

Wireless Nurse Call System

Description

Smart Alarm Alert System (SAAS) is specially designed for hospital or elderly centre. By employing the latest LoRa technology, the wireless range can achieve distance of over 1km. The power consumption is low, providing up to 3 years of battery life. SAAS is easy to install (no cabling), intuitive to use and flexible. User can import different floor maps and set different alert sounds for alarms without the help from programmer. All devices are built by flame retardant ABS. SAAS is certified with standards like CE (Europe), HKCA-1078 and UKCA. It is fully supervised to provide a safe and reliable solution.

Product Features

- Long wireless range: ≥ 1 km
- Low power: battery life ≥ 3 years
- AC lost fault alarm
- Ethernet lost fault alarm
- Power supply: DC 12V and POE (Class 3)
- Low installation cost (No cabling)
- User editable floor map (support one-button system sync)
- 4 call priorities: Call, Emergency, Presence and Assistant
- Full alarm history log (excel export)
- Remote accessible
- Support Pocsag pager (optional)
- Support android mobile apps (optional)

IP-based Nurse Call System with VoIP intercom

Description

IP-based corded nurse call system is low cost and most reliable solution. It is especially suitable for hospital usage due to no RF interference. It is easy to install, intuitive to use and flexible. User can import different floor maps and set different alert sounds for alarms without re-programming. This system follows the design guidelines incorporated in safety standards like CE (Europe), HKCA-1078, HTM 08-03, UL, FCC (US) and UKCA. It is fully supervised to provide a reliable solution.

System Features

- Support full-duplex VoIP intercom (SIP)
- Head-free speaker and microphone (2-3M)
- Call history logs with colourful performance indicator (Green – Good, Yellow – Median, Red – No Good)
- Device/Ethernet lost fault alerts
- User editable floor map (support one-button system sync)
- Optional 4 call priorities: Call, Emergency, Staff and Cardiac
- Full alarm history log (Excel export)
- Remote accessible
- User configurable sound tracks for different alarms
