

High-integrity automated emissions reporting that drives revenue for manufacturers

Trusted by over 100 companies...

By 2026, over 4 million suppliers globally will see their profits significantly impacted by climate regulation

Carbon tariffs could increase costs by over 45% to end-clients.

Climate reporting is becoming a requirement to work with Fortune 5000 businesses due to regulations.

Non-compliance is increasingly punitive as regulation tightens, at least 4% of international revenue.

Climate reporting is increasingly important, but companies have fewer resources to do it

Common Current state

Ignore Requests

- Creates friction with clients and blocker to growth

Impact

Decreased growth and revenue risk

DIY Compliance

- Expensive to hire talent or low-trust outputs

Increased risk and low commercial value

Manual Spreadsheets

- Slow and expensive, error prone over time

Decreased efficiency and increased risk

Over 70,000 of the largest companies in the world will **require supply chain reporting by 2029¹**

Our customers are focused on

Protecting and growing their relationships with larger customers

"We never got climate data requests before, now we get them every week"

Jim Stewart
Director Env. Health and Safety

Meeting changing regulatory requirements

"We weren't sure how to respond to all of our customer's climate requirements"

Jim Shotsberger
Director Purchasing & Customer Service

Increasing profitability and efficiency of operations

"Carbonhound's automated data collection allows our team to focus on the important work."

Jessica Loding
Chief Sustainability Officer

Increasing regulation is putting manufacturers' large customers at risk

Largest customers **Costco and Walmart** putting pressure on Bobos to quantify their emissions.

"We never got climate data requests before, now we get them every week"

– Jim Stewart
Director of Env. Health and Safety

- **Unique requests** for different clients are getting more and more complicated to respond to
- Typical credible consulting and technology **solutions are expensive (\$75k+)**
- Keeping up with the ever-changing **range of legislation** (i.e. EU & California) is near impossible

Case Study: Semblex

Tier 1 automotive supplier, Semblex, tackles EU Carbon Border Adjustment Mechanism customer requests with confidence

- Requests from major customers for **CBAM, CDP, and M2030 supplier questionnaires** started coming through
- **Without in-house climate expertise**, Semblex looked for an external solution to meet these requests.
- Semblex captures their **Scope 1, 2, and 3 greenhouse gas emissions data** and leverages the data they collect and quantify in **less than 2 months**

