OUR STORY

Styl'monde was founded near Lyon in 1958. Mr. and Mrs. Elie set up their first workshop to begin their toy business.

Marc Elie's modern pencil strokes were very popular.

In fact, one of them wins the Oscar at the 1975 Toy Fair.

As part of a drive to diversify, the company began using thermoforming techniques and moved to new premises in Priay (Ain).

In 1984, the development of the company's industrial activities led Styl'monde to abandon toy manufacturing.

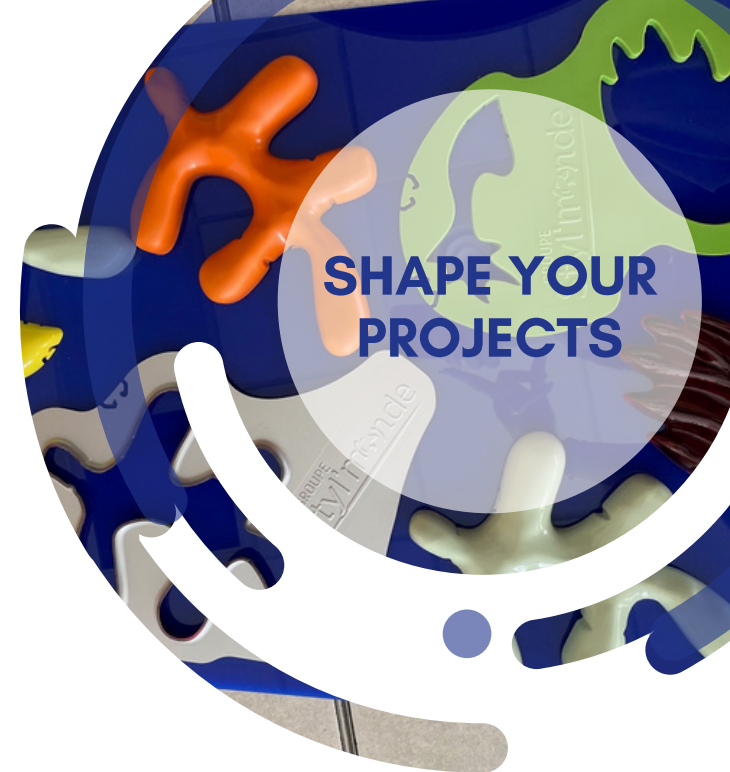

In 1986, strong growth led to the creation of a secondary facility in Faverges (Haute - Savoie) dedicated to local customers.

In 2002, Thierry d'Allard was appointed Chairman of the Management Board and actively pursued the company's development.

In 2006, Styl'monde acquired Thermo Industrie in Mayenne, at that time specialized in parts for motorhomes, cars without licenses and bathtubs.

Today, with four sites in Brée (Mayenne), Faverges (Haute - Savoie), Priay (Ain) and a logistics platform in Leyment (Ain), as well as the creation of a joint venture in India in 2015, the Styl'monde Group signature now takes on its full meaning.

The ISO 9001 and 14001-certified company is pursuing its commitment to quality and environmental standards.
