

The Strategic Edge in MEDTECH GP5

Innovation, Safety & Differentiation for
at competitive marked

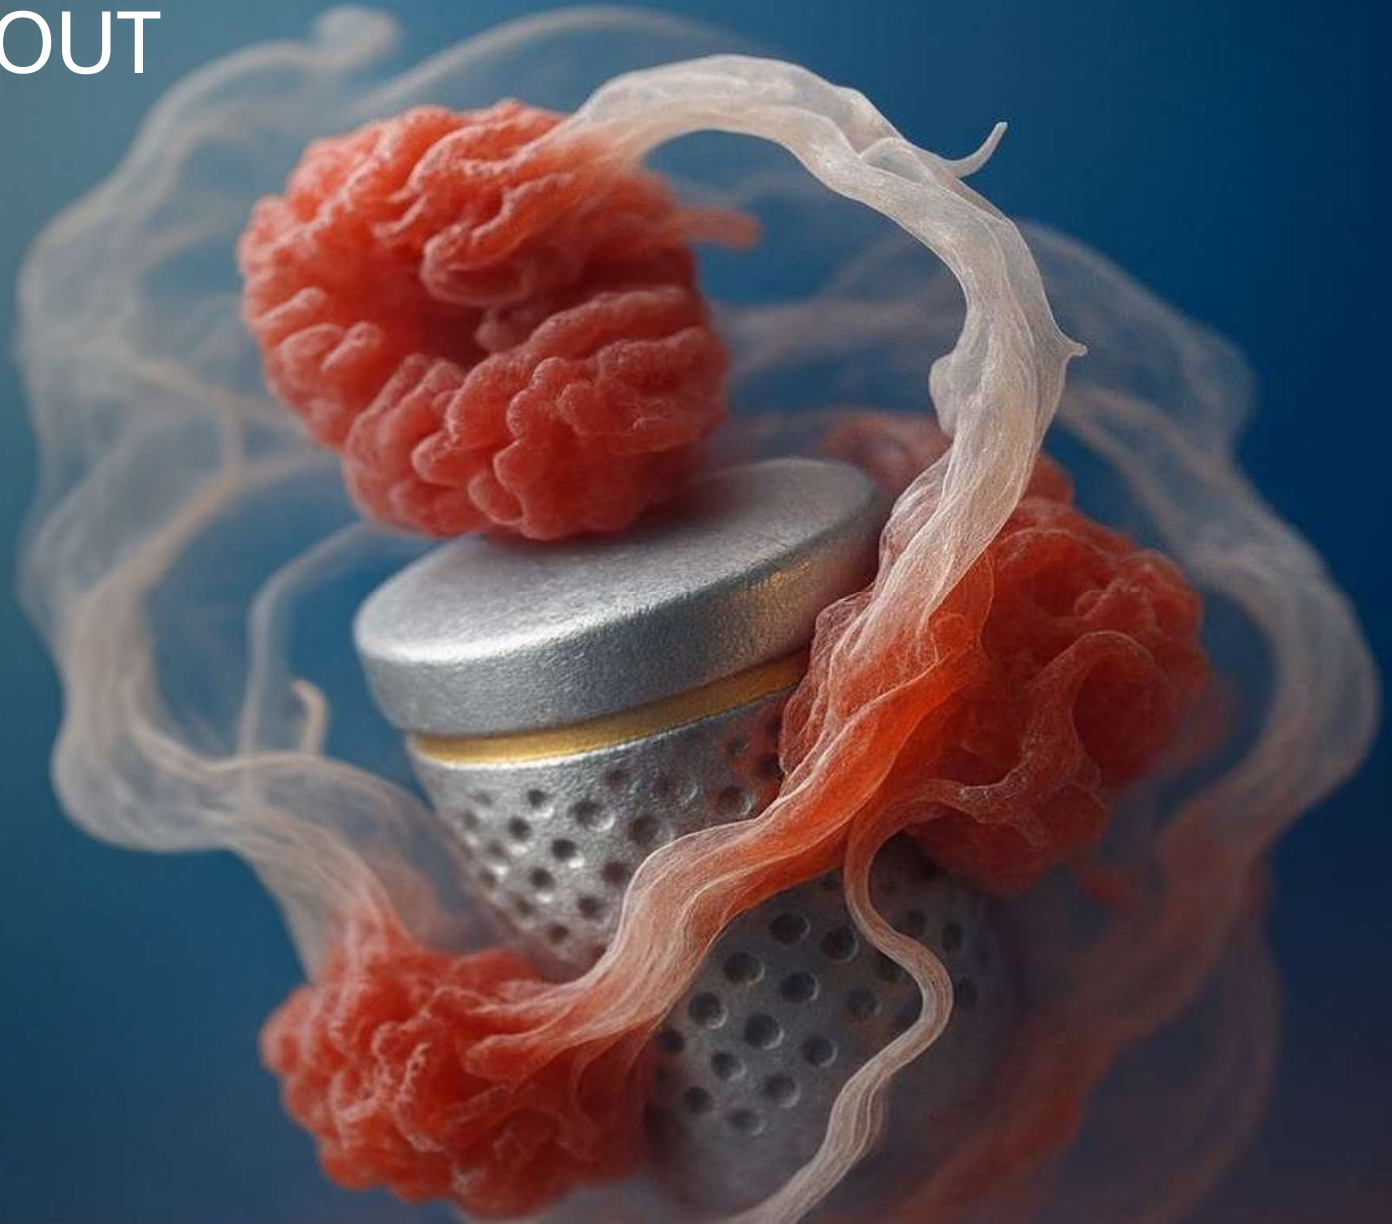

Incorporating GP5 into implants to greatly minimize immune responses, inflammation, and fibrotic encapsulation within soft tissue, leading to safer implants with extended durability and a reduction in post-surgical complications.

INNOVATION WITHOUT DISRUPTION

SEAMLESS INTEGRATION WITH EXISTING PLATFORMS

GP5 enhances implants performance
across platforms-no major redesign,
just measurable improvement.

Biocompatible coating
technology improving implant
performance and durability
