

Once in a lifetime
— every time

Access + Experience

150,000+ km of coastlines, 25,000+ islands and significant accessibility challenges across Southeast Asia.

Authentic experiences are the new material goods for today's travelers. Once in a lifetime, every time.

Our Vision

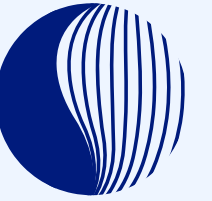

The globally leading provider of premium, standardized and scalable seaplane and last-mile air charter services at the highest level of quality. An early adopter of game-changing technology and innovation.

Our Mission

We safely bring our guests to their final destination — whether on water or land — reclaiming their valuable time through a premium and uniquely memorable experience. We empower hospitality by offering unrivaled service and world-class expertise.

Our Footprint

SEAPLANE

Last-mile

Premium amphibious connectivity to waterfronts, beaches, island resorts, and regional airstrips without infrastructure limits.

SIGNATURE

Mid-mile & charters

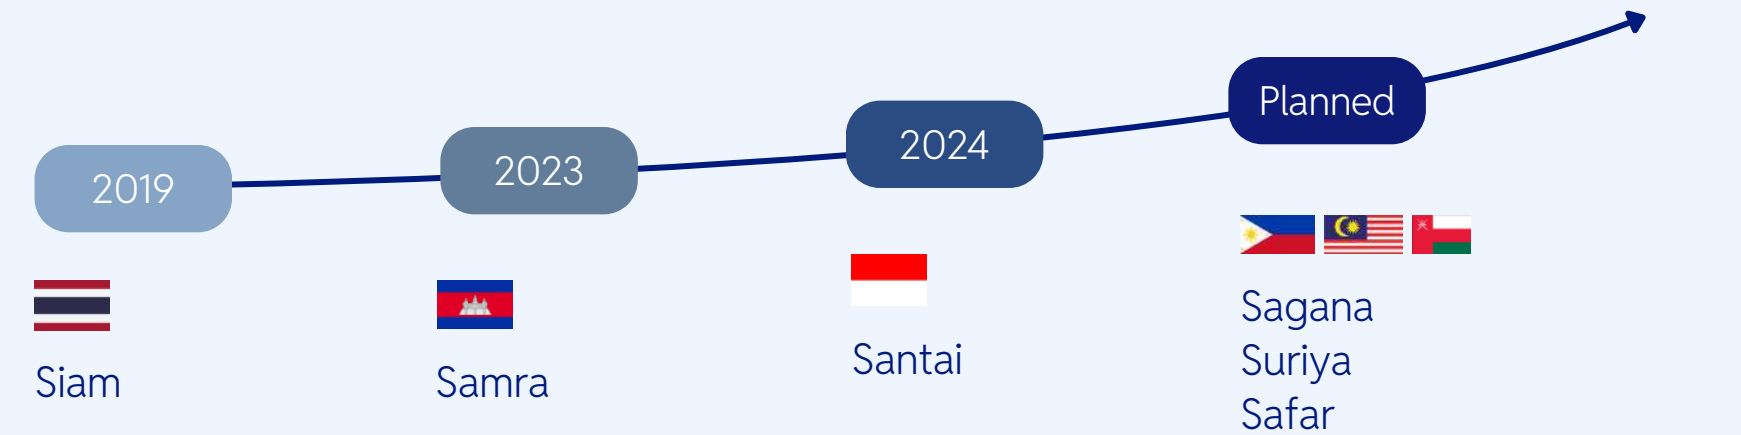

Regional high-speed transit, VIP transfers, and crucial medical evacuations using both turboprop and light jet aircraft.

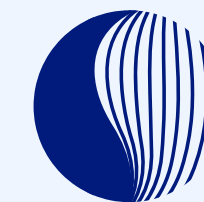

SPARK

Advanced air mobility

Cautiously embracing new innovation with alternative propulsion technology, new platforms and eVTOL propositions.

