

Medgate Global
Connecting Knowledge. Transforming Medicine

Investor One Pager

Overview

MedGate Global enables real-time remote proctoring in operating rooms and cath labs. It allows world-class specialists to guide live medical procedures from anywhere — securely and instantly — through a proprietary hardware–software platform that transforms surgical training and oversight.

The Problem

- Global shortage of senior medical experts.
- Delayed adoption of new technologies due to limited training availability.
- Rural hospitals lack access to expert guidance.
- High costs (\$3K–\$10K per case) for flying in proctors.

The Solution – MedGate

- End-to-end remote proctoring platform for live surgical guidance.
- Proprietary encrypted streaming hardware integrated in ORs and cath labs.
- HIPAA-compliant, zero-latency live audio/video.
- Already operational in hospitals across Israel.
- No FDA approval required – operates as a communication & training system.

Traction

- 1,500+live procedures completed remotely.
- 40% faster onboarding of new technologies.
- \$3K–\$10K savings per case in travel/logistics.
- Ongoing collaborations with global hospital networks.

Market Opportunity

Global remotemedicaltraining & proctoring market projected at \$219.8B by 2030. MedGate operates across surgical support, interventional training, and medical education.

Technology & IP

- Proprietary, medical-grade encrypted streaming hardware.
- AI/ML analytics layer in development for surgical insights.
- Patents pending; growing procedural database for predictive modeling.

Go-to-Market Strategy

- Directsalestohospital networks, universities, and simulation centers.
- Strategic partnerships with Medtronic, Boston Scientific, Siemens, GE, J&J.;
- Global visibility via MEDICA, ICI, CTC, PCR.

Funding Overview

Series A Raise: \$6M

40% – Global sales & deployment (EU, GCC, India)

30% – AI R&D; + hardware development

15% – Regulatory processes

15% – Operations & support.

Roadmap

- 2025: Global rollout + AI module launch
- 2026: 150+ installed ORs/cath labs
- 2027: Global marketplace for surgical mentoring

Leadership

Brosh Momi, CEO – Veteran medtech executive with IPO experience.

Erez Kuriel, Founder – Global leader in live medical broadcasting since 1999.

Dror Shalit, CTO

Advisory Board:

Dr. Yaron Almagor | Dr. Gary Binyamin | Dr. Martin Leon

Investment Highlights

- * Proven technology, already operational
- * \$200B+ global market potential
- * No FDA barrier
- * Unique blend of hardware, software, AI
- * Experienced leadership & clinical credibility
- * Transforming surgical knowledge into instant, borderless access
