Bio-SV

The sturdy depacking solution to separate the packaging from organic waste

Process up to 30 tons of biowaste per hour with high separation quality (> 99,7%)

The Bio-SV is designed to achieve **optimum separation between packaging and the organic material**. This separation enables biowaste to be recovered through anaerobic digestion. Our Bio-SV is **designed and assembled in France**.

Technical information

- **Recovered biowaste quality** : plastic impurities < 0.3% DM
- **Water consumption** : 0,25 m³/t
- **Electricity consumption** : 2 kWh/t

Our +

Great process capacity

- up to 30 tons/hour

Reduced maintenance

- Less than 1 hour per week
- Availability rate > 95

Simplified use

- Intuitive control screen with pre-set recipes
- Quick start via 'Start' button and stop via 'Stop' button
- Automated process, with no complex steps
