

STABILPLASTIK

PLASTIC TRANSPORT PALLETS

Stabilplastik s.r.o. has been manufacturing and selling plastic transport pallets and other products made from recycled plastic waste since 1999.

- » plastic pallets from recycled plastic waste
- » washable, hygienically clean, dust-free
- » non-absorbent, not affected by rot, common chemicals or insect infestation
- » suitable for export
- » reducing the frequency of mechanical damage to packaging and products
- » possibility of placing the logo on the pallet
- » 100% recyclable
- » up to 77% lower environmental impact

THE MAIN ADVANTAGES OF PLASTIC PALLETS OVER WOODEN PALLETS

HIGHER DURABILITY

Durability of Stabilplastik plastic pallets is incomparably higher than that of wooden pallets. Plastic pallets are not subject to mould, fungi or wood-boring insects. They are made of recyclable material.

HEALTH-SAFE

Stabilplastik plastic pallets meet health safety requirements and comply with European hygiene standards for use in the food industry.

COMPANY LOGO

Stabilplastik plastic pallets can be stamped with the company logo on request. This allows the creation of the company's own pallet management. This eliminates the problem of „exchanging“ your wooden pallets in decent condition for other wooden pallets that are at the end of their useful life. The use of Stabilplastik pallets eliminates wastage during this „exchange“.

COST SAVINGS

In the resulting comparison, if sufficient turnover is achieved, the price of our pallet is lower than the price of a wooden pallet. Stabilplastik pallets are characterised by a longer service life and therefore low cost per turn. In combination with the hygienic design, they form a modern packaging method. We produce pallets in many size ranges and different modifications according to their purpose.

MAINTENANCE-FREE

When exporting goods abroad, wooden pallets must be treated with insecticides and fungicides. For plastic pallets, these procedures (and the associated increased costs) are eliminated.

CHEMICAL RESISTANCE

Stabilplastik plastic pallets are able to withstand the vast majority of chemicals (except for highly corrosive chemicals). They are therefore suitable for use in the chemical industry.

ECOLOGY

Stabilplastik plastic pallets are made from recycled mixed plastic (polyethylene, polypropylene and others). The source material is granulate produced by recycling sorted waste from plastic products. The pallets can be recycled again after the end of their useful service life.

BARCODE OR RFID TAGGED

To ensure efficient management of plastic pallets. This is a very durable way of marking using special types of tags. The tagged pallet becomes a returnable packaging.

Advantages: instant overview of pallets issued and received, record of the number of pallets held by the customer, etc.

CERTIFICATES AND REPORTS

- Expert report on the assessment of the safety of the material composition of the plastic pallet product with regard to use in food processing facilities without direct contact with food, according to which the composition of the product complies with the requirements of Commission Regulation (EC) No 282/2008 and meets the requirements of Regulation (EC) No 1935/2004 of the European Parliament and of the Council.
- Expert report of the ITC, a.s. Institute from 12.10.2011 on the determination of the heavy metal content in the material from recycled plastic, the material meets the requirement of Directive 94/62/EC of the European Parliament and of the Council from the year 1994.
- Test report: material analysis of transport pallets No. 8988/1/2004, dated 23.6.2004, issued by Ecochem, a.s., Dolejškova 3, 182 00 Prague 8.
- Declaration for plastic pallet IP 10 made from recycled plastic No. CZ/CIM-SP/04-07, dated 20.4.2007, issued by the Centre for Information and Mechanical Testing of Packaging s.p. (CIMTO s.p.), conformity with the basic requirements of the technical regulations ČSN EN ISO 8611-1 was found.
- Declaration for pallet unit on recycled plastic pallet type EP 08, No. CIM-4/12-03, issued by CIMTO s.p., pallet load capacity rated according to ČSN EN ISO CD 8611.
- Declaration for pallet made from recycled plastics without supporting floor, type SP08, No. CIM-4/28-01, issued by CIMTO s.p., pallet load capacity rated according to ISO 8611:1991.
- Further updated certificates will be sent on request.
