FLOWRACKS

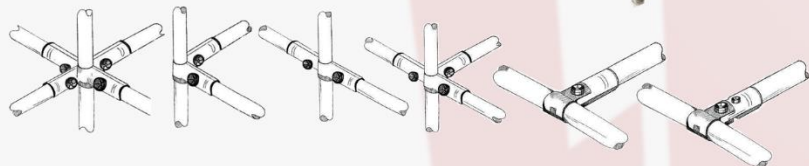

AND

OTHER RELATED HANDLING EQUIPMENT

High Rise Racks is a type of racking that is suitable for storage and/or for organizing all types of products. It can surely save space in your place.

Metal Joints are made of cold-roll steel and powder coated finish. It consists of two or more parts secured by a standard nuts and bolts to join our standard pipes.

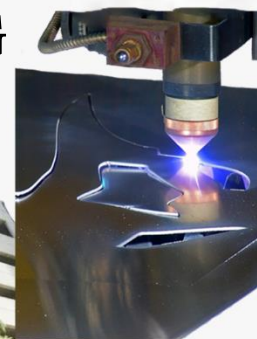

CNC SERVICES

CNC Services which can create the desired product through bending, grinding, wire-cut, lathe, turret punching, and milling.

A Precision Cutting Machine that is equipped with computer aided program. This machine can be used depending on the material that is needed (approx. 18mm thick), from aluminum, stainless and metal sheet.

PRECISION PLASMA AND LASER CUTTING

POWDER AND ED COATING

Powder coating provides a durable, attractive and uniform finish which has a better performance and quality in terms of flexibility, impact and corrosion.

Electro-Deposition (ED) Coating is a type of technique which promotes an eco-friendly process due to its water-based paint system.

It also has a better finish that every corner of the material are evenly painted.
