

The background features a dark blue gradient with a white wireframe landscape of rolling hills and mountains. On the left side, there is a white wireframe silhouette of a person wearing a hard hat and holding a tablet. A solid red rectangular box is positioned in the lower-left quadrant, containing the main text.

About us

+800 Professionals

50% of them
dedicated to
engineering

3 Continents

Facilities and offices
to operate globally

14 Countries

We offer proximity
and quality to our
customers.

Airtificial Intelligence Structures is a leading international company in innovative technological solutions for design and manufacturing in the automotive, aerospace, and infrastructure industries.

**“We drive the future with innovation,
precision, and sustainability.”**

International Presence

Airtificial Group operates in 14 countries.

Facilities in Mexico, Poland, China and India and permanent delegations in Peru, Colombia, Ecuador, Bolivia, Honduras, El Salvador and the Dominican Republic.

-  Manufacturing Plant
-  Offices
-  I+D Center
-  Technical Engineering Office
-  Aerospace Division

- Jerez de la Frontera 
- Puerto de Santa Maria 
- Tecnobahía, Cadiz 

LINES OF BUSINESS

Intelligent Robots

Focuses on the design and integration of cutting-edge technology on assembly, test and trial lines (steering systems, seats and mechanisms, safety systems, braking systems, transmission and electrical/electronic units) Incorporating proprietary and unique solutions, such as artificial vision or collaborative robotics

A global benchmark, offering international and ad hoc value to our customers.

Capable of integrating disruptive technologies such as collaborative robotics and computer vision

Inypsa Infrastructures

The Group's engineering and consultancy business line, focuses its activity on the following areas: Civil Engineering in all its phases, from planning to design, supervision and project management. It has more than 50 years of national and international experience and a strong presence in Latin America

Founded in 1970, carrying out engineering work in more than ninety countries in Europe, America, Africa and Asia

International presence for 20 years in the Water, Energy and Transport sectors

Aerospace & Defense

The division is specialized in the manufacture of composite parts, sensorized structures, engineering services and development of systems and robots for aircraft and other means of transport, being one of the main TIER 2 worldwide, and a fundamental player in the production line at Airbus

Consolidated business with growth expectations thanks to the recurrence of L/P programs for the entire service life of the aircraft.

2 Inypsa CW Infrastructures

LINES OF BUSINESS

INYPsa CW INFRASTRUCTURES

Inypsa CW Infrastructures provides engineering and consulting services, focusing its activity in the areas of: **Water Engineering, Transport and Environment.**

Our diversification allows us to provide global Engineering services:

- ✓ Basic and implementation projects
- ✓ Construction Supervision
- ✓ Operations & Maintenance
- ✓ Environmental Impact Studies
- ✓ Informative Studies
- ✓ Due Diligence

3 Water and Water Infrastructure

A BENCHMARK IN THE MANAGEMENT, PLANNING AND DEVELOPMENT OF LARGE HYDRAULIC INFRASTRUCTURES.

Preliminary feasibility and planning studies and hydrology.

Designs and Supervision of works of:

- Drinking water supply
- Sanitation
- Treatment and purification
- Desalination
- Dams
- River channeling
- Irrigation
- Hydroelectric power plants

