Fast & Sustainable R&D platform

Materials science made easy

traceless **Voodin Blade Technology** **REMENT** **VYLD** **BIOVOX**
BIOWEG **TRIBERIN** **BIO-LUTIONS** **ecoLocked**
holy **HAPPON** **Infinite Roots** **Lignopure** **Made of Air**
one•five **PROSERVATION** **WILDOPLASTIC®**
 and many more...

Circular Inputs ①

Supply and use of renewable, recycled, or highly recyclable materials in production to minimize waste and pollution.

Sharing Platforms ②

Maximized utility rates of products and assets through collaborative usage and shared access, often through digital technology.

AKKURENT **boomerang®** **CIRCUCUBE** **WECARRY**
circulation **fainin** **faircado** **FLUX** **kolula**
kooky. **poze** **RECUP** **Relevo** **sharely** **sigo**
sykell **uRyde** **Vytal** and many more...

Product-as-a-Service ③

Commercialization of a product's usage and function rather than its possession, ensuring performance, maintenance and reverse logistics.

ExoMatter

Building the most comprehensive AI-driven platform for materials research and development

- Munich based Startup
- Spin-off from the German Aerospace Center
- Founded in 2022
- 60% Expertise in the Delivery Team as PhD

CARSYNCH

Finding new materials is tedious and inefficient

We use what everyone else uses

We read literature and then decide

We try a lot of options in the lab

It's very time-consuming.
(up to 5 years)

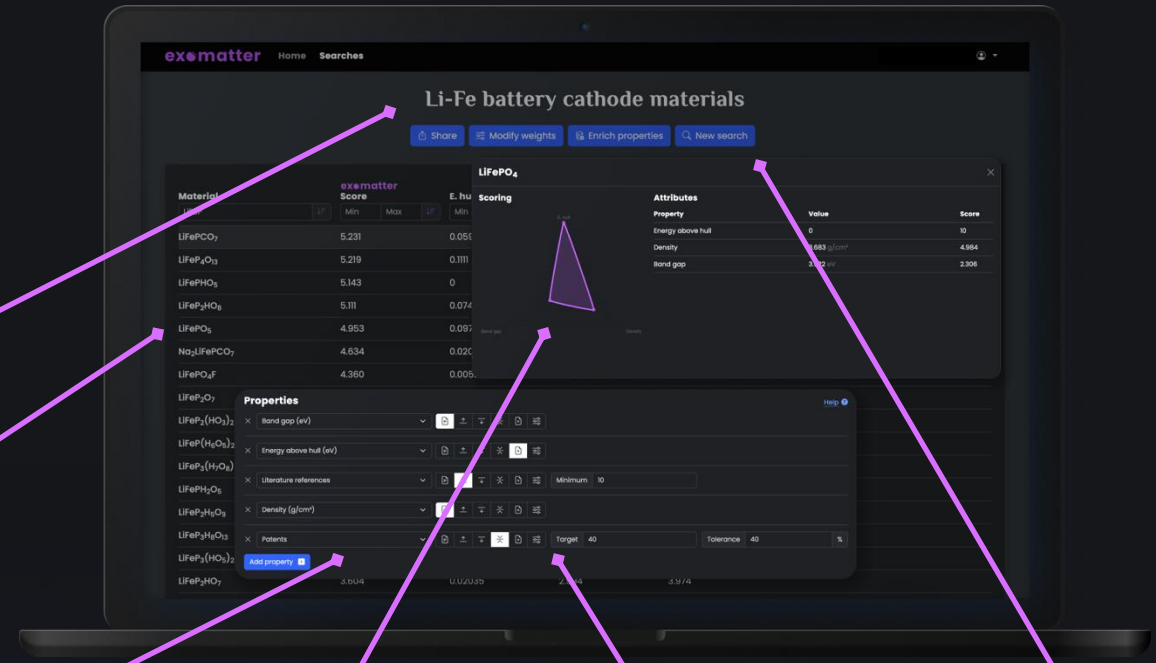

We are wasting resources

We ask an expert for advice on 80% of all decisions

ExoMatter enables your right material choice

Individualized Search

Properties based on your application

Easy to handle

You don't need to be a materials expert

Alternative Suggestions

Ensures that customers won't miss any hot candidates

Smart Weighting

The ExoMatter Score helps manage information overload

Patents & Literature

To have all the information in one place

Saving searches

Helps you to keep track of your materials

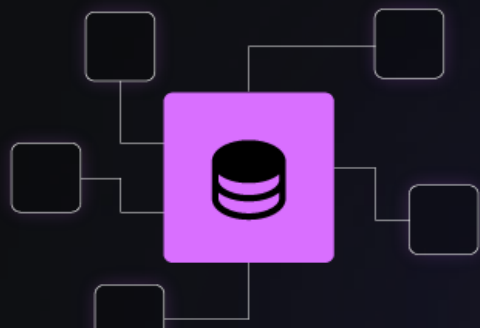

We cover every aspect of material research

Data mining

Translating raw data into a unified format

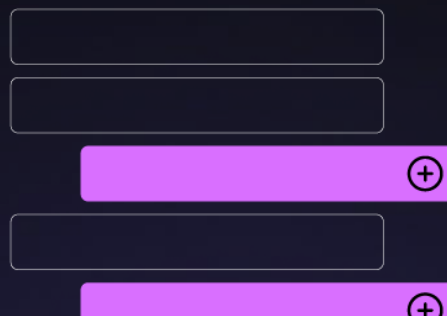

- Scientific databases
- AI
- Digital Methods (DFT etc)

Enrichment

Algorithms enrich application-specific properties

- Chemistry, physics, engineering, cost & Carbon Footprint

Scenario modelling

Enabling decisions

- All materials information in one place

Customer Value

ExoMatter offers vast savings

months

Progress

■ with ExoMatter ■ without Exomatter

Time savings

"We were impressed to receive first results less than a month after the kick-off. This is a tremendous way to speed up materials research."

Carbon footprint reduction

By eliminating the need for extensive experimentation ExoMatter can help you reduce the carbon footprint of your material research by up to 80% and reduce chemical waste by up to 90%.

Carbon Emission

Cost reduction

Up to 90% cost savings can be achieved by reducing the time spent in the lab and reducing the amount of chemicals used in the lab
