

Roadside and home cycle mechanic assistance for the urban cyclist and bike-to-work services

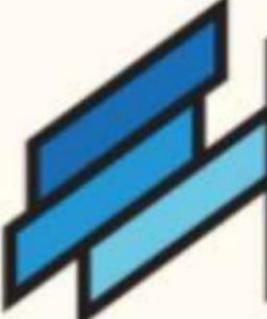

a bit of doctorbike

Doctorbike was born in 2020 as a team of cycle mechanics on the move, ready to repair eco-sustainable vehicles at home, at work and/or on the road. We therefore like to define ourselves as a large magic sphere to protect the urban cyclist. Our goal is to make the use of alternative mobility increasingly easier and more widespread among users, providing a punctual and personalized assistance service. We have uploaded our App to the stores and are expanding our network of mechanics and cycle workshops affiliated with us throughout Italy day by day. Our main customer segment is the urban cyclist, to whom we offer our added value: having a mechanic always in your pocket.

doctorbike to business

Our commitment to companies

Through our Doctorbike to business project we actively seek partnerships with the main companies in the area in order to encourage the use of bicycles among employees as a vehicle for a better quality of life as well as greater work productivity. Our aim is to take care of the home-work commute by creating bike-friendly spaces. We therefore aim to provide essential services such as rental of company bike fleets with GPS tools, changing rooms and company bike storage/sharing, installation of wallbox charging stations and maintenance as well as discounts for ordinary and extraordinary maintenance interventions on company vehicles or those of employees and their families.

doctorbike app and management system

We have developed with our IT team a smart system for requesting assistance in our bike workshops, on the road or at home. The Doctorbike App, available on iOS and Android, is the tool to always have the bike mechanic in your pocket and finally experience city travel by bike or scooter with peace of mind.

doctorbike app and management system

We have created a Doctorbike management platform tailored to the customer's needs. This platform allows us to receive customer support requests in real time and manage them in total autonomy also with our team of affiliates present in Rome and in the cities of Italy where Doctorbike is present.

Our network: our affiliates

We have established partnerships with cycle workshops and cycle mechanics in the main Italian cities to guarantee our roadside and home assistance service which can be booked via the Doctorbike App. We expect to have an even more detailed mapping of the territory by 2025, in order to guarantee the greatest coverage of our assistance service.