6-S Foundational Pillars

Service

Unmatched guest hospitality

Scalable

Built for regional dominance

Sustainable

Environment and business

Safety

Our absolute priority

Standards

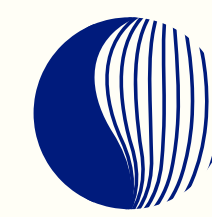

Operational excellence

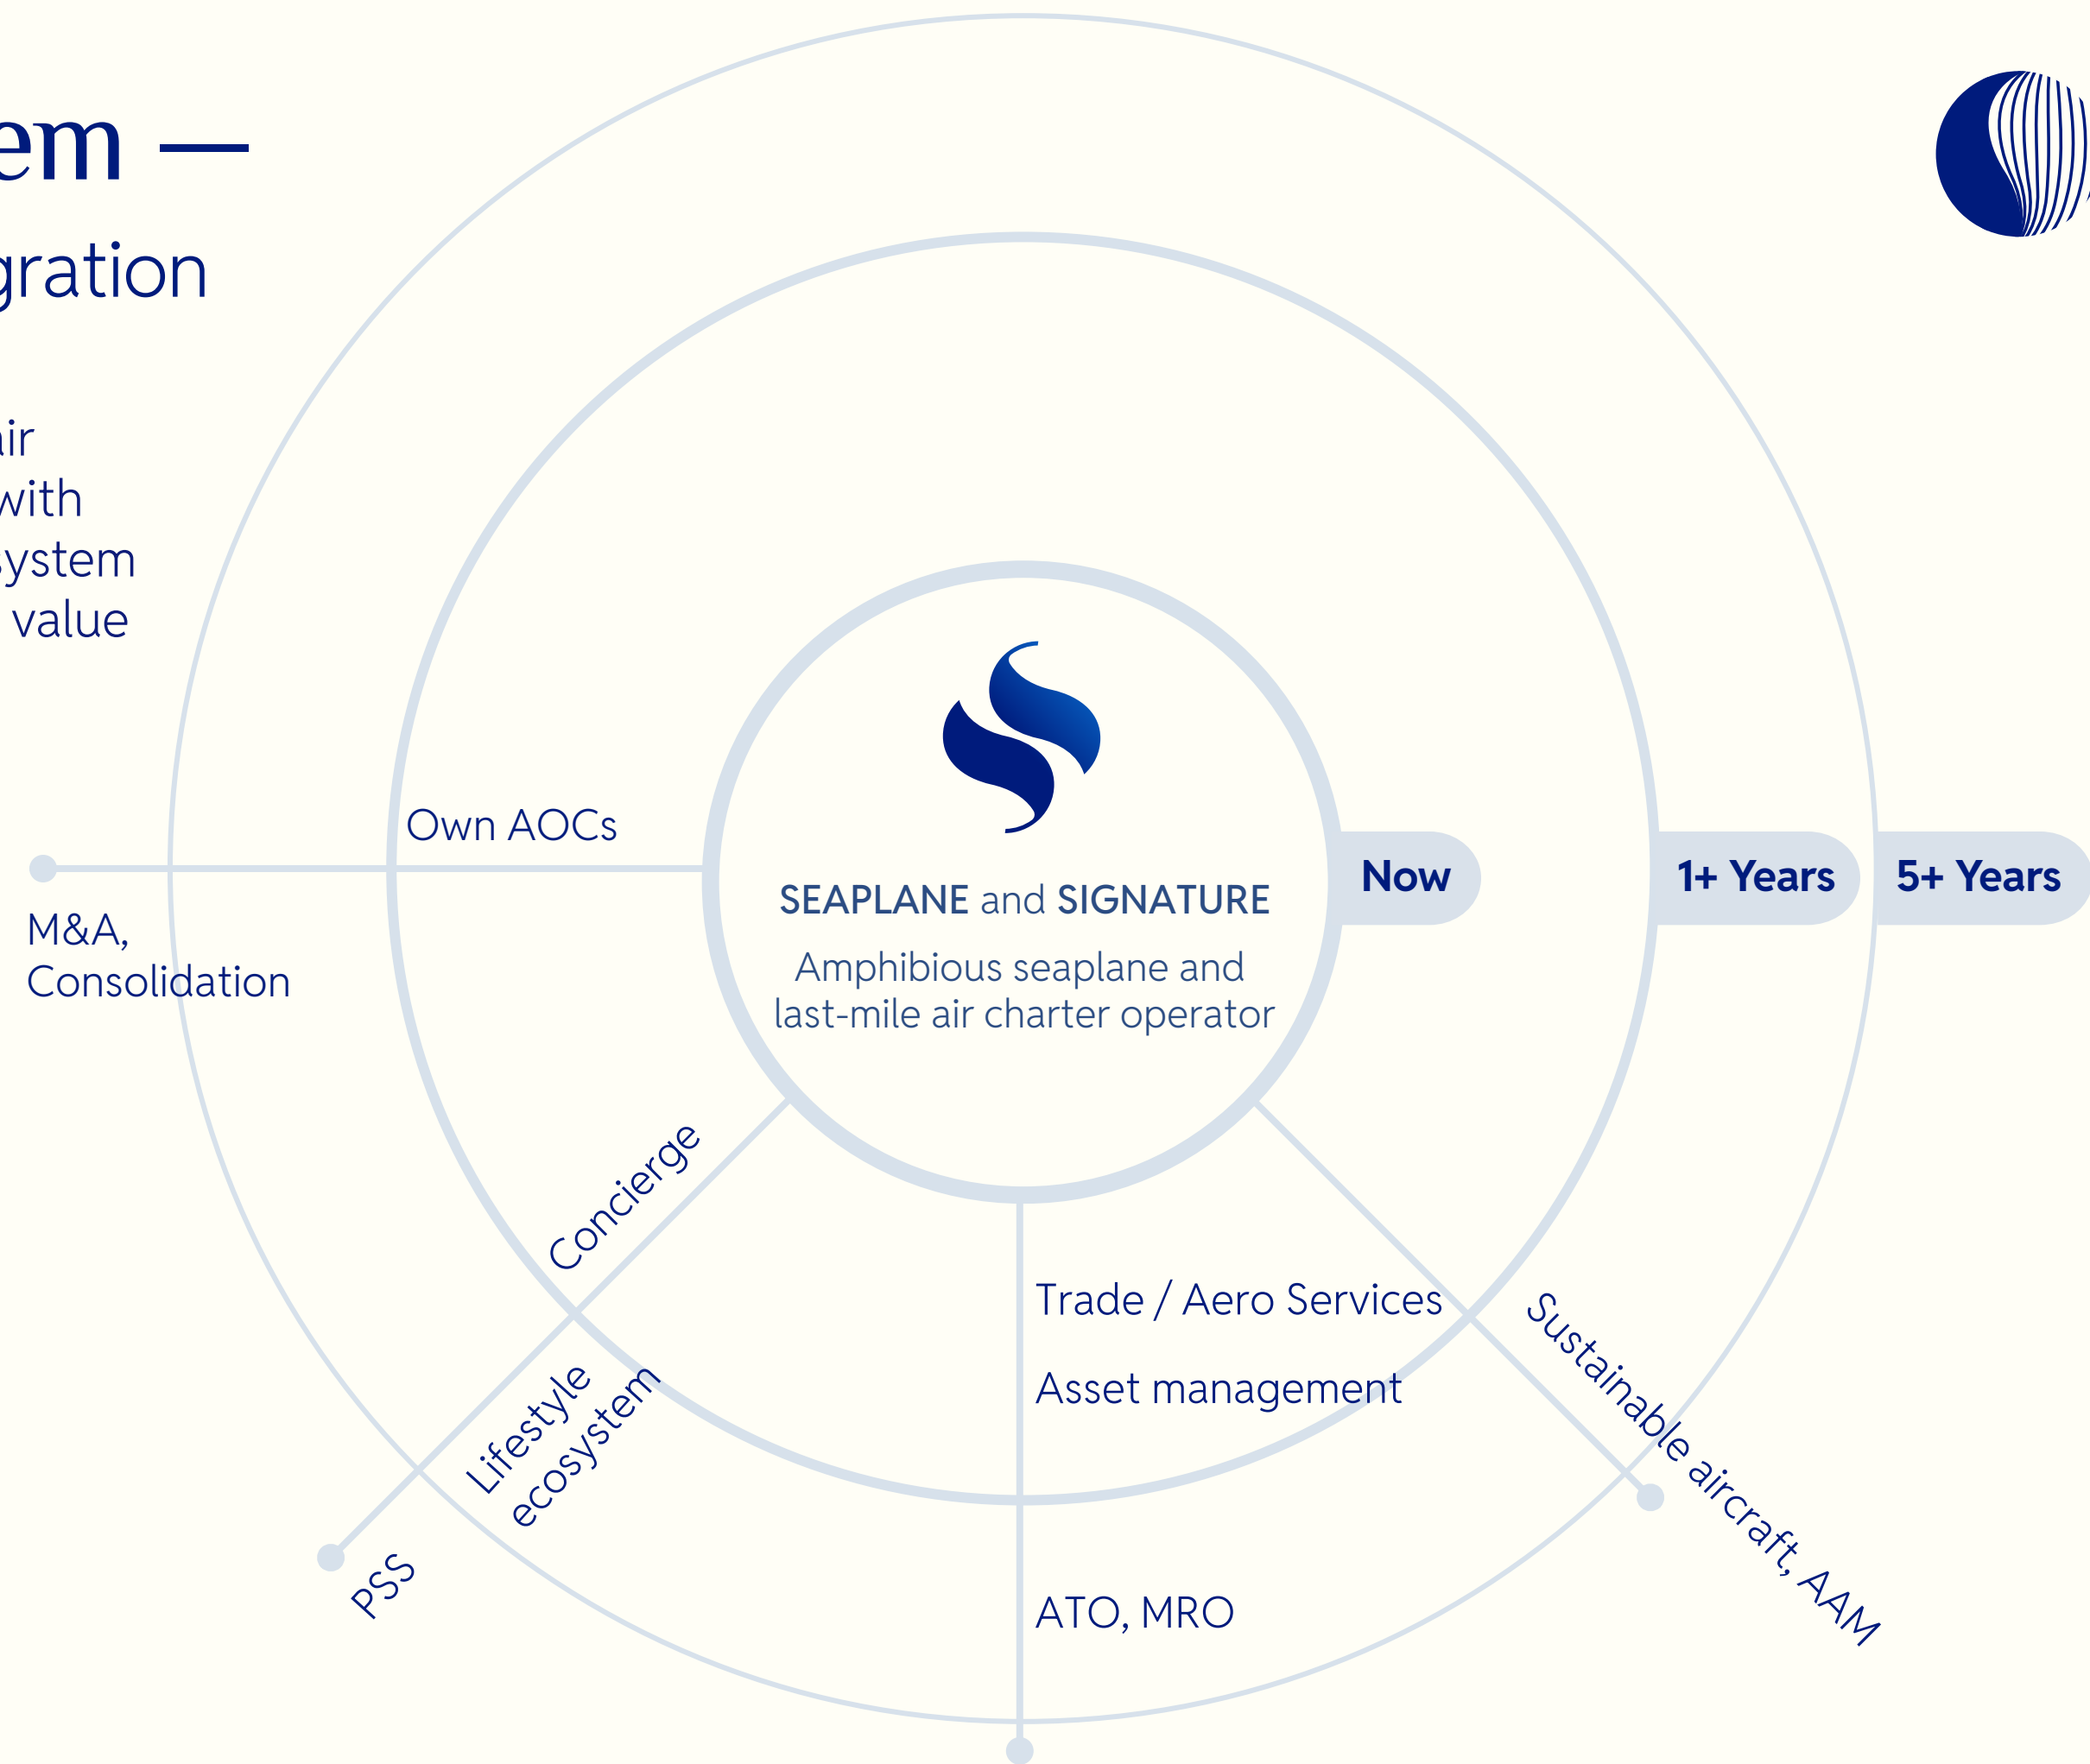

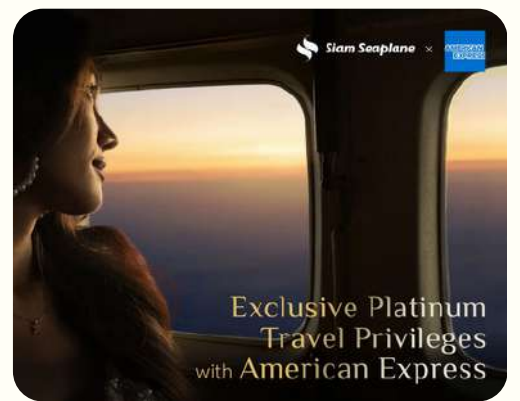

Spark

Continuous innovation

Integrated Ecosystem — Horizontal and Vertical Integration

High standard amphibious seaplane and air charter services across Asia and beyond, with complementary businesses in a wide ecosystem — for full market potential realization and value chain control.

