

With OSPA Place, governments **attract more investment, approve projects faster** and **communicate clearly** with their citizens.

Urban digital twin technology for cities, investors and citizens.

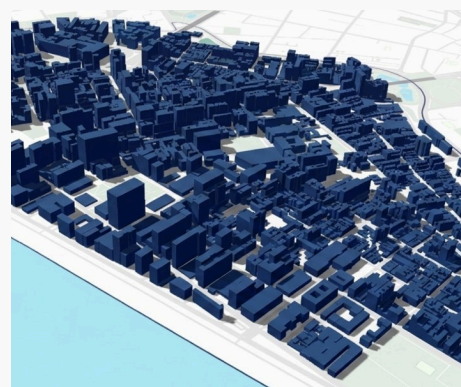

Based in São Paulo, Miami, New York and Porto Alegre.

Buildable volume, financial feasibility and project pre-approval in one click, before a single drawing is submitted.

Community engagement through an open city platform: what is allowed, proposed and being built, block by block.

Test new legislation before it passes, and see where revenue, permits and growth are happening across the whole territory.

From urban planning to feasibility and pre-approval, in one platform.
