HENG ARCHITECT  
SELECTED PROJECTS  
MASTERPLAN

Proposed Bio-Hybrid Campus  
Masterplan  
University of Malaya, Kuala Lumpur.  
Competition Project, 2020

**Bio-hybrid** is a morphogenetic reaction to the state of the complexity of the environment. The design of the master plan is inspired by the biological structure of a leaf. The evolution and assembly of leaf vein traits across growth forms.

The reticulate pattern gives highly ordered veins that show its **Spine, Connection, Support, Growth, and Sustain**. The campus is designed to grow, expand and sustain in a healthy way.