Operation and maintenance of large infrastructures

RELEVANT DATA

+100 millions
m³ of treated wastewater per day

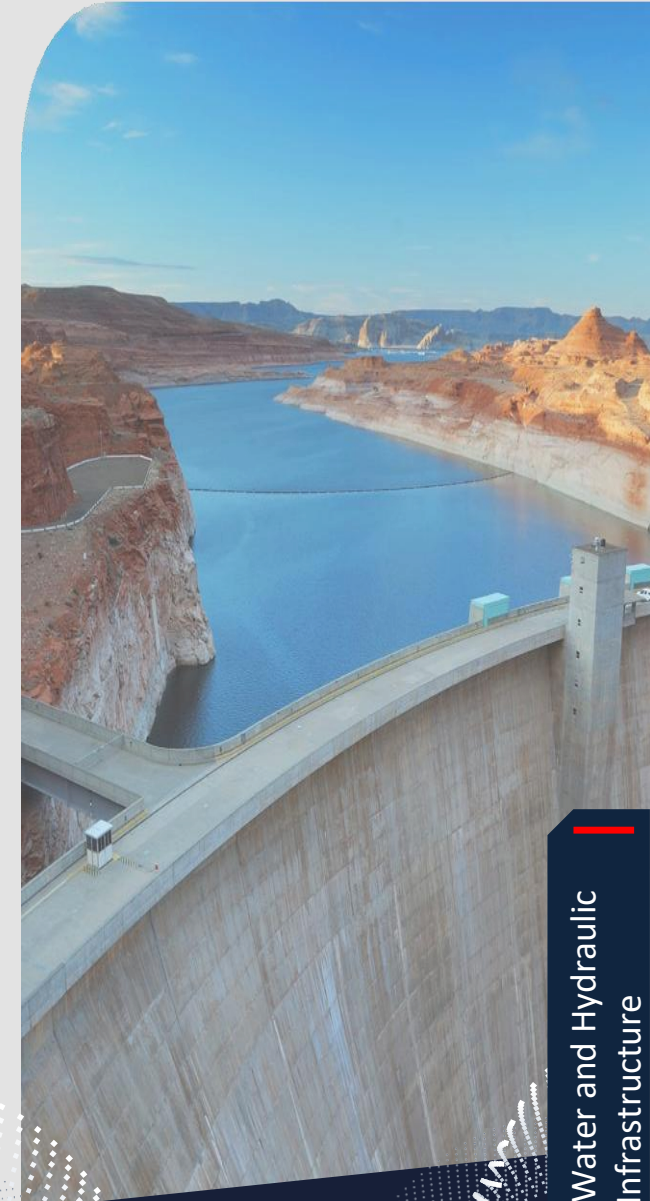

+8000
discharge authorizations at treatment facilities

+1650 km
of drinking water distribution networks

+100
studies, designs, and/or supervision of dams
+100 MW
Engineering for the construction of hydroelectric
power plants

Spain

- Aguilas Desalination Plant
- Campo Dalías Desalination Plant
- Field Desalination Plant of Cartagena
- Foix Desalination Plant

- Ourense Water Supply, Xunqueira Dam
- Supply around the Alange Dam
- Alto Bierzo Water Supply
- Supply around the Alange Dam

- Explotation dossiers in the Andalusian Basin
- Alto Duero Demarcation (Soria)
- Felling and Demarcation of the Tajuña River
- Defense Against Marina Alta Avenues

- Plasencia Sanitation and Purification
- Sanitation of the Alt Maresme
- Calatayud WWTP
- Exploitation of the WWTPs in Madrid

- Casares de Arbás Dam, León
- Tous Dam
- Campo de Gibraltar Dams
- Irueña Dam
- Dam of Conde de Guadalhorce
- Arroyo Regajo Dam (La Rioja)
- Aguayo II Reversible Power Plant
- Laverné Reservoir
- Peñarroya Reservoir
- Villaveta and Monreal Dams

- Canal Segarra-Garrigues
- Canal Navarra,
- Canal Villalaco
- Irrigation of the Babilafuente Canal
- Records of water uses of Alberca Duero

📍 CENTRAL AMERICA

📍 México

- Supervision of Ex-Lake Texcoco hydraulic projects.
- Monterrey VI Aqueduct Project Review

📍 Guatemala

- Lake Amatitlán Master Plan

📍 Honduras

- Supervision of supply and sanitation in the city of La Paz
- Design of drinking water supply from the Nacome reservoir
- Design review and supervision, supply works to Santa Rita.
- Integrated management of the Goascorán river basin.

📍 Nicaragua

- Governance of the Lake Cocibolca Basin

📍 DOMINICAN REPUBLIC

- Engineering and Supervision of the Boca de Los Rios Dam on the Guayubin River
- Construction of the Ozama wastewater treatment plant
- Verification of the Montegrande Dam.

