

## PURSOL PRODUCTS FOR PROFESSIONAL USE

**PURSOL** – Luxoft's own name for a line of specialist products designed for manufacturers operating in the industrial, shipbuilding and construction sectors, especially for manufacturers of insulating glass.

Our proprietary formula stands out on the market with the right selection of the highest quality components, and 30 years of cooperation with raw material suppliers ensures the best prices.

We offer the possibility of developing a liquid recipe tailored to the client, for example to remove industry-specific contaminants, or developing a substitute, for example a more ecological alternative.

	<b>PURSOL 60</b>	Liquid for rinsing mixing units with polyurethane sealants in the production of insulating glass. It contains high-quality kerosene free of aromatic hydrocarbons harmful to the user (operators involved in the rinsing process). It shows high rinsing efficiency without increasing the temperature of dosing systems. Effective for polyurethanes and polysulfides. Used in manual and automatic lines. It is easily biodegradable. It is not classified as flammable.  Packed in 30 liter canisters. Euro pallet: 16 pcs.	1l	<b>6,6 €</b>
	<b>PURSOL SIL</b>	Liquid for rinsing mixing units with silicone sealants in the production of insulating glass. It contains high-quality kerosene free of aromatic hydrocarbons harmful to the user (operators involved in the rinsing process). It shows high rinsing efficiency without increasing the temperature of dosing systems. Used in manual and automatic lines. It is not classified as flammable.  Packed in 30 liter canisters. Euro pallet: 16 pcs.	1l	<b>6,0 €</b>
	<b>PURSOL 80</b>	The agent is based on specially selected kerosene (low-aromatic kerosene, free of all compounds harmful to operators), intended for removing petroleum contaminants such as crude oil, grease, tar, mazut, asphalt. Thanks to the appropriately selected composition and chemical treatment, the product effectively removes contaminants and evaporates quickly. Due to its decantation ability, it is especially recommended for use in workshop washers with closed fluid circulation.  Packed in 30 liter canisters. Euro pallet: 16 pcs.	1l	<b>3,9 €</b>

	<b>PURSOL OIL 200</b>  <b>New!</b>	Glass cutting oil 4-19mm based on C11-C14 kerosene and isopropyl alcohol. Reduces friction and extends the life of machines and tools. The combination of kerosene and IPA also effectively removes oil stains, fats and grease. Evaporates quickly. Classified as flammable.  Packed in 30 liter canisters. Euro pallet: 16 pcs.	1l	<b>3,9 €</b>
	<b>PURSOL OIL 210</b>  <b>New!</b>	Glass cutting oil 4-19mm based on C6-C7 kerosene. Ideal for float glass and laminated glass. Leaves no residue. Reduces friction and extends the life of machines and tools. Also used as a fast-evaporating device cleaner. The agent is not classified as flammable.  Packed in 30l canisters. Euro pallet: 16 pcs.	1l	<b>3,9 €</b>
	<b>Pursol BEND</b>  <b>New!</b>	Agent for use in the industrial sector, including manual work related to metal processing such as drilling, cutting, threading, plastic forming of metals and alloys. In the glass industry, used for bending aluminum frames. Effectively removes greasy dirt, evaporates completely and leaves no residue.  The agent is not classified as flammable.  Packed in 5l, 30l canisters.	1l	<b>3,9 €</b>
	<b>PURSOL HD</b>	Concentrated cleaner based on orange terpenes (limonene), creating an aqueous emulsion, designed to remove <b>extremely heavy dirt</b> such as tar, asphalt, fuel oil or pitch in the shipbuilding industry (ships after collisions), automotive, road, oil industry. The structure of limonene allows easy penetration into fats and breaking down their structure, ensuring effective cleaning. Flammable agent. Packed in 30l canisters. Euro pallet: 16 pcs.	1l	<b>14,50 €</b>
	<b>PURSOL GLASS</b>  <b>New!</b>	Glass cleaning and degreasing liquid for professional use. Thanks to the high content of ethyl and isopropyl alcohol, the agent perfectly removes grease stains from windows and glass surfaces. Ideal for degreasing before and after glass processing, coating or assembly. Classified as flammable.  Possibility of packaging in 30l canisters.	5L	<b>13,95 €</b>
	<b>Pursol Remover</b>  <b>New!</b>	Fast-evaporating cleaner for cleaning electronic and mechanical devices, as well as tools and machine elements. Effectively removes dirt, dust, greasy substances from surfaces and quickly evaporates without leaving residue. The cleaner has low electrical conductivity, is also safe for most metals, glass, ceramics. Classified as flammable.  Possibility of packaging in 30l canisters.	5l	<b>13,95 €</b>

	<b>PURSOL INK</b>	<p>Specialized agent used for rinsing inkjet industrial printers.</p> <p>It can be used to dilute inks and to manually clean ink stains. Also used as a fast-acting degreaser. Colorless, highly volatile liquid. Extremely flammable.</p> <p>Packed in 5 liter canisters.</p>	1l	<b>9,5 €</b>
	<b>PURSOL 30</b> Metoksypropanol	<p>An organic solvent widely used in the industrial and trade sectors. Like other glycol ethers, it is used as a carrier/solvent in printing inks, paints, and various coatings. Also used for cleaning machines and equipment used in the production of polyester resins/laminates.</p> <p>Packed in 30 liter canisters. Euro pallet: 16 pcs.</p>	1l	<b>4,3 €</b>
