

Junior Consultant in Scientific Innovation Financing

Location : Marseille, FRANCE

Type of position : Full time – Permanent contract

Our client is a specialized and recognized firm in supporting innovative, Deeptech, and growth companies. It offers a dynamic and stimulating environment where you can develop your expertise in innovation financing. As a member of the team, you will actively contribute to supporting the growth and success of innovative companies.

Responsibilities :

- Support senior consultants in assisting innovative companies with their financial strategy and funding search.
- Construction of financing files: BPI, ADEME, banks, other financiers.
- Monitoring of financing files (expense tracking, end-of-program reports, etc.).
- After being trained according to the processes and tools in place at the firm, model financial forecasts for several years (Business Plan).
- Writing and constructing fundraising files (Executive summary, Pitch deck, Data room, etc.).
- Development of financial strategies.
- Monitoring of financing mechanisms and investment funds.

You may also be required to participate in events related to the firm's activities (trade shows and other events).

Profile :

- Excellent writing ability: writing skills, ability to synthesize, very good level of French.
- Very good listening skills, ability to conduct interviews to gather essential information for your files.
- Interest in financial modeling.
- Organized and rigorous in work, ability to meet deadlines.
- Excellent command of all office tools: Word, Excel, PowerPoint.
- Adequate level of English to hold a simple conversation and respond to emails in English.

Why apply for this position ?

- Join a specialized and recognized firm in supporting innovative companies.
- Develop your skills in financing across a wide range of areas, from writing to project management, including client communication.
- Be part of a human-sized team, conducive to the exchange of ideas and continuous learning.