The Business

Anchored in hospitality and lifestyle.

Strengthened through corporate, government, mission-critical, medevac and logistics.

Accessible pricing, luxury experience.

Airports, airfields, ocean, dams, lakes and rivers.

A strong corporate platform for scale.

B2B/B2G contracts for top-line securitization. Strong B2C exposure.

Own aircraft - an appreciating asset class.

A proven, scalable margin business.

Premium mass market

A desirable lifestyle and a special experience

High-end premium to luxury

A time saver and seamless transport alternative

VIP, corporate, government

Additional charter potential for more direct reach

Versatile, Cost-Efficient Fleet

Cessna Grand Caravan 208B EX Amphibian

Capacity: Configured for up to 10 pax and luggage. Cargo & medical evacuation capability.

Amphibious Capability: Equipped with floats to operate from both conventional runways and water, providing unmatched flexibility.

Reliability: Renowned for its ruggedness and dependable performance in challenging environments.

Efficiency: Powered by a robust turboprop engine, known for its efficiency and proven track record.

Range: Able to service a wide radius up to 1600 km; but best suited for last-mile transport.

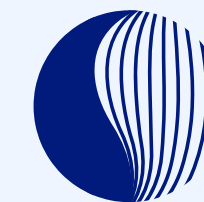

Strong Asset Class: High in demand globally, asset value appreciation (not depreciation), fleet availability through our asset mgmt. entity.

Potential for 100+ aircraft across the region

Including new sustainable seaplanes and possibility for eVTOLs / advanced air mobility integration.

