

Advanced AI for Healthcare

HORIZON-HLTH-2027-03-TOOL-08

Clinical partner in psychiatry, advanced AI
and clinical validation

Partner seeks Consortium/Coordinator

Provincial Mental Health Hospital in Świecie, Poland

Why this call fits us

Advanced AI for Healthcare • HORIZON-HLTH-2027-03-TOOL-08

Advanced AI will only succeed in healthcare if it is safe, clinically useful and validated with clinicians.

Project concept

- Human-centred advanced AI for mental-health decision support
- Multimodal reasoning across clinical records, questionnaires and digital signals
- Safety, usability and clinician-oversight evaluation

Positioning for this call

- Aspirational, technology-driven opportunity where the hospital contributes clinical validation and responsible implementation.
- Clinical relevance, feasibility and real-world implementation are the core value proposition.
- We can contribute as partner seeking a coordinator or established consortium.

Partner seeks Consortium/Coordinator

Human-centred advanced AI for psychiatric decision support and clinical validation

What our hospital brings

Specialised psychiatric care, research readiness and innovation capacity

420+

inpatient beds

25k+

patients yearly

48

mapped staff

Clinical access

- Adults, older adults and complex psychiatric populations
- Mood disorders, psychosis, treatment-resistant conditions, addictions, cognitive impairment

Research & implementation

- Clinical trial experience in psychiatry
- GCP workflows, recruitment, data collection and endpoints
- Department of Research, Development and Innovation coordinating projects

Proposed role in the consortium

Clinical demonstrator and responsible-AI validation partner

What we offer

- Clinical co-design environment in psychiatry
- Mental-health workflows and patient populations
- Clinical validation, safety and usability testing
- Responsible AI implementation perspective

Deliverables we could support

- Clinical protocol input and feasibility assessment
- Patient recruitment and follow-up
- Endpoint definition, data collection and validation
- Dissemination, training and implementation in clinical practice

Advanced AI for Healthcare

HORIZON-HLTH-2027-03-TOOL-08

Clinical partner in psychiatry, advanced AI and clinical validation

Partner seeks Consortium/Coordinator

Provincial Mental Health Hospital in Świecie, Poland

Our value: not technology alone, but clinical validation in a real psychiatric healthcare environment.

Who we seek

We seek AI leaders who need a specialised mental-health clinical demonstrator.

- Leading AI research centres and advanced AI developers
- Multimodal/foundation-model and agentic AI expertise
- Ethics, regulatory and data-governance partners
- Healthcare providers for cross-site demonstrators

Next step

Schedule a B2Match meeting to discuss consortium fit, work package role and contribution to the proposal.

Dr Eng. Wojciech Poćwiardowski
Coordinator, Department of Research, Development and Innovation
