

GeneCore Facility

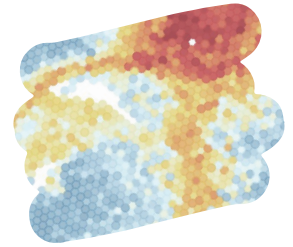

Bulk Transcriptomics

Comprehensive gene expression insights from tissues or cultured cells.

Single-Cell Transcriptomics

High-resolution transcriptome analysis, cell by cell and scalable to any project.

Spatial Transcriptomics

Map gene expression with spatial context in tissue sections.

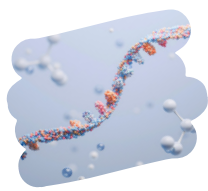

ABOUT US

MORE THEN 18 YEARS OF TRANSCRIPTOMICS EXPERTISE. WE SPECIALIZE IN BULK, SINGLE-CELL AND SPATIAL TRANSCRIPTOMICS. FULL SERVICE FROM EXPERIMENTAL DESIGN TO DATA ANALYSIS.

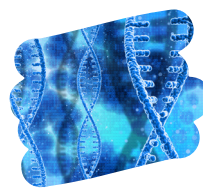

Experimental Design

Every successful project begins with a robust experimental design.

Small RNA Profiling

Targeted and whole small transcriptome analysis.

Sequencing Services

Cost-effective sequencing with shared run options available.

Data Analysis

Support with data preparation and basic analysis.
