## ABOUT US

Softmount Technology designs, develops and manufactures Machine Gun recoil suppressing systems used by NATO member country militaries. Our solutions were first put into service in 2012 and also include training of military end users and support staff in the use of our systems as well as maintenance and repair procedures.

## ACCOMPLISHMENTS

**DANISH  
ARMY**

**DANISH  
NAVY**

**KUWAITI  
SECURITY  
FORCES**

**FRENCH  
ARMED  
FORCES**

**MLADS  
TEST**

We design and build rugged, fully mechanical weapon mounts that improve hit probability, allow faster weapon operation while reducing wear and tear. Our softmounts increase weapon controllability and is battle proven and used in ground vehicles and on marine vessels. In addition to Land Mounts and Marine Mounts, recently mobile softmounts fitted to 4x4 vehicles are increasingly being used for MLADS (Mobile Low-cost Air Defense Systems) in combination with Heavy Machine Guns (HMG), Light Machine Guns (LMG) and used against low flying weaponized drones and cruise missiles. Our softmount is designed to accommodate a variety of Machine Guns and grenade launchers (40 mm).