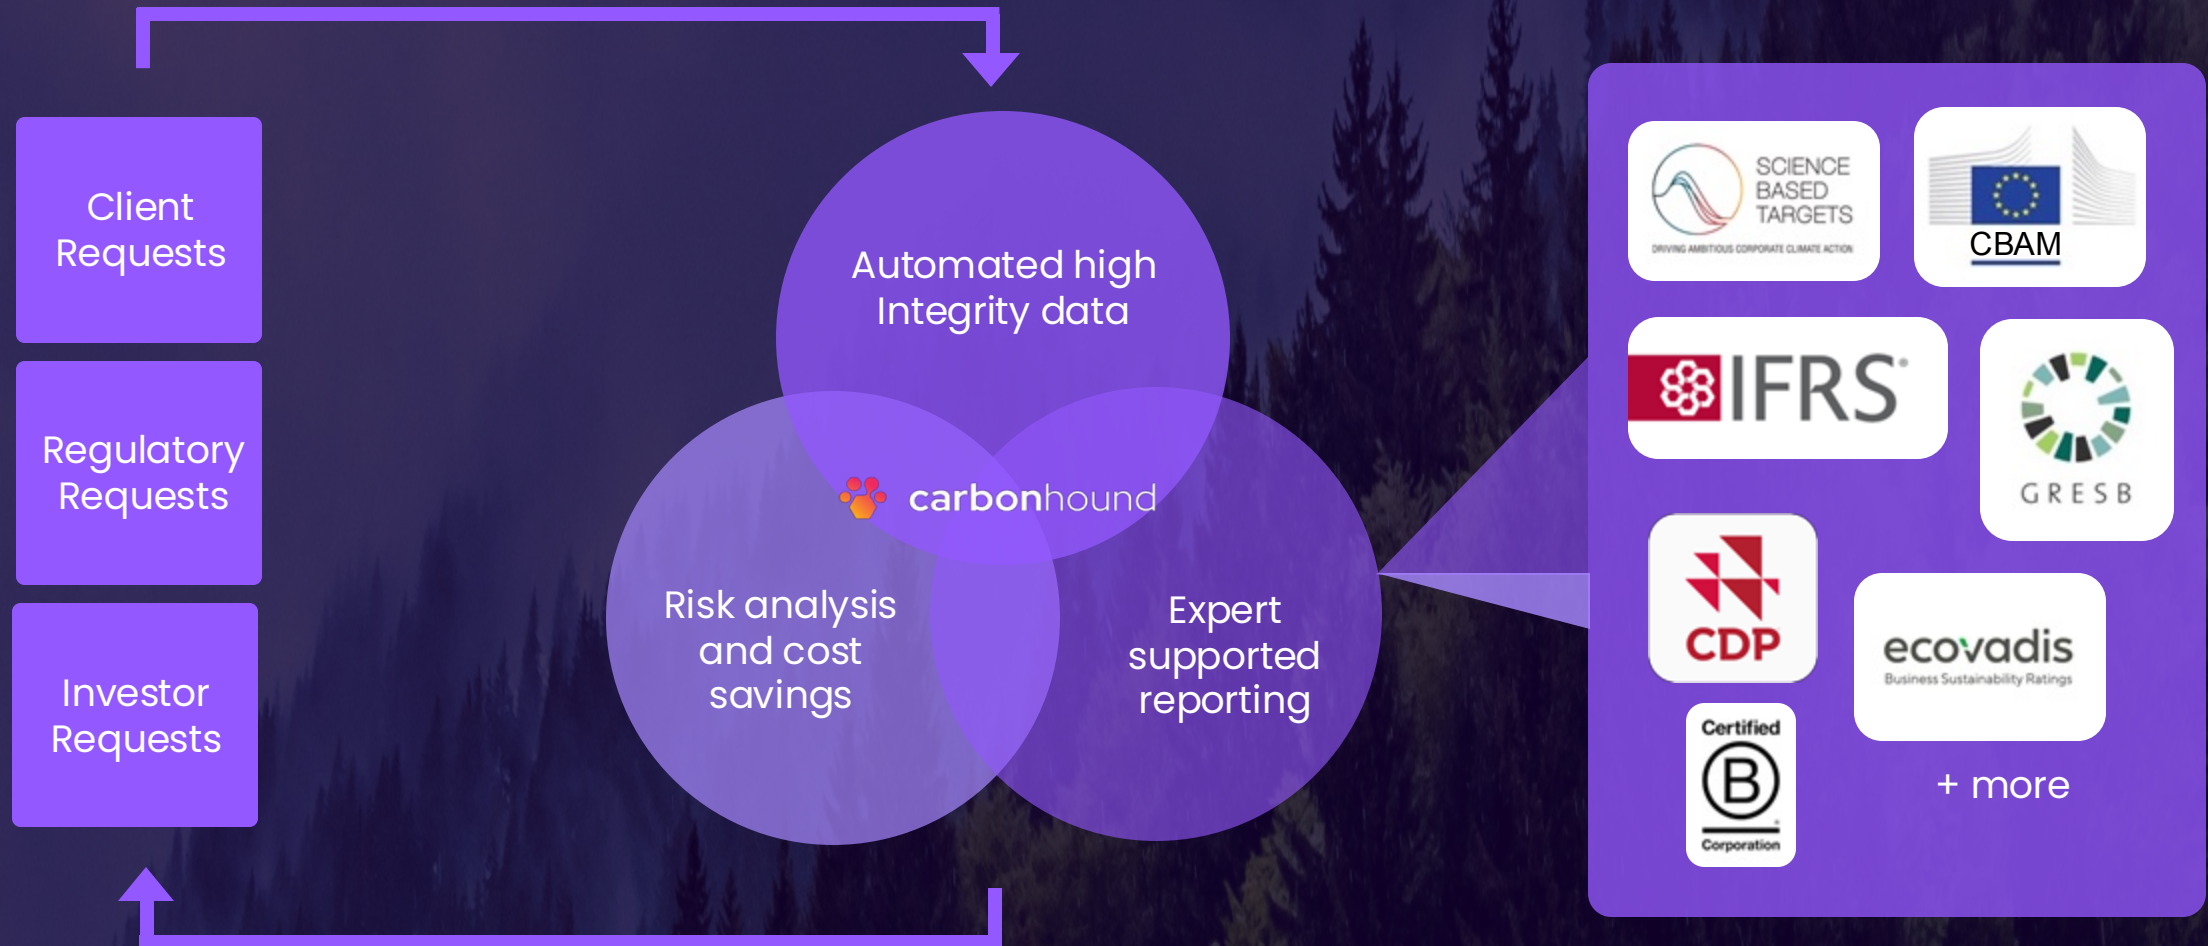

We have seen the strong increase in CBAM requests from our customers and their need to have accurate information provided in a timely manner. Our commitment to our customers and meeting their expectations led Semblex to partner with Carbonhound. With Carbonhound's help we are now able to respond to these requests efficiently and accurately without needing to add resources.