Unparalleled Connectivity

Selected sample flight routes in Thailand Cambodia Indonesia

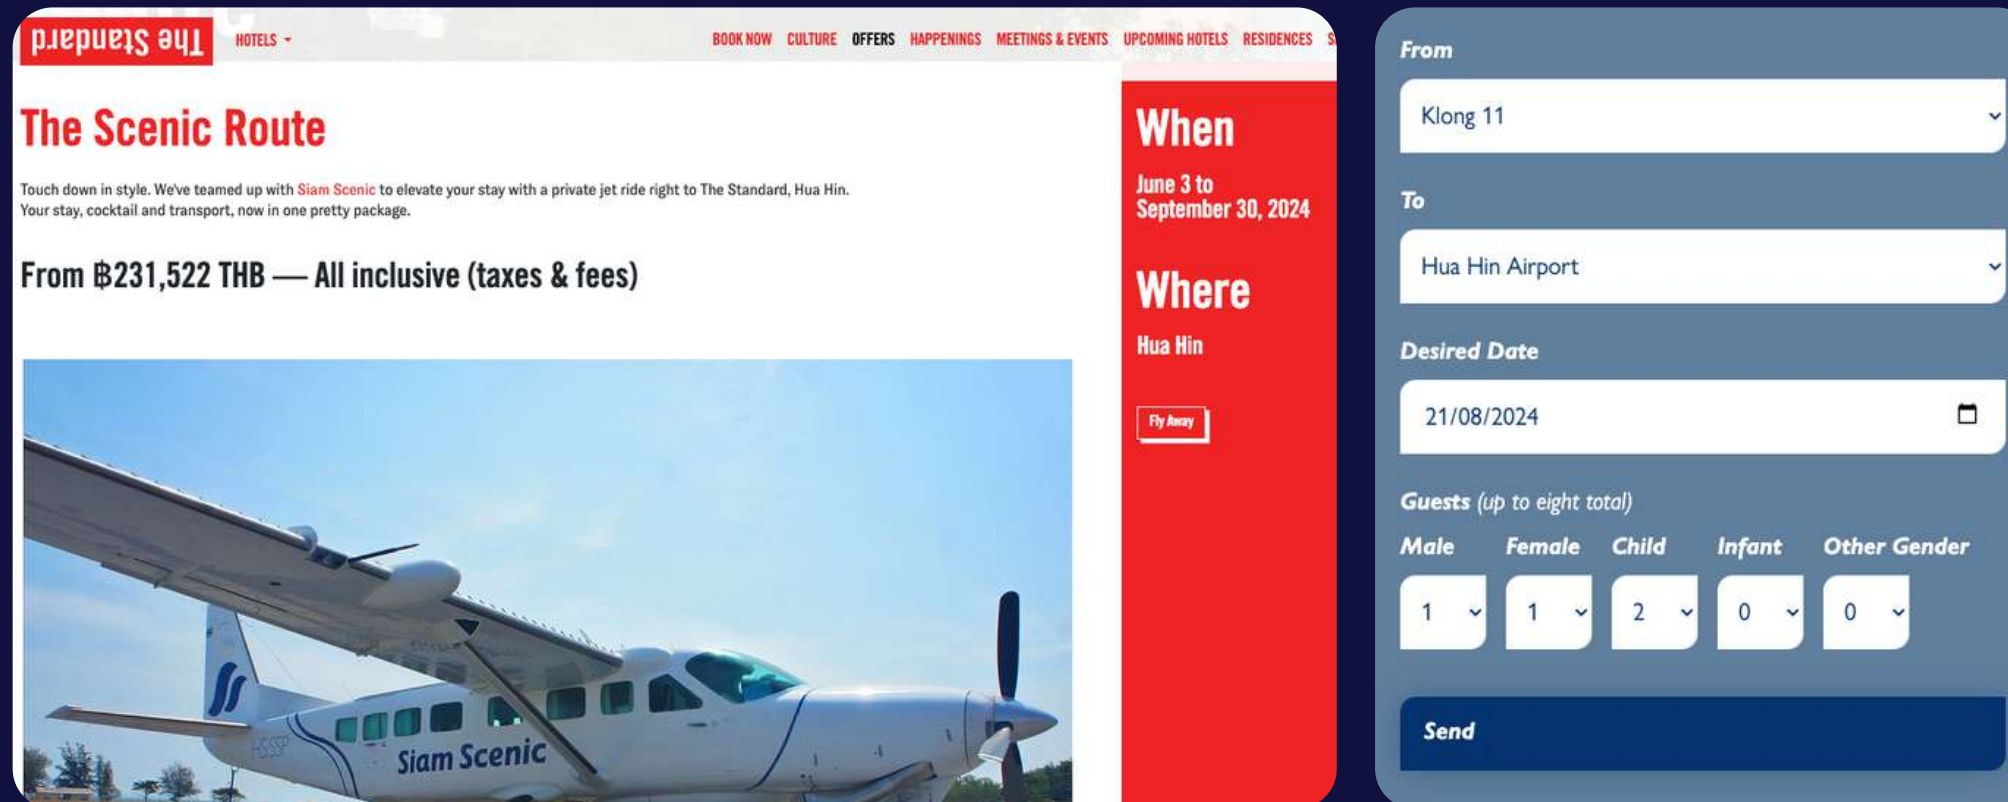

Ecosystem Partnerships

Examples: AYA beverage partner, Mjets private jet, Maserati car launch, Tourism Authority & ONE Bangkok, movie star Mario Maurer, artist Riety, watch partner CVSTOS, Bangkok Airways, Really Cool Airlines

Examples from The Standard and InterContinental partnership packages

A New Standard Experience

Savor the freedom of soaring in your own exclusive aerial sanctuary

Experience a new Standard — skip the lines, and indulge in a charter VIP flight from Bangkok to Hua Hin. The Standard is ready to welcome you to your upbeat, energetic, and relaxing home away from home. The Standard Pool Villa is sure to wash away all your worries and concerns, provides ample privacy, a king-sized bed, a lounge area, and your private pool. This is a pet-friendly room, so your four-legged friends are welcome.

