

Who we are

CARE1 is a European multidisciplinary cancer research consortium uniting patients, clinicians, researchers, and innovators to accelerate evidence generation and improve personalized cancer care.

What we are working on

We are generating real-world and clinical evidence through an international platform combining clinical trials, translational research, imaging, biomarkers, and patient-centered outcomes.

What's the one thing we need next

High-quality, harmonized longitudinal data and biospecimens to uncover predictive biomarkers, validate innovative methodologies, and translate discoveries into clinical impact faster.

**5 years Mission Cancer:
Stronger Through Connection**