📍 Costa Rica

- Preliminary Project for the Supply of the San Ramon and Palmares Aqueduct

📍 El Salvador

- El Paisnal irrigation supervisión
- Supervision of the pluvial macrodrainage San Salvador
- Pre-feasibility of Playa el Zonte water treatment plant
- Drinking water design Julupito and El Palmar
- Supervision of sewage system in Barrio Candelaria
- Nejapa WWTP project and work

📍 SOUTH AMERICA

📍 Peru

- Solutions to flooding of the Rimac River
- Supervision of drinking water and sewerage in Santa Rosa
- Design of the Atarjea wastewater treatment plant
- Zarumilla sewerage system and wastewater treatment plant
- Integral Consultancy Wastewater Treatment System Lake Titicaca
- Basin Study of submarine outfalls for brine effluents from the refinery.
- Detailed engineering for Asana, Charaque and Cocotea streams.
- Expansion of drinking water and sewerage system Nueva Rinconada
- Design of river defences for the Lacramarca river.
- Supervision of Pachacutec Prta works
- Supervision of works in Vulnerable Valleys Integral
- Comprehensive flood plan and Piura drainage master plan
- Casma River Basin Flood Plan
- Flood plan for the Mala River Basin
- Surco and Huatica canal recovery plan
- Safety study of the Tinajones, Gallito Ciego and San Lorenzo dams

📍 Bolivia

- Bolivia's surface water balance
- Cochabamba Tropic Flood Study
- Feasibility of supplying Sucre
- Supervision of works at the La Paz dam (Hampaturi Alto)
- Supervision of the Chimoré Fish Farm
- Supervision of adduction Jove Rancho
- Supervision, works multipurpose project Batallas and El Alto.
- Supervision of the C.H. Rositas project
- C.H. Blue Band Project

📍 Argentina, Paraguay, Bolivia

- Pilcomayo Basin Master Plan

📍 Ecuador

- Supplies design Coca, Joya de los Sachas and Loreto.
- Supervision of Latacunga works

📍 Colombia

- Supervision of the San Silvestre wastewater treatment plant. Barrancabermeja
- Girardot Master Plan desing
- El Salitre plant management, design and construction
- Fluvial studies in the upper basin of the Bogotá River
- Auditing, design and construction of Francisco Wiesner Plant
- Supervision of Supply and Sanitation Caribbean Zone
- Auditing design of the navigable canal Puerto Leticia
- Watershed Management Plans (POMCAS) 7 contracts.
- Chingaza system risk management plan

📍 Uruguay

- Uruguay's Hydrological Plan

📍 Brasil

5 Renewable Energy

RELEVANT DATA

- ❖ INYPSA CW is an Independent Power Producer (IPP) that designs, develops, promotes, builds, and operates renewable energy generation plants, primarily from wind and solar sources.
- ❖ More than 20 years of experience in the renewable energy sector, covering all phases of the project.
- ❖ Its objective is the development, promotion, construction, and operation of renewable energy generation plants.

Over 300 MW of wind power in Spain
100 MW of photovoltaic power in Spain
More than 19 MW of photovoltaic power for third parties.

A 6.3 MW photovoltaic plant in El Salvador.

Country : EL SALVADOR

CONSTRUCTION AND COMMISSIONING OF A 6.32 MW PHOTOVOLTAIC PLANT AT THE SAN LUIS TALPA INTERNATIONAL AIRPORT IN EL SALVADOR

CONTRACT TYPE: PPA (Power Procurement Agreement) + EPC (Engineering, Procurement and Construction)

CONTRACT VALUE: €7,800,000

INVESTMENT: € 7,800,000

CLIENT: ECO-ENERGY

WORK PERFORMED:

- Procurement, engineering, procurement, promotion and construction (EPC)
- The project consists of the procurement, engineering, supply, construction and commissioning of a 6.32 MW photovoltaic park with tracking technology to an axis
- Off-taker: El Salvador International Airport, through a 20-year PPA contract.