-Gene Simpson, President at Semblex

Carbonhound gets you credible, compliant and ready for any stakeholder request

Our expertise and technology gets you to your goals quickly

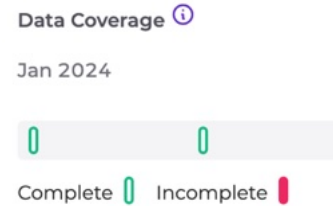

Expert guided
materiality assessment
and AI risk analysis

Connect data from
thousands of sources

Review data gaps

Complete baseline and
receive certification

Create initiatives and
reduce costs

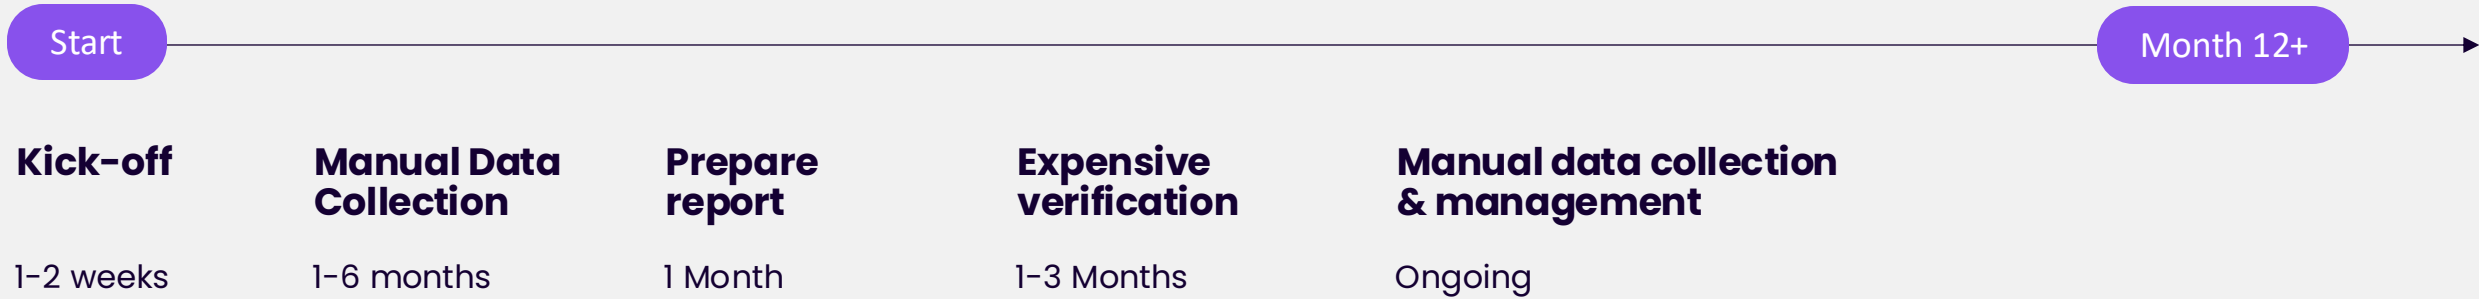

Continuous monitoring

Redefining high integrity reporting

Traditional Way 6-12 Months, 2-5x+ more expensive

 **carbonhound** 1-3 Months, 70% cost savings and 50-80% less time

Extract commercial value for all stakeholders from your reporting

Operations

Sustainability Professional, EHS

- Reduce time to meet business reporting needs
- Automated QA build in to build high trust data
- Reduce costs and embed knowledge into existing team
- New lense to look for operational efficiency projects

Commercial

Sales, Marketing

- Win more deals with climate-regulated prospects
- Reduce procurement cycle length
- Differentiate product and save clients money on compliance

Finance

Risk, Regulatory, Controllers

- Reduce churn in largest customers
- Reduce the risk of regulatory and green-washing penalties
- Increase margins
- Attract more institutional investors and increase access to capital

A proven track record of meeting our manufacturing customers' needs

- + **100+ customers**, 72% of which have acted as references
- + **100% coverage automating** clients' climate data
- + **3.5x faster** to respond to customer requests compared to consultants
- + **Bank-Grade security**: SOC2 compliance to keep your data safe

"Robust and valid data collection is critical to responding credibly to our customer's climate data requests. Carbonhound made it straightforward."

Jim Stewart

Director Env. Health and Safety, Bobo's

Data Concierge makes it easy to measure with integrity hands-free

- + **Set it and forget it:** Automate your entire Scope 1, 2, 3 emissions data
- + **Save 85%+ of your time** and cost on data collection
- + **Flexible data ingestion:** 100% data automation, 1000s of integrations
- + **Class-leading QA:** Data QA'd by a climate data expert and supported with AI driven auditing

The hidden costs of data collection

		Minutes per data point (manual)	With Data Concierge
1.	Retrieve data	11	4 (once)
2.	Extract and normalize data	3	0
3.	Map correct source and emission factor	3	0
4.	QA and audit	5	0
Time/Cost		22 min. per month	4 minutes once
Accuracy		Medium	98%+

*based on Carbonhound data studies

Reports trusted by public companies and banks

- **Proactively demonstrate** commitment to high integrity reporting
- **Reduces the back and forth** around climate reviews
- **Accelerates sales processes** with your target audience
