VIDEO

Key features :

- Stream normalization (ONVIF, RTSP) to a centralized system
- PTZ proxy to control video equipment
- Unicast (TCP, UDP) and multicast streaming
- HTML5 transcoding
- RTMP compatibility (integration of drone video streams into VMS)

SECURITY SYSTEMS

Key features :

- Protocol gateway and converter
- Universal connector for each type of sensor (ACS, drone, alarm, business information system) in event feedback and command control
- Integrated rules manager
- Allows the addition of sensors not natively compatible with the existing supervision front-end (openness, evolution and simplification)

BUILDING MANAGEMENT SYSTEM

Key features :

- Data stream from BMS to VMS or PSIM (alarms, analog and digital values)
- Control command to BMS
- PSIM graphic components can be integrated into a SCADA system to federate safety aspects from the BMS
