UTIEL REQUENA

50Ha

The Requena winery is our headquarters in Valencia area, surrounded by a 50Ha estate.

This is where our everyday work of organisation, administration, research and logistics is done. In the technical area we have the latest bottling line, together with a fully-equipped research department, in which we do laboratory tests to back up the tastings done by our technical team.

We also have barrel cellars to accommodate 1,100 French and American oak barrels. It is from this centre in Requena that all the wines made in our three production wineries located in Camporrobles, La Roda and Jumilla are delivered and then distributed all over the world.

FUENTESECA

In the hills above Utiel Requena

FUENTESECA conveys all the freshness of its vineyards located at an altitude of 940 metres in the village of Camporrobles. This area is favoured for its extreme climate, with a difference of up to 20°C between day and night.

Fruit, freshness and pleasure are the key words that best define these wines. Cheers!

PASION

For a winemaker, the memory of his first wine remains engraved forever! Manuel Olmo took over his parents' vineyards in 1999 and his first decision was to convert all to organic farming: a pioneering move 25 years ago.

Returning to his homeland after a long spell in Galicia, he decided to promote the indigenous Bobal grape variety, as the Galicians had already done with Albariño. Defending his culture is the best long-term gamble. Manuel went on to create the PASIÓN wine range, which, beyond its strong Mediterranean roots, reflects the region's grape varieties and the legacy left to him by his parents.

A little emotion! Manuel will be delighted to let you taste them.

Let's fly together

LET'S FLY

An aerial photograph of a Spanish town and its surrounding landscape. In the foreground, the ruins of a stone castle or fortress are visible, built on a hillside. The town below is nestled in a valley, with a thick layer of white clouds or fog filling the lower part of the scene. In the distance, more hills and mountains are visible under a hazy sky. The overall atmosphere is serene and historical.