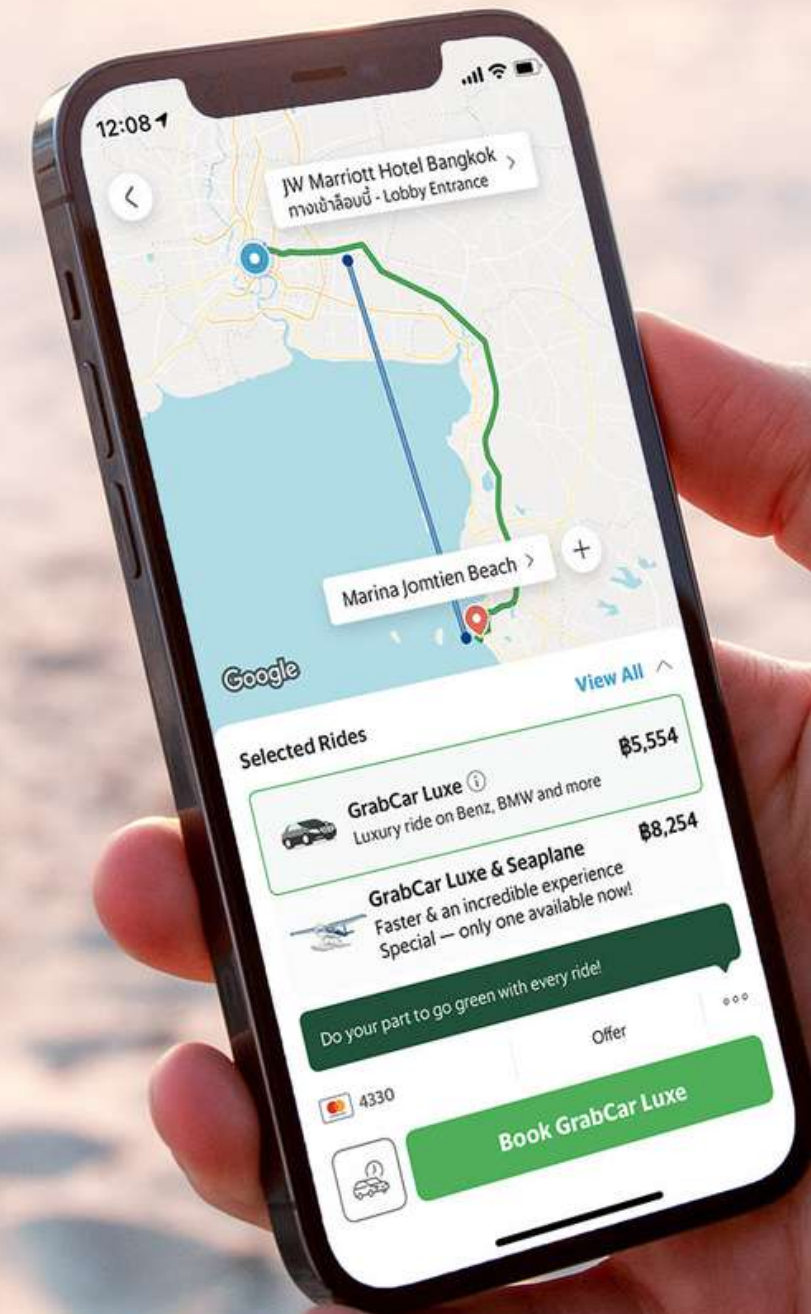

This package comes with a number of additional exclusive perks, including daily food and beverage credits, a signature cocktail at Praça, and curated savings at the delicious well-known restaurants Praça and Lido, as well as the famous 'The Spa.' After your stay, you will be driven to Hua Hin Airport for your return private plane, to land and be chauffeured to wherever you wish within the hustle and bustle of Bangkok.

- Private charter flight from Klong 11 Private Airfield to Hua Hin Airport, including return
- Car transport to and from all airports
- A Villa Vibe One Night in the Standard Pool Villa

A food and beverage credit of \$1,000 THB per room per day

Digitally Native

- Easy-to-use and beautiful, personalized digital interfaces — from apps to web.
- Cloud-based passenger service system for personalized experiences, increasing customer loyalty
- Real-time analytics for efficiency improvements
- State of the art integrated flight management systems for own and managed fleet
- APIs for innovative partner integrations and scalability
- Dedicated automation and AI capability in-house and through partnerships

Sustainable by Design

Seaplanes are a valuable tool for promoting sustainable tourism and local development. By reducing the environmental impact and providing access to remote areas, seaplanes help to protect the natural environment and ensure that tourism is enjoyed in a sustainable way, while contributing to better accessibility and local development.

Efficiency

Faster than multi-modal options, lower carbon emissions.

Low noise

Distance to shore minimizes noise. Lower decibels than jetski or long tail boats.

Safety

Among the safest modes of transportation in the world

Flexibility

Access to remote areas inaccessible otherwise.

No underwater disturbance

Minimal float immersion <60cm, no propeller under water. Preserves marine ecosystem.

No oil/fuel leakage

Guaranteed through manufacturing protection.

Recognition by the Tourism Authority of Thailand for Siam Seaplane's sustainable contributions across 12 United Nations' SDGs.

Sustainable by Design

Phase 1
ongoing

Carbon Compensation

Our carbon footprint is measured through industry-standard methods. We compensate our carbon emissions of every flight minute. Further supporting local development, we run compensation programs in partnership with local initiatives such as turtle conservation and coral planting.

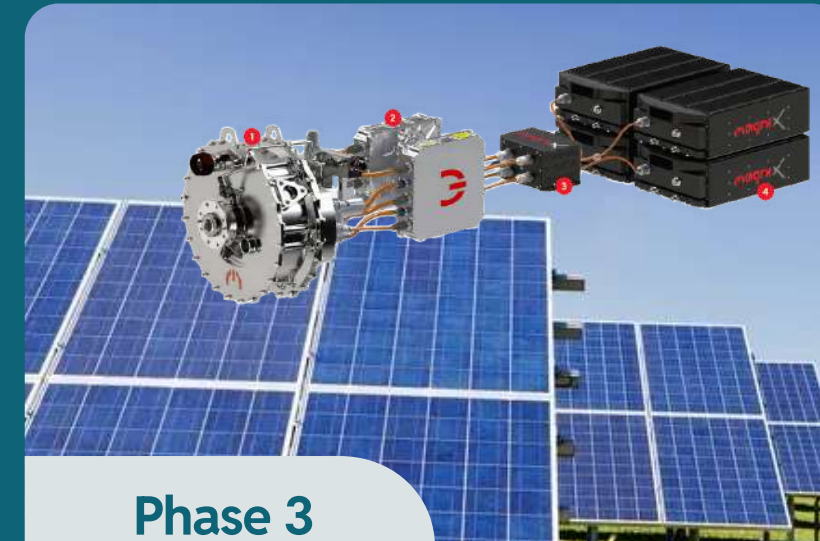

Phase 2
within 2 yrs

Sustainable Aviation Fuels

We will use sustainable aviation fuels as soon as available in the region, with the aim to become pioneers in Asia using SAF.

- Bio-fuel (from used oils & biomass)
- E-fuel (from hydrogen), which can reduce greenhouse gas emissions by up to 80%

Phase 3
within 3 yrs

Electrification

We participate in the research and development for electric engine conversion (partial and full retrofit). Several seaplane operators are currently commercially testing full electric seaplanes.

Phase 4
within 4+ yrs

Zero Emission Pan-Asian Fleet

Fully committed to new electric or hydrogen aircraft developments. Our current commitment includes 14 JEKTA amphibious seaplanes by 2032. We continuously evaluate other OEMs and AAM propositions. This supports our commitment to eco-friendly, sustainable and future-forward operations and affordable transport.

World-Class Team

A global team of 50+ experts, combining experience in aviation, hospitality, business & finance, and entrepreneurship.

Seaplane Asia Group Leadership

FLTR:

- 1 Thailand CEO: Dr. Worakanya Siripidej — Government advisor, entrepreneur.
- 2 CCO: Michael J. Aumock — Luxury hospitality, real estate, marine industries.
- 3 CEO, Board: Dennis Keller — Investments, technology, banking, startups and entrepreneur.
- 4 CFO: Narudom Sumlee — Finance in airline, travel, tech. Qualified chartered accountant.
- 5 CTO, Board: Fabrice Mouton — Aircraft maintenance, repair and overhaul.
- 6 Indonesia CEO: Wirmandi Sugriat — AOC owner, Government, advertising.

