ISO 50001

Energy Management System

Our Service Scope

The ISO 50001:2018 standard provides an international framework for achieving excellence in energy management and enhancing energy efficiency. This system enables you to systematically evaluate your energy consumption, utilize your resources more efficiently, and reduce operational costs.

Our expert team develops tailored strategies to optimize your energy performance and helps you achieve your sustainable energy goals.

Become a leader in energy management, minimize your environmental impact, and boost your business's competitiveness!

ISO 14064

Carbon Footprint & Greenhouse Gas Management

Our Service Scope

The ISO 14064 standard provides an international framework for managing and reducing your greenhouse gas emissions. This system enables your organization to measure its carbon footprint while enhancing monitoring and reporting processes.

Our expert team analyzes your greenhouse gas emissions to help you develop effective mitigation strategies and achieve your sustainability goals.

Contribute to a sustainable future by reducing your environmental impact, and strengthen your competitive edge by enhancing your brand's environmental responsibility!

ISO 42001

Information Technology — Artificial Intelligence Management System

Our Service Scope

The ISO/IEC 42001:2023 standard provides an international framework for managing artificial intelligence systems, enabling organizations to effectively govern their AI applications. This system allows you to streamline your AI processes while ensuring reliability, ethics, and performance standards.

Our expert team evaluates the risks of your AI projects and develops strategies for sustainable success.

Secure your AI applications, drive innovation, and strengthen your competitive edge in the industry!

Penetration Testing

Penetration Testing and Vulnerability Scanning

Our Service Scope

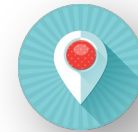

Tailored Solutions Across Two Service Scopes

- 1. Vulnerability Assessment:** This scope covers comprehensive vulnerability scanning for all internal network assets—including servers, workstations, and IP-enabled peripheral equipment—as well as external-facing websites and corporate applications. Upon completion, we provide reports in internationally recognized formats, available in English upon request. This service is fully compliant with ISO 27001 ISMS, Revenue Administration (GIB), and other regulatory requirements.
- 2. Penetration Testing:** Expanding beyond vulnerability assessments, this comprehensive scope includes mobile application security, DDoS resilience testing, Social Engineering simulations, and Static/Dynamic Code Analysis. We deliver these services as a TSE Class-A Certified Penetration Testing provider, ensuring the highest level of authorization and technical expertise.
