Standardized
Records
Management
Systems

Technical Pain Points

Downtime, Costs, & Insufficient Visibility Are Crucial Pain Points For Digital Systems

QUALITY

- Schema Mismatches
- Inaccurate & Corrupted Data
- Data Losses In Network Transfers

RESOURCES

- Cost Overruns (Planning & Disruptions)
- Insufficient Visibility Into Data & Systems
- Licensing & Compliance

OPERATIONS

- System Downtime
- Security Vulnerabilities
- Bandwidth Bottlenecks

“Data Loss Risk Management & Operational Efficiency”

Patient Complaint Management

Customer's Will Want To Know That
Their Quality Or Service Complaints
Will Be Handled Quickly & Reliably!

- Long Wait Times
- Un-Courteous Personnel
- Delays In Approvals
- Early Discharge
- Medication Errors
- Untreated Symptoms
- Complex Rules For Patients Accessing Health Care
- Complaints Not Addressed

*"Complex Legal
Procedures Can
Risk Dissuading
Patients"*

MAGENTACORE

Barriers To Health Care Systems

Patients & Medicare Personnel Struggle To Use Digital Technologies,
Which Slows Down The Medicare System!

RESOURCES

- High Costs Of Equipment
- Medicare Is Too Expensive
- Replacing Parts & Machines

EMPLOYEES

- HR Readiness
- Worker Pushback
- Weak Integration Of Technology

*“Weak
Management
Can Undermine
Digitalization”*

Telehealth & Telemedicine

Telehealth Utilizes Digital Information, Networks, & Infrastructure, To Provide Access To Health Care Services & Remote Health Management (Through On-Site Medicare Personnel & Resources)

Telemedicine Mainly Uses Phone Calls & Videos Services To Provide Remote Health Care
