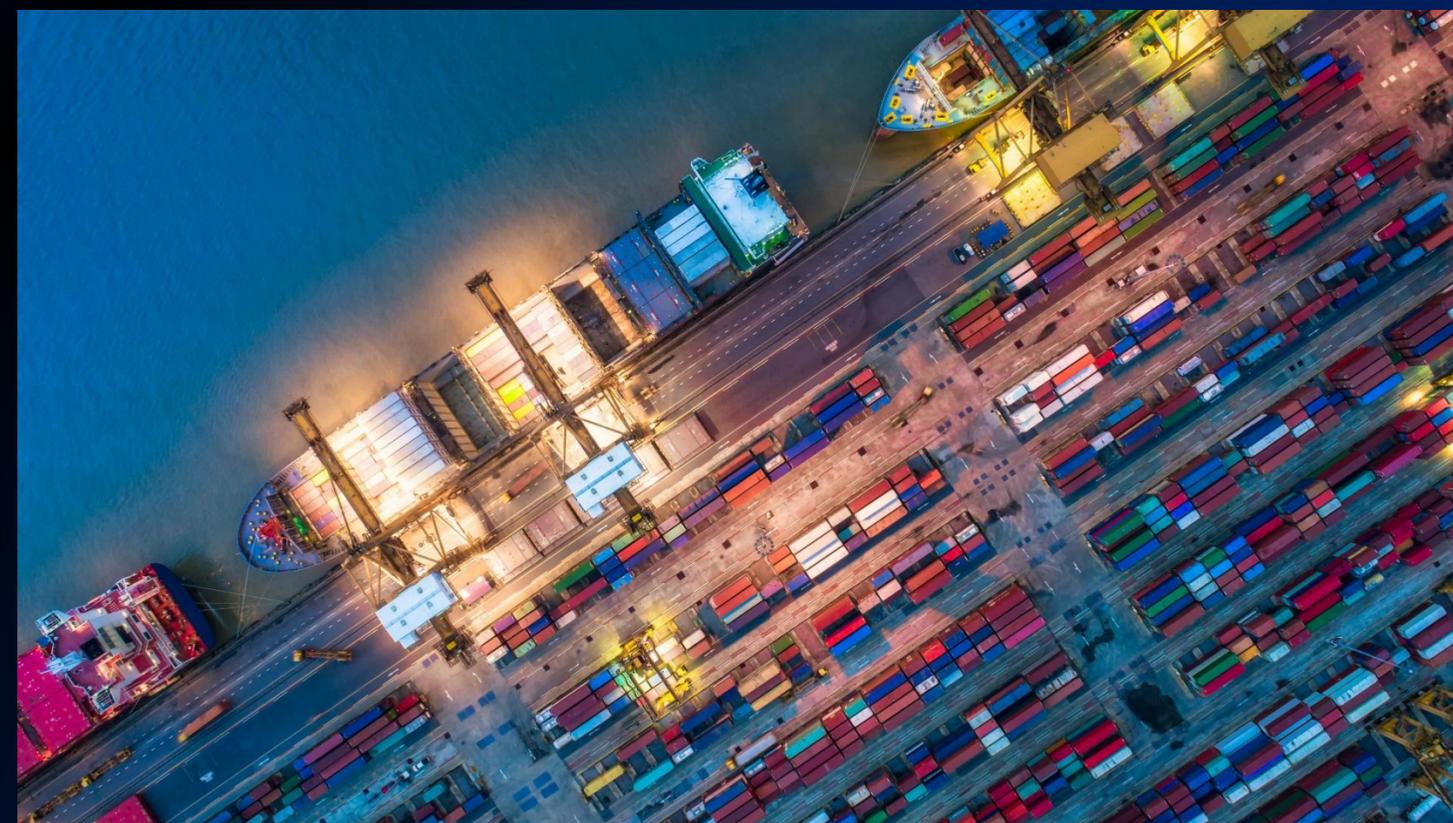

Our Use Cases

DISS-CO's Supplier Monitoring and Risk Management SaaS

Real-Time Contextual Relevance

- DISS-CO's integration of real-time insights ensures that responses are grounded in the most current, domain-specific data. This makes it particularly effective for applications requiring specialized knowledge.
- The system can identify potential disruptions early on by analyzing real-time data from different sources like news, closed and open sources, web on supplier operations, logistics, and geopolitical events.
- This system provides an enhanced view into risks.
- At the same time, the customer can use the AI based mitigation plans to see what measures can be taken to mitigate and operational and financial risks for the company
