Legacy to the future
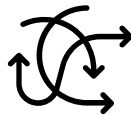

Don't rewrite the past – upgrade it

Why

25 %

Some problems

Public administrations across Europe rely on outdated systems — many with missing documentation, inconsistent data, and low maintainability

These applications are :

- Difficult and expensive to evolve

- Blocking innovation

- At risk of becoming black boxes as staff retires

Our solution : Legacy to the Future

Don't rewrite the past – upgrade it. Modernize what matters.

L2F is a service that uses GenAI in combination with developer expertise to:
- Understand un-documented legacy applications
- Generate technical and functional documentation
- Evaluates technical debt vs usage
- Create / increase test coverage
- Identify quick wins
- Refactor safely in order to regain trust in aging applications

… for one application, or for hundreds

5th floor software is an agile company, founded in 2018 and based in Belgium. We have more than 130 collaborators ready to support your digital transformation projects.
