

FLEET MANAGEMENT

TRIPTANGO

OUR MISSION & VISION

→ Our Vision

To make fleet management simple, efficient, and fully transparent for companies of all sizes.

→ Our Mission

To provide a reliable platform that helps fleet managers track, manage, and optimize their vehicles and operations, improving efficiency and control.

TRIPTANGO OVERVIEW

A centralized fleet management application that allows monitoring of vehicles and drivers, recording and updating vehicle status, and streamlining daily fleet operations

OUR APPLICATIONS

Web App

Tablet App

Mobile App

WEB APP FUNCTIONALITIES

Basic Data Management

Create and manage vehicles, drivers, assignments, and GPS devices.

Real-Time Monitoring

Monitor vehicles in real time on a map with data such as speed, fuel, mileage, and engine activity.

Fleet Management

Track vehicle data: assignments, maintenance, inspections, insurance, incidents, fines, mileage, and purchase info.

Trip History

Record each trip with distance, duration, stop times, and start/end addresses. Compare actual routes with expected ones to identify deviations or inefficient movements.

WEB APP FUNCTIONALITIES

Stop Management

Save detailed information about stops, including address, arrival and departure times, and total duration of the stop.

Email Notifications

Automatically send email alerts when vehicle-related deadlines are about to expire or have already expired, ensuring nothing is missed.

Mileage Control

Monitor the kilometers traveled by each vehicle, with data broken down by year and by month.

Route Optimization

Upcoming features include route optimization, service scheduling, and automatic vehicle selection based on location.

REMOTE VEHICLE CONTROL

New web app functionalities for administrators

☒ Remote Door Control

Administrators can open or close vehicle doors remotely, directly from the web app.

☒ Engine Ignition Block

If needed, administrators can block the engine from starting remotely — an extra layer of security against unauthorized use.

VEHICLE 04 — REMOTE CONTROL

Vehicle doors

OPEN

Engine ignition

BLOCKED

Every remote action is logged with user, vehicle, date and time for full traceability.

TABLET APP FUNCTIONALITIES

Vehicle Assignment

Assign vehicles from a list of currently available devices

Vehicle Return

Process vehicle returns from the list of vehicles previously assigned. Compare images and verify the vehicle's condition

Driver Signature Capture

Drivers sign digitally to confirm pick-up or return, ensuring traceability.

Automated Handover

The system records the exact date and time of each assignment or return and speeds up the handover process, reducing manual work and errors.

MOBILE APP FUNCTIONALITIES

Vehicle Details

View key vehicle information, including purchase data, maintenance history, inspections, insurance, incidents, and fines associated with the vehicle.

Incidents and Fines

View active fines and personal incident history for the assigned vehicle, keeping drivers and managers informed.

Vehicle Updates

Add new maintenance tasks, inspections, incidents, and update the vehicle's mileage directly from the app.

Photo Documentation

Take photos of the vehicle immediately after delivery and before return, allowing fleet managers to compare and verify the vehicle's condition.

KEYLESS DOOR ACCESS

New mobile app functionality for drivers

Open & Close Doors from Your Phone

Users can lock and unlock vehicle doors directly from the mobile app — no physical keys required.

After-Hours Vehicle Pickup

Need to collect a vehicle when the office is closed and there are no keys available? Your phone becomes the key.

INDUSTRY PARTNERSHIP

We are proud to partner with Teltonika, one of the world's largest and most innovative satellite monitoring device manufacturers. Recognized as a top company in the manufacturing sector in Lithuania, Teltonika has sold over 7 million devices across more than 150 countries