Country : SPAIN

CLIENT ENGINEERING SERVICES FOR THE EL BERCIAL THERMOSOLAR PLANT, TOLEDO

CONTRACT TYPE: Basic Project

CONTRACT VALUE: €151,000

INVESTMENT: €200,000,000

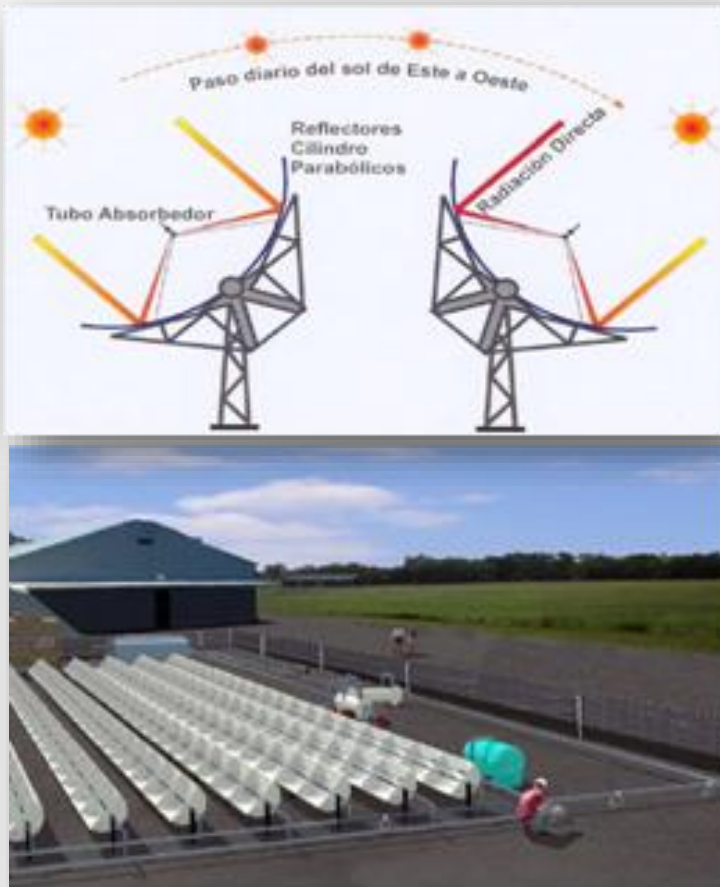

CLIENT: ESBAL (EXPLOT.SOL.EL BERCIAL SL.)

WORK PERFORMED:

- The purpose of the project is to provide client engineering services for the Solar Thermal Power Plant with a parabolic trough system and a capacity of 49.9 MW. It will be equipped with 156 energy capture and concentration units (624 collectors).
- Includes feasibility study, conceptual design, basic engineering, technical, and administrative management.

Country :SPAIN

BASIC PROJECT FOR A 250 KW MICRO THERMOELECTRIC SOLAR PLANT IN CORIA, CÁCERES

CONTRACT TYPE: Basic Project

CONTRACT VALUE: €20,000

INVESTMENT: €1,200,000

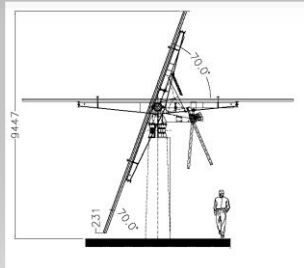

CLIENT: Instituto E.R.-Solar Extremadura, S.L

WORK PERFORMED:

- The purpose of this project is to provide documentation support for obtaining the necessary permits and administrative authorizations for the construction and operation of a 250 kW solar thermal power generation facility in Coria, Cáceres (Spain).
- This project is based on an innovative technology for electricity generation, using solar energy as a raw material and converting it into electricity through a thermohydraulic machine, differing from conventional solar thermal plants that use steam generators.

Country: SPAIN

CONSTRUCTION AND COMMISSIONING OF THE 5 MW PHOTOVOLTAIC PLANT IN CORIA, CÁCERES

CONTRACT TYPE: Turnkey - EPC

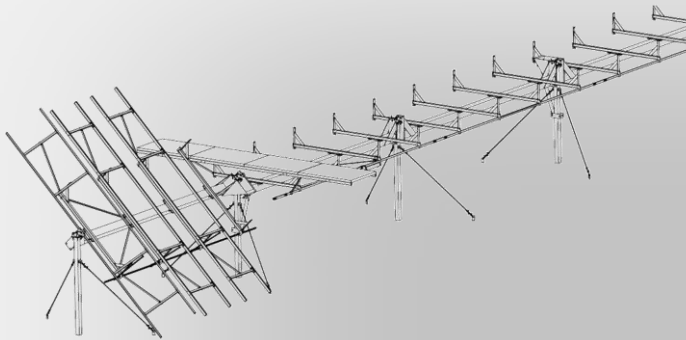

CLIENT: INYPSA acts as the promoter and IER as the turnkey contractor

WORK PERFORMED:

- Engineering, procurement, construction (EPC).
- The project consisted of promoting, supplying, constructing, and commissioning a 5 MW photovoltaic solar park.
- The project covers both the operation and maintenance of the plant.
- The technology used is a dual-axis tracker, including evacuation infrastructure to RED.

