

**MAUCHER**

INNOVATION IN WERKZEUG UND KUNSTSTOFF

**YOUR INNOVATION PARTNER**  
FOR PLASTICS & MOULDING SOLUTIONS

DEVELOPMENT | DESIGN | TOOLMAKING | MOLDING | PRODUCTION

## // ABOUT US

Maucher is one of the most innovative medium-sized companies in the Lake Constance region and has established itself as a competent partner in plastics engineering. Founded in 1986 as a model-making business, Maucher today operates three locations with more than 12,200 m<sup>2</sup> of production space and 4,650 m<sup>2</sup> of warehouse space.

With around 200 employees, we develop and produce high-tech solutions for both national and international clients across a wide range of industries.

We design and manufacture all required tools and molds using advanced CAD systems that are seamlessly integrated with CNC milling technology. Maucher produces just-in-time plastic components using modern technologies – with a strong focus on an optimal price-to-performance ratio.

Our broad network of partners from various fields ideally complements our portfolio.

### Certifications:

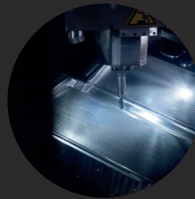

- ISO 9001 : 2015
- IATF 16949 : 2016
- ISO 14001
- TISAX

## // OUR SCOPE OF SERVICES

Design and  
Development

Toolmaking and  
Moldmaking

Production of Plastic Parts  
and Complex Assemblies

Component Finishing

Quality Assurance

Logistics

Material Development

## // THERMOFORMING

- Forming of textile materials on more than 15 press machines
- High flexibility and over 30 years of experience
- Broad material range

## // FOAMING

- Sound-insulating and alternative to injection molding
- Soft, integral, and compact foams (with/without IMC)

Lightweight prototype, small, and medium-volume parts such as:

- Housings and covers
- Functional plastic components
- Interior trim parts
- Insulation and damping elements
- Lightweight structural parts
- Design panels
- Noise and thermal insulation parts
- Machine/device/sports/leisure components
- Technical parts for commercial vehicles, caravans, agriculture, medical, furniture, etc.
- Lightweight elements
- Cladding systems
- Splash guards
- Seats

## // WHAT SETS US APART

- 1 On-time delivery and precision
- 2 Customized solutions and consulting
- 3 In-house mold and fixture construction
- 4 Fast and cost-effective production even for small quantities
- 5 Automated processes with Maucher CNC Robotics
- 6 Innovation and technology development
- 7 Transparency and partnership-oriented communication
- 8 Made in Germany
- 9 High flexibility
- 10 Excellent price-performance ratio

## // DEVELOPMENT & DESIGN

Maucher covers all project phases — from RFQ to the final solution. Development projects are supported throughout definition, prototyping, series launch, and spare parts phases.

Our advanced technologies ensure efficient processes across manufacturing methods. Both in-house and customer-driven R&D projects are supported flexibly.

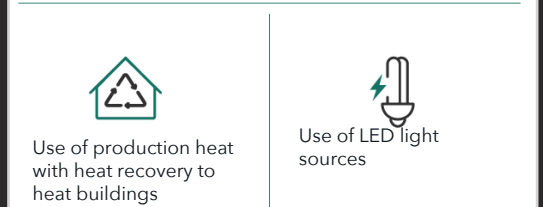

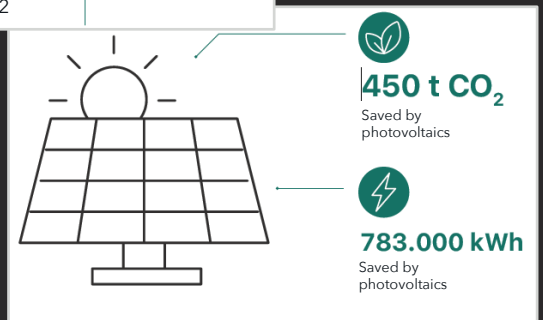

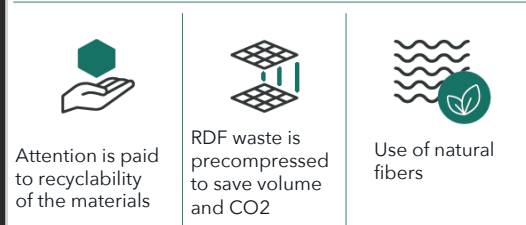

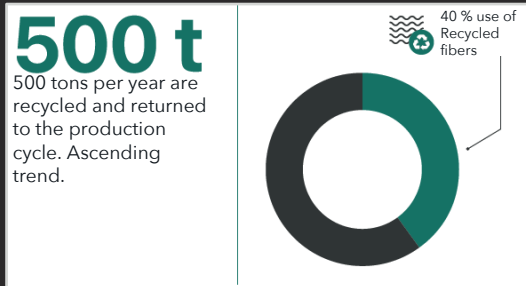

We provide complete production engineering support throughout the entire product creation process.

## // EXTENDED WORKBENCH

- Injection molding: MuCell, up to 4,000 tons
- Thermoforming
- Finishing (covering, laminating, assembling)
- Plastic welding
- 3D printing (metal & plastic)
- Rapid prototyping

## // SUSTAINABILITY

High quality and forward-thinking practices ensure long-term customer satisfaction across various industries.
