

Allweb Solutions S.A.

since 1989

No-code
AI-Driven
Digital solutions of tomorrow

Leading the way in no-code software and AI-powered platforms for government and business.

Who we are

Leading **Greek IT SME** at the forefront of digital innovation

35 years
of excellence delivering software & cloud solutions

1100+ IT projects
successfully delivered

6 countries
served across Europe and the Balkans

3 international certifications
for quality, security, and sustainability

Commitment to excellence in **quality, environmental responsibility, information security**

Environmental management

Quality management

Information security management

Allweb operates with the highest standards for delivering **reliable solutions safeguarding data promoting sustainability** across every aspect of its operations.

Driving **innovation** & building **trust** through leading networks

SEKEE (Association of Innovative Applications Companies of Greece) aims to strengthen the ecosystem of entrepreneurship and innovation, in which the member companies operate, with the ultimate goal of their business development and their spread on a global level.

AHK (Hellenic-German Chamber of Commerce and Industry) fosters strong business ties between Greece and Germany. It supports companies with expert advice, networking opportunities, and high-quality services, helping members grow and succeed in both markets.

The **Chamber of Euboea** founded in 1933 serves approximately 15.000 member businesses. It supports sustainable local development and creating a stable framework for business growth and prosperity. It promotes innovative and developmental initiatives for the Euboea business community.

SAEE (Association of S.A. and Entrepreneurship) promotes the collective interests of its members, encourages best practices in corporate organization and champions the advancement of entrepreneurship and professional growth within Greece's dynamic business environment.

Effortless for you, **powerful** for your business, **digital transformation**

No-code application design

Create business applications without writing code. Design forms, rules, workflows, roles, and permissions through a fully configurable environment.

Cloud agnostic & flexible deployment

Deployable across any cloud or dedicated environment, leveraging Kubernetes/OpenShift for maximum scalability & performance.

Enterprise-grade security

Adheres to the highest industry standards for access control & monitoring. Includes automated monitoring, real-time dashboards & disaster recovery protocols for business continuity.

Seamless connectivity

High interconnectivity and open RESTful APIs (OpenAPI/Swagger) allow effortless integration with third-party systems and enterprise infrastructure.

Visual programming & automation

Intuitive drag-and-drop tools for rapid app development, automated testing and streamlined deployment, enabling “citizen developers” to collaborate with IT experts.

Open, Agile, and Scalable

Built on an open system architecture with omnichannel access and responsive web interfaces. Fully integrated, follows Service-Oriented Architecture (SOA) principles.

AI-driven intelligence & automation

Leveraging machine learning for smarter decision-making, automated recommendations, advanced analytics and continuous process optimization.

Our value proposition

Choose Allweb, where **expertise** meets **innovation** and your **success** is our mission

Comprehensive expertise

Over 35 years of experience delivering software, cloud solutions, and digital transformation for public and private sector organizations.

Scalable solutions, lasting impact

Our platforms and services are designed for growth, adapting seamlessly as your organization evolves and new opportunities arise.

Innovation at our core

Pioneers in no-code and AI-driven platforms, enabling rapid development, customization, and automation for every client's unique needs.

Proven EU project experience

Extensive track record in preparing and writing successful proposals for European funding calls, and in coordinating the entire proposal submission process for complex, multi-partner projects.

Full-service capability

From tailored software development and cloud integration to continuous IT support, Allweb delivers end-to-end digital solutions.

Unmatched reliability & quality

Certified for quality, environmental responsibility, and information security, ensuring your projects are in safe, expert hands.

Partner-focused approach

Building long-term relationships based on transparency, collaboration, and measurable results.

Thank you!
