- ✓ Backup-as-a-Service (BaaS)

- ✓ Next-Gen Firewall
- ✓ Virtual Private Network
- ✓ EDR & XDR
- ✓ Identity & Access Management
- ✓ Security & Event Management
- ✓ MILESIGHT AI Camera Solution
- ✓ Cisco Solutions
- ✓ ERP Customized Solutions

SST Performance Cloud

Powering Digital Transformation with Security, Scalability, and Reliability

PERFORMANCE CLOUD
SMART & SUSTAINABLE TECHNOLOGIES LLC

Our Legacy of Innovation

Since 2006, SST's senior management team has been at the forefront of the ICT and telecom industry in the UAE. With expertise in telecom network building, airport security control solutions, public safety systems, ELV solutions, and system integration, our leadership brings nearly two decades of proven excellence and innovation.

In 2014, we officially entered the market under Galaxycom ICT Solutions (DMCC), later rebranded in 2018 as Galaxycom ICT Systems in Ajman. Over the years, our operations expanded into Sharjah, Dubai, Muscat (Oman), and the USA, proudly serving a wide range of enterprise and government clients.

A major milestone came in 2022, with the successful completion of the Expo 2020 TETRA Network Maintenance & Managed Services project, cementing our reputation for delivering mission-critical technology solutions.

Our Vision for the Future

Recognizing the rising demand for next-generation IT infrastructure, our leadership made a strategic decision to expand into data centers and cloud technologies. This forward-thinking vision led to the creation of SST Performance Cloud in 2024.

About SST Performance Cloud

SST Performance Cloud is a specialized cloud services platform built in partnership with Sangfor Technologies and hosted at the world-class Equinix Data Center, Dubai. Designed to meet the highest global standards, the platform delivers:

High Availability – 99.999% uptime for uninterrupted business operations

Enterprise-Grade Security – multi-layered protection to safeguard mission-critical data

Global Scalability – empowering organizations in the UAE and worldwide

Trusted Infrastructure – robust, resilient, and future-ready cloud solutions