Country: SPAIN

TECHNICAL MANAGEMENT OF 3 PHOTOVOLTAIC PARKS (15 MW TOTAL) IN LEÓN

CONTRACT TYPE: Project Management

CLIENT: ABB - Asea Brown Boveri, S.A.

WORK PERFORMED:

- Technical management of 3 photovoltaic parks of 5 MW each in the province of León, Spain.
- Planning and project management.
- Execution control of the project:
 - Mechanical and electrical installations
 - Civil works
 - Grounding network
 - Control system
 - Transformation centers, inverters
 - 25 KV evacuation line
 - Substation
- Environmental permits.
- Cost control.
- Supervision of material testing and quality control.
- Equipment reception.
- Commissioning.

Country : SPAIN

EXECUTION OF CIVIL WORKS FOR THE VALDECABALLEROS 5 MW PHOTOVOLTAIC PLANT, BADAJOZ

CONTRACT TYPE: Civil Works Execution

CONTRACT VALUE: €1,386,000

INVESTMENT: €34,500,000

CLIENT: SIEMSA

WORK PERFORMED:

- The project consisted of executing the civil works for a 5 MW photovoltaic solar park with single-axis tracking technology (33 kW trackers per unit) connected to RED.

Country : SPAIN

EXECUTION OF CIVIL WORKS FOR THE POZOHONDO 5 MW PHOTOVOLTAIC PLANT

CONTRACT TYPE: Civil Works Execution

CONTRACT VALUE: €1,390,000

INVESTMENT: €34,150,000

CLIENT: SIEMSA

WORK PERFORMED:

The project consisted of executing the civil works for a 5 MW photovoltaic solar park with single-axis tracking technology (33 kW trackers per unit) connected to RED.

Country : SPAIN

CONSTRUCTION AND COMMISSIONING OF THE BROZAS 1 PHOTOVOLTAIC PLANT, CÁCERES

CONTRACT TYPE: Turnkey - EPC

CONTRACT VALUE: €654,759

INVESTMENT: €654,759

CLIENT: Instituto E.R.-Solar Extremadura, S.L. / Caixa Catalunya

WORK PERFORMED:

- Engineering, procurement, construction (EPC).
- The project involved promoting, supplying, constructing, and commissioning a 100 kW photovoltaic solar park with dual-axis tracking technology connected to the grid, including evacuation infrastructure to the electric company's network (PITARCH).
- In this project, the Institute also manufactured and supplied its S1 model solar trackers.

Country : SPAIN

CONSTRUCTION AND COMMISSIONING OF THE BROZAS 2 PHOTOVOLTAIC PLANT, CÁCERES

CONTRACT TYPE: Turnkey - EPC

CONTRACT VALUE: €633,759

INVESTMENT: €633,759

CLIENT: Instituto E.R.-Solar Extremadura, S.L. / Caixa Catalunya

WORK PERFORMED:

- Engineering, procurement, construction (EPC).
- The project consisted of promoting, supplying, constructing, and commissioning a 100 kW photovoltaic solar park with dual-axis tracking technology connected to the grid, including evacuation infrastructure to the electric company's network (PITARCH).
- In this project, the Institute also manufactured and supplied its S1 model solar trackers.

Country: ITALY

CONSTRUCTION AND COMMISSIONING OF A 500 KW PHOTOVOLTAIC PLANT IN SICILY

CONTRACT TYPE: Turnkey - EPC

CONTRACT VALUE: €429,200

CLIENT: ABB

WORK PERFORMED:

- Engineering, procurement, construction (EPC).
- The project involved supplying, constructing, and commissioning a 500 kW photovoltaic park with dual-axis tracking technology.

Country : SPAIN

BASIC ENGINEERING FOR 23 WIND FARMS (638 MW) IN EXTREMADURA

CONTRACT TYPE: Basic Engineering

CLIENT: IER

WORK PERFORMED:

- Feasibility study and conceptual engineering, including wind analysis, location, construction feasibility, and energy evacuation for 23 wind farms, totaling 683 MW.
- Basic engineering of the wind farms, including civil works and basic mechanical and electrical engineering (evacuation power line and transformation substation).
