

Breaking Communication Barriers with AI

- Company established in 2011 by IT geeks, CODA and Deaf persons
 - Leading online (human) sign language translation provider in Central Europe (Polish, Ukrainian and International Sign Languages)
 - Developed its own foundation GenAI model (European AI solution) for sign language translation (TRL 8 in ASL - American Sign Language), ready to work with existing platforms and operational systems
 - Aiming at 30 automated sign languages by the end of 2026
-
- 70% cost reduction for translations.
 - 24/7 service availability.
 - High translation accuracy (95%) and real-time latency (< 100 ms)

MigamAI Revolutionizing Accessibility through
Real-time Sign Language Translation

Piloting SL automation

1

Training of migam.ai in one or two national sign languages

2

Blueprint for replication across EU

3

Addressing the accessibility need, in full compliance with EAA and AIA

Other needs assistance is available for eligible disaster survivors for necessary expense