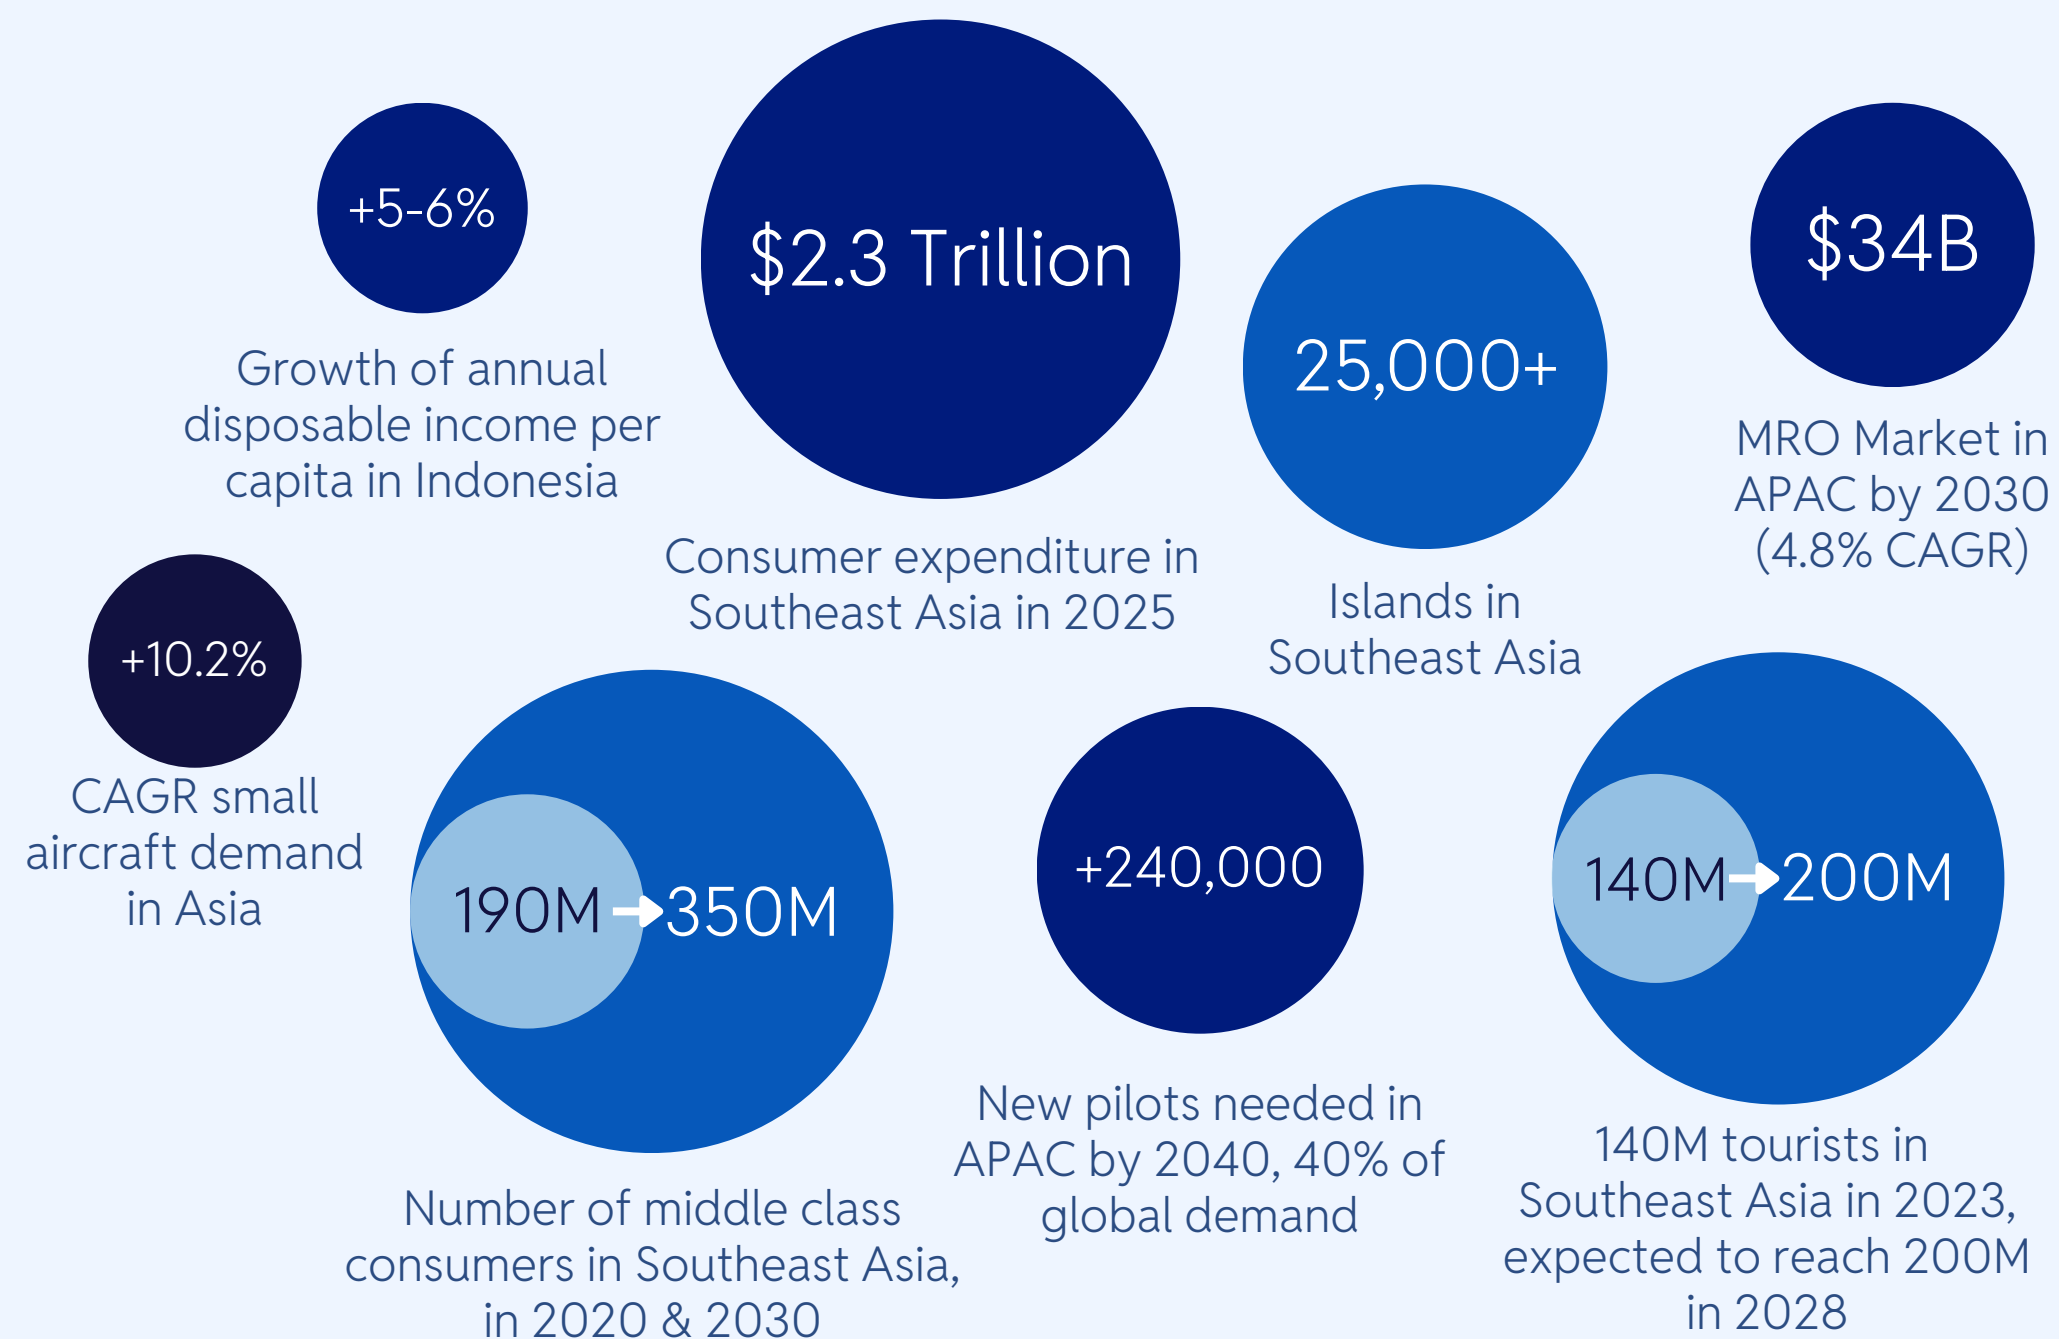

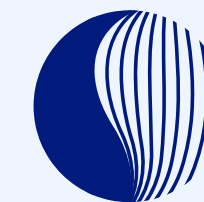

Board & Advisors

FLTR:

- 1 Capt. Lionel Mougel — Aviation entrepreneur, airline captain, former air force fighter pilot.
- 2 Dr. Tomas Koch — Senior Advisor to McKinsey, chairman of venture capital firm.
- 3 Sébastien Laurent — Investment and M&A advisory.

A Strong Growth Narrative, Both in the Region & Industry

Affiliated companies...

Aero Services

As aviators, we want to support and facilitate the region with products and services we love and use, as well as offer expert consulting for the region.

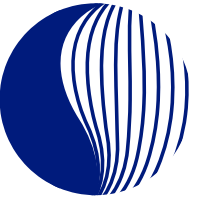

- Distributor for Bose Aviation in Thailand and Cambodia, other products and brands
- Consultancy
- Feasibility studies (e.g. seaplane market entry in Bangladesh, India)
- Aircraft trade, buy and sell facilitation (turboprops, private jets)
- Good scaling opportunity for all areas across the region. Complementary to flight operations.
- CAMO, MRO services to come

Aero Assets Asia

The first asset management & to-be leasing company specialized on small/commuter aircraft in Southeast Asia.

- Commuter aircraft acquisitions, sale, restoration
- To be: specialized lessor for commuter aircraft across Asia
- Initial fleet of Cessna Caravan EX and De Havilland Twin Otters available, in wheeled, amphibious, straight floats and skydive configurations

Jetboard Asia

A distributor for water-related lifestyle products that are innovative, premium and sustainable.

At the heart of Jetboard Asia are the German-produced and award-winning high-end Mo-Jet electric surfboards, the elegant but affordable Leines electric boats, Restube self-inflatable safety floatation devices, and iAqua water scooters.

We believe in no harm to the environment, yet enabling fun and premium experiences for a varied audience.
