

## Flexibility Meets Simplicity Mission-centric Communication Platform

Our platform keeps you focused on the mission with real-time, incident-specific communication and automated documentation, making it simple to use and reducing the time spent on manual tasks.

With easy implementation and low cost of ownership, you can start managing incidents with speed, safety, and clarity right away – whether you're responding to critical emergencies or handling routine tasks.

Mission-centric  
Communication Platform  
for Incident Management  
with Automated Documentation

## Coordinating Incidents and Need a Good Situational Overview?

Gain clarity with a map-based live situational overview that tracks all ongoing activities in real time.

Instantly access real-time updates and mission-critical information to stay engaged.

Efficiently dispatch resources and make informed decisions with incident-focused chats and timely data.

## Handling Incidents and Need Real-Time Support?

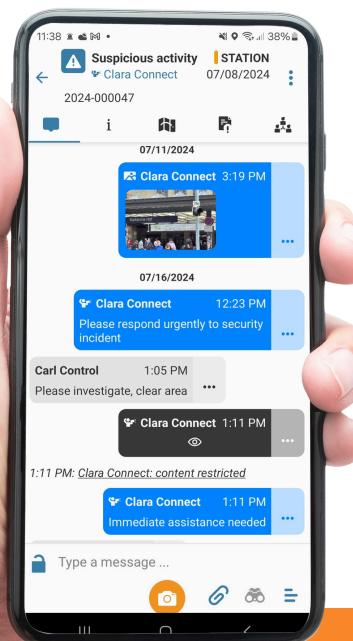

Escalate incidents seamlessly, bringing in additional teams or resources as the situation evolves.

Enhance decision-making with live multimedia sharing, including photos, videos, and audio, providing your team with a clear picture of the evolving situation.

Stay focused on the mission while keeping your entire team aligned and informed

## After responding and resolving incidents Tired of Writing Reports?

Your actions and observations are automatically captured in real-time as incidents unfold, freeing you from manual documentation and ensuring every detail is accurately recorded.

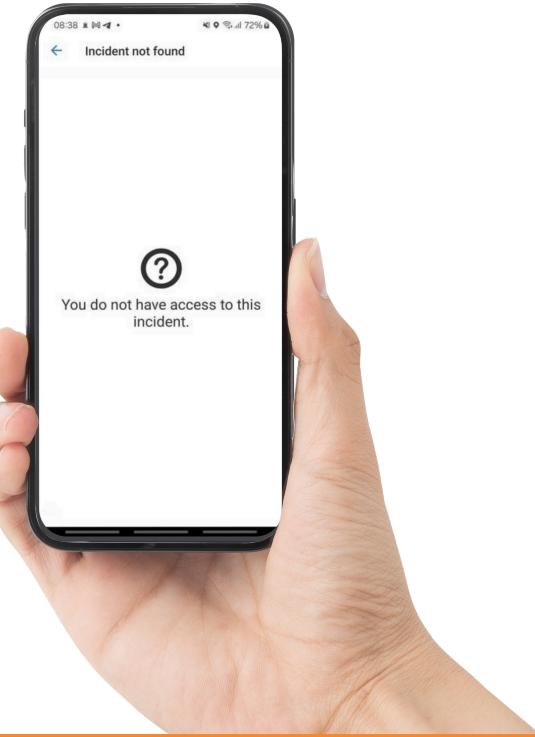

## Managing the System and Ready to Simplify Access Management and Compliance?

Ensure the right people access the right information with dynamic and static permissions.

Adjust access automatically as incidents evolve, with instant updates and data removals.

Maintain full transparency with incident-specific audit logs for complete accountability.

# CORE FEATURES

### Map-Based Situational Awareness

Real-time map overview of staff, drones, and units to enhance coordination. Customise settings for detailed visual insights linked to chat.

### Dispatching

Deploy the right teams with optimised resources and real-time updates for effective response.

### Communication and Documentation

Instant messaging with integrated media documentation and (MCX / BIC) radio communication. Automated logging and delivery confirmation ensure clear, secure communication.

### Reporting and Alerting

Report incidents quickly via smartphone with automatic alerts based on type. Activate crisis mode to notify additional teams as needed.

### Need-to-Know and Data Protection

Control access with dynamic permissions and automatic image anonymisation. Ensure privacy with encrypted data and user-initiated tracking.

### Integration of Live Feeds

Enhance situational awareness by integrating live feeds from drones, CCTV, and weather services directly into your mission-centric chat.
