What Brz Termin offers to consortia

Brz Termin Limited DOOEL is a North Macedonian healthcare AI and software SME founded by Nace Atanasov, medical doctor and software founder. The company develops practical AI and digital workflows for healthcare, pharmacies, clinics, pharmaceutical companies and medical representatives.

- AI/LLM and RAG workflow technology partner
 - Healthcare AI training partner
 - Pharmacy and clinic workflow automation partner
 - Western Balkans pilot, dissemination and validation partner
- Digital health implementation partner
 - Regulatory/compliance automation partner
 - EHDS/interoperability workflow pilot partner

Target Digital Europe topics

Primary interest: AI Uptake in Health, Digital solutions for regulatory compliance through data, and EEHRxF/EHDS digital health services. Secondary interest: Apply AI health pilots and EdTech/skills activities where healthcare AI training is relevant.

Compliance and responsible AI positioning

Our systems are designed to support compliance with applicable regulatory and operational requirements, including data protection, privacy-by-design, secure access, auditability, responsible AI use, healthcare workflow governance and GDPR-aligned processing principles. For EU project work, Brz Termin can support data protection, cybersecurity, user validation, documentation, workflow governance and compliance-related deliverables together with the consortium legal, regulatory and technical partners.
